

Student Assembly Adopts Home Representation Plan

The issue on which the faculty first attacked the Council was resolved to the satisfaction of a majority of the Constitutional Assembly at last night's meeting.

The issue, that of representation, was disposed of when a report by that committee was accepted after a three-hour debate. The report calls for representation on the college basis as does the present Constitution. The new provision disregards the sex clause.

Louis E. Means Resigns from Position As NU Physical Education Director

Louis E. Means, director of the division of physical education and intramural sports at the University for the past four years, has submitted his resignation to Chancellor Gustavson and Dean Hentzlik to be effective "very soon."

Means has purchased a sporting goods and television business on Wilshire boulevard in Los Angeles and will take over active management of it within a few days.

His two sons will be associated with him in the business as soon as they graduate from college. Bob will graduate from the University this June, while Dick is now completing his sophomore year at the University of Minnesota.

DURING MEANS' stay here an entirely new and enlarged program of sports for all has been completely installed and is in operation, giving the University one of the outstanding intramural sports programs in the country. During the past four years, voluntary enrollment in physical education courses on the campus has increased approximately 600 percent, and many new courses of popular appeal have been added.

During this period, the professional school for the preparation of workers in the field of athletics, physical education, health education and recreation has grown

from some 50 major students to a group that now numbers over 300.

field has given added prestige to the professional curriculum, and has annually attracted more out-state men, as well as men from other states.

Over the past three years new

graduate courses have been added, placing Nebraska in a favorable position with other state universities in the graduate preparation in health, physical education and recreation. Last year the department graduated 45 men, 39 of whom were placed on jobs in the state.

Just two weeks ago the C. V. Mosby company of St. Louis announced the publication of Means' book, **Organization and Administration of Intramural Sports**, which has already been adopted by several leading universities as text in their professional courses.

DURING THE past year Means has been president of the Nebraska association for Health, Physical Education and Recreation, and under his leadership the association has made rapid professional strides. The past two years has seen a remarkable growth in the department in extension service to Nebraska schools and communities.

Means and several members of his faculty have been very active in assisting Nebraska communities on problems of facilities and community recreational organization. Means has also been very active as chairman of several national and district professional organizations.

Following the third course, a formal dance will be held. The banquet and dance will be a date affair.
