

State Schools Represented In UNESCO

Several outstate colleges will participate in the UNESCO Conference Feb. 16-18, co-chairman, Shirley Sabin and Bob Nickols announced today. Wesleyan University, Hastings College, York College and Wayne State Teachers college will share in the program.

Wesleyan will represent Egypt at the plenary session. Hastings will share Czechoslovakia with Chi Omega and York will take Mexico with Phi Gamma Delta. Campus organizations and outstate schools will divide the policies and committee members of each nation. Campus groups will supply executive board members in both cases.

Wayne State will participate in the conference as an observer. The Wayne State plan is to adapt the UNESCO program, if possible, for use on its own campus, the co-chairmen said.

Other outstate schools have been contacted but have not responded as yet.

During the conference outstate delegates will be housed on the campus. Any group with rooms available for delegates is ask to contact Jerry Young, facilities chairman. He may be reached thru the UNESCO office room 305 of the Union. Office hours are from 12:30-1, 2-4 and 5-6 p. m. Monday thru Thursday.

Angelino to Lead Y Forum Tonight

Instructor Henry Angelino of the Educational Psychology department will lead the discussion in a forum sponsored by the university YMCA Wednesday at 7:30 p. m. in the Temple building.

Entitled "The Conflict Between Normal Behavior and Ethics," the discussion will be open to the public. It is an outgrowth of the Kinsey Report forum held last week and will take up other phases of human behavior. Bill Reuter, program chairman, will be the chairman of the forum.

Prior to this discussion, there will be a cabinet meeting at 6:30 p. m.

PUB BOARD ELECTION.
There will be no election to fill the vacancy in the Publications Board in today's Student Council meeting. All applicants for the position are requested to come to the Council meeting next week for their interviews.

J. M. Reinhardt Addresses Sociology Group at Dinner

The secret behind human conduct was discussed by J. M. Reinhardt, professor of sociology, before 27 members of Alpha Kappa Delta, sociology honorary, following a dinner last night at the Union.

"The individual's past is always

DR. J. M. REINHARDT.

throwing itself into the present and forecasting the future," Reinhardt stated. "The task of bringing past and present harmoniously together is the basic task of life. It is aided by congenial tempera-

Underclassmen Begin Registration

"You just walk right through." That was typical upperclassmen's comment after picking up a registration card yesterday. Issued to seniors, graduates, special students and juniors Monday and Tuesday, the cards are available in Temporary B building beginning at 8 a. m.

Sophomores and freshmen will pick up their cards today, Thursday and Friday. Procedure is: Dec. 8, those whose names begin with A, B, C, D, E, F, G and H; Dec. 9, those whose names begin with I, J, K, L, M, N, O and P; Dec. 10, those whose names begin with Q, R, S, T, U, V, W, X, Y and Z.

Numbers of registration cards have been divided into three equal groups.

ment, capacity, and by favorable surroundings. Herein are to be found the secrets behind conduct."

Reinhardt Cites Cases
In drawing his conclusions, Reinhardt cited several cases which he had studied. He traced the cause of a murder to childhood jealousy of the murderer existing over his father's possession of his mother and his consequent desire to do away with his father.

"Crime, the criminal act," he continued, "is carried out in the presence of and even with the consent of ego. Indeed it turns out that this collusion with ego is what makes the criminal seek to avoid detection."

Freud Discussed.
Reinhardt also discussed the theories of Freud and his emphasis upon the unconscious. He attributed Freud's place in history to the strong cult which he originated.

Dr. Reinhardt's speech was taken from an article which he has prepared for the "Prairie Cchooner." Reinhardt is noted as an authority in the field of criminology.

1948 CORNHUSKERS.
Students who have not picked up their 1948 Cornhuskers must do so before the Christmas vacation, according to Business Manager Ray Biemond. All old yearbooks still left in the Cornhusker office after Jan. 1 will be sold.

Bizad to Recess For Registration

Classes in the College of Business Administration will be dismissed Dec. 3 and 4 to allow students to meet with advisers and determine their second semester schedules.

All students who expect to register should make appointments with their advisers for one of these two days. It is the administration's plan that the two days be used to facilitate registration effectively and with a minimum of inconvenience to teachers and pupils.

Ping Pong Tournament Scheduled

The following schedules were announced today for the women's ping pong tournament being sponsored by the Union Competitive Games committee. Matches begin at 7 p. m. each evening in the Recreation room of the Union. The first round matches are:

- 1 Pat Hamburg vs. Royce Volentine
 - 2 Barbara Durland vs. Wendy Corkin
 - 3 Katie Pfeiffer vs. eva Jean Huttner
 - 4 Lois Gobar vs. Betts Pfeiffer
 - 5 Joan Armstrong vs. Marilyn Weber
 - 6 Betty Bloss vs. Rosanna Svoda
 - 7 Rosalie Garrud vs. Ginger Meehan
 - 8 Edith Roessler vs. (bye).
- Thursday, 7 p. m.—
- 1 Marian Ekblad vs. Irene Hunter
 - 2 Lorrain Hush vs. Lois Kroehler
 - 3 Jan Sielaff vs. Patsy Dutton
 - 4 Lois Hogle vs. Jessica Brown
 - 5 Carolyn Becker vs. (bye).
 - 6 Marilyn Russel vs. Doris Gillett
 - 7 Marge Alexis vs. Janet Zlomke
 - 8 Jane Sun vs. Clara Pukga

Winners of the first round will be informed as to the second match at a later date.

Students should observe the following procedure:

1. Sign for appointments with advisers at earliest possible date.
2. A list of all advisers and their advisees is posted on the bulletin board near the south end of the second floor corridor in Social Sciences. Students are expected to register with the adviser to whom they have been assigned. Any changes will require approval of the Dean's office, 210 SS. If students do not know the names of their advisers they should inquire in 210 S.S.
3. Students should have with them the grade records of past work at Nebraska and, in the case of transfer students, their credit evaluation slips.
4. Students must keep appointments with advisers.

Ags Register By Short Cut Plan Again

Ag students will again register by the simplified procedure which has been used the past two semesters, Dean Lambert announced this week. Registration machinery is now in progress.

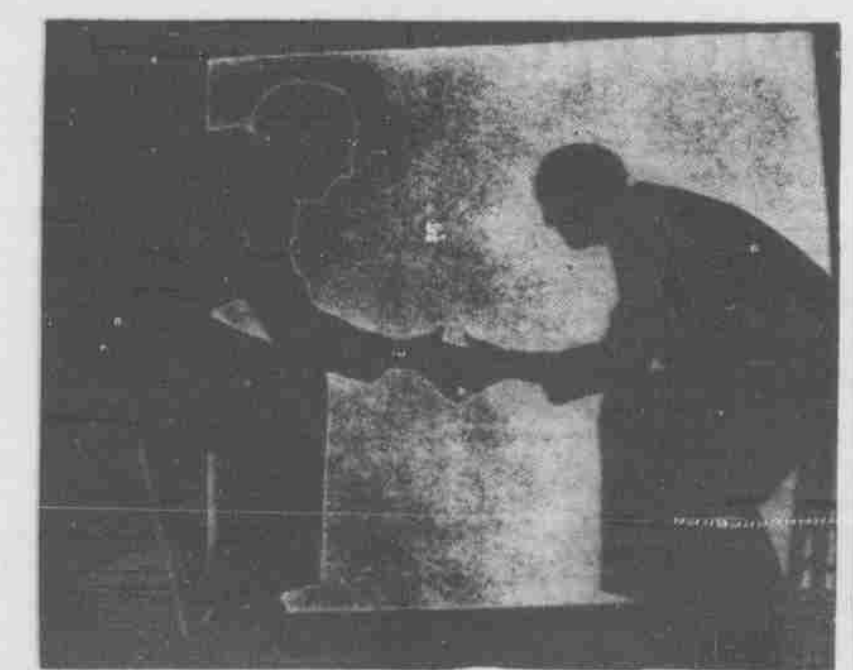

No numbers are issued in the Ag program which was designed by a faculty committee headed by Dr. C. C. Wiggins. Students rather should arrange for a conference with their advisor sometime before Dec. 14, at which time a worksheet will be filled out.

After the worksheet has been completely filled out, the student will present it at the appointed time to the assignment committee in Room 203, Ag hall. Seniors and juniors will bring in their schedules beginning Tuesday, Dec. 14, and freshmen and sophomores may file starting Friday, Dec. 17.

Students who are in the Junior division and students who are scheduling classes downtown must have their worksheets filed before Dec. 22 according to Dean Lambert. Those who do not file before Jan. 10 will be required to delay their registration until Jan. 26, 1949, he added.

The assignment committee has the power to adjust schedules in the event that a section is filled but it cannot change the courses requested by the student without counselling the advisor. Filing of an acceptable worksheet ends the student's responsibilities until the payment of fees.

G.E. Science Show, 'House of Magic,' Scheduled Tonight in Union Ballroom

WILLIAM O. HOVERMAN shakes hands with his own shadow in the General Electric "House of Magic" science show. A phosphorescent screen enables him to walk off the stage and leave his shadow behind, fold his shadow up in a box, or to do any of the many things you may have wished you could do with your shadow.

BY EMILY HEINE
"House of Magic," the General Electric Company's science show, will be presented at 7:30 tonight in the Union ballroom. William O. Hoverman, a graduate of Brown University with a bachelor of science degree in electrical engineering, will be the demonstrator.

Show Makes Debut in 1933
The show made its debut in 1933 before the Chicago Century of Progress World's Fair. Since then it has played before approximately 13 million students, adults and service men. It shows briefly a few of the many useful, unusual things which scientists at work in the General Electric research laboratory have discovered. The program is for engineering students, and all members of that college are urged to attend.

The name "House of Magic" originated with the late Floyd Gibbons, famous author and lecturer. Gibbons was so impressed with the unusual things he saw in the General Electric Research laboratory that he called it the "House of Magic."

Actually the show is not "magic" at all, but proof that sober scientific fact can be stranger than fiction.

"Hand with His Shadow" is not a trick, but a demonstration of a scientific fact—the principle of light persistence. Each act of the show is—as the speaker always points out—"the truth of science as nearly as nature has revealed it to us."

The "House of Magic" speaker demonstrates stroboscopic lighting by doing tricks with a wheel painted to represent a gear. A small electric motor turns the wheel fast enough that in ordinary light it seems only a blur. Then the light is turned off and the stroboscopic lamp turned on. Instantly the wheel seems to stop and its pattern is sharply outlined. The same principle can be used to cause an explosion to take its own picture.

Motor Can Run On Sunlight
One of the most interesting of the demonstrations is of a glass-enclosed motor which can be run on sunlight. Using a floodlamp in place of the sun, the demonstrator shows how the special cells work.

The sun motor, pointing to an achievement to be realized far in the future, demonstrates the continuing, expanding quality of research. This research has, in the past, contributed greatly to a higher standard of living. Today it takes on new significance and importance for everyone.

Famous Trial Provides Plot For 'Winterset'

The Sacco and Vanzetti murder case, perhaps the most controversial trial in the annals of modern law, provides the scorching background for Maxwell Anderson's "Winterset" slated for a four-performance run on the University Theater stage Dec. 15, 16, 17, and 18.

Sacco, Vanzetti Convicted of Murder

Sacco and Vanzetti were convicted of murder in a payroll robbery. There were many who were skeptic of the justice of the court. Sacco and Vanzetti were foreign-born, and as Felix Frankfurter comments in his book, "The Case of Sacco and Vanzetti," "Sacco and Vanzetti spoke very broken English and their testimony shows how often they misunderstood the questions put to them."

Anderson has changed the name of the defendants Sacco and Vanzetti into the name of Romagna. But the fervor, the belief of their innocence that was cherished by so many at the time of the trial, (See Winterset, Page 4)

Trick Represents Scientific Fact Even "The Man Who Shakes
