Driving requires a few skills. One of them is the skill of parking. There are some drivers on this campus who do not seem to possess this necessary skill.

to be cracked down upon, there might be a decrease in middle-of-the-lot parking. It is a negative method to try and convert these people by the distribution of tickets and it should not have to be the only method.

Five weeks of classes and activities remain in which time AWS, under leadership of Nancy Button, should revise the women's point system. Miss Button's campaign statements advocated the change to a flexible system which would correspond with a coed's grades.

Special Class Programs . . .

Speaking to Dr. Norman Hill's international relations class Monday morning was Richard Robinson of the Institute of Current World Affairs. The speaker outlined a brief history of Turkey and presented what he called the basic beliefs of the "grass roots" people with whom he has studied and worked.

Robinson's talk is a good example of on-the-spot evidence for a class which deals with current problems. These talks should be encouraged in all logical classes. An instructor may deviate from his planned course for a day, but certainly, as experienced in this class and several others which utilize such speakers, the information and resulting knowledge is highly valuable.
