22. Greenhouses.
23. Beef Cattle Barn, experimental feeding and housing.
24. Dairy Barns, dairy husbandry.
25. Sheep Barns.

Career Training Offered In Speech, Radio, Theatre

"Curtain time!"
"On the air!"
"The affirmative rests."
Familiar sounds of theatre, radio and debate from high school days need not end in college. In fact, college opportunities in these fields offer wide experience, training and relaxation for interested students.

Whatever talents you think you have for the three modern arts, take advantage of the possibilities they hold for you—whether you wish to enter any of the three in related professions or seek a pleasant outlet during college days.

Know the thrill of treading the boards in a production of the great drama, "Faust," or a riotous comedy like "Once in a Lifetime." Know the satisfaction that comes from backstage crew work, or publicity, or even ushering at a University Theatre play.

Give yourself the chance to send your voice over the airways in class or "live" radio shows. Once again, find relaxation in the technical work, which also provides authentic learning.

Develop the ability to think on

your feet, to organize an effective argument, to be informed about current issues, to be poised and confident thru practical debate.

Whether you actually decide to take a fling at these activities or not, remember there is much to gain from courses on the subject training which complements all other fields of interest—which will prove invaluable as you approach other tasks.

Howdy, Bruce Kennedy

The man behind the newspaper, the campus' Daily Nebraskan, hails from Basin, Wyo., has a craze for optical illusions, Tri Delt and mountains.

He's Bruce Kennedy, ATO senior in the school of journalism, and a member of Innocents society, Student Council and secretary of Corn Cobs.

Kennedy

Campaigning for safety on the highways and fire prevention in campus houses, Bruce has long been a familiar face in the publication offices. He'll be talking to you in print during the coming semester as editor of the five-times-a-week "Rag."

Students, Administration Comprise NU Community

A community within a city. This is the University of Nebraska.

With almost 8,000 students and 500 instructors and administrative heads, the University of Nebraska is based upon a system of legislative and administrative work within the campus, although its products reach throughout the world.

The people of Nebraska are primarily the governing body of the University, for in them is vested the responsibility of electing the Board of Regents. Responsible to the Board is Chancellor R. G. Gustavson.

WITHIN this community of students, faculty and administration, are the ten colleges of Agriculture, Arts and Sciences, Business Administration, Dentistry, Engineering and Architecture, Law, Medicine, Pharmacy, Teachers college and Graduate college. There are also four schools—the School of Journalism, the School of Fine Arts, the School of Nursing and the Graduate school of Social Work. The Junior division and the Extension division complete the larger units of the organization. These, and the schools are governed by directors.

The deans of all these colleges are important aids to Dr. Gustavson in carrying out the work of the administration.

Instrumental in helping students get started at the University is Dr. G. W. Rosenlof, director of admissions.

Through him you make contacts with the University and are permitted to enter. Registration in all your classes, grade reports, transcripts of credits are all cleared through his offices.

ANOTHER important official interested in the work of incoming students is Dr. Arthur A. Hitchcock, director of the Junior division. Freshman guidance comes mainly through his offices and all students remain in Junior division until they have completed the necessary scholastic requirements.

When you have decided upon your course and have met the requirements satisfactorily, you will then be promoted by the Junior division and may register in the college of your choice.

KEEPING an eye on your academic success as well as social activities and housing are Dean of Student Affairs T. J. Thompson and Dean of Women Marjorie Johnston. They make it possible

for 8,000 students to find living quarters.

The work of coordinating faculties is in the hands of Dr. Carl W. Borgmann, dean of faculties. He is an administrative officer who works closely with the Chancellor.

John F. Selleek, University business manager, handles the monetary business of the campus. It is his office that collects your fees.

Engineers Show Talents in E-Week

We've told you about Ivy Day, Farmer Fair, and other honor days at Nebraska, but now we'll tell you about E-Week.

This is the week that engineering students shine. For three or four days they put on one of the biggest shows on campus.

Have you ever seen a robot talk, or have you heard the latest about electrical engineering? These are just a few of the displays presented.

Displays of all kinds adorn the campus during these days and they all center around engineering feats produced and presented by University engineering students.

It's something you don't want to miss.

Band, Orchestra Rate High at NU

You'll feel the first thrill of belonging to the Cornhusker family when you witness for the first time the university ROTC band play the strains of "Dear Old Nebraska U."

One of the best in the nation, ROTC band has the reputation for one of the best trained and musically talented University bands.

Although the marching band is made up entirely of male students, coeds too participate in the band, and take part in all concerts and appearances other than marching.

When the DOTC band appears at half-time on football fields, fans show their gratitude by presenting them with a big ovation of applause.

IF YOU'RE a musician, and interested in becoming a member of the University ROTC band, you too, may try out during the opening of fall and spring semesters.

The other large instrumental association with the University school of music is the University symphony orchestra. Openings for talented musicians are also awaiting you when you enter Nebraska.

Prof. Donald Lentz is director of the ROTC band and Prof. Emanuel Wisnow directs the University Symphony orchestra.
