

Calorie Charts, Chinese Art, Elephant Teeth In Museum

Would you like to know how many calories are in a sugar cookie, or fudge or perhaps a dish of vanilla ice cream?

The latest exhibit installed in the Ralph Mueller Gallery of the Health Sciences at the University Museum is the calorie automat.

The display, built by the Cleveland Health Museum and donated by Ralph Mueller of Cleveland, show the number of calories for various foods. Synthetic copies of foods, such as bacon, whole wheat bread, vegetables, macaroni, doughnuts and apple pie, are arranged in the fashion of an automat venter and indicators tell the number of calories in each.

Another new display is the elephant exhibit showing the migration of the Mastodonts to North America 8,000,000 years ago and the migration of the Mammoths

to Nebraska over 500,000 years ago.

Also shown in the display are the teeth of the Mastodonts and Mammoths found in Nebraska. Teeth have been found in 73 of Nebraska's 93 counties.

Another recently-arranged display in the Museum is the collection of Chinese art work.

The arrangement includes the pottery work of China which began as early as 3,000 B. C. It also shows the development of the bronze casting technique whose designs were later copied on porcelain ware.

The pottery display illustrates the influence of the potter and the craft of the bronze worker on each other. Also included in the Chinese

exhibit are embroidered silk garments. Many of the designs on the garments reveal the dragon influences, for the dragon is the traditional symbol of China and the badge of the imperial family. Thus it plays an important role in Chinese arts and crafts.

The Chinese collection was donated to the Museum by Dr's. Emma and Francis F. Tucker, graduates of the University in 1894, who were medical missionaries in China from 1897-1941.

Harold Allen Wins \$1,500 Fellowship

One of the six persons in the nation named to receive \$1,500 fellowships for 10 months of graduate study in Washington, D. C. is Harold L. Allen, assistant extension editor of the University College of Agriculture.

The award winners were announced at a meeting of the 23rd National 4-H Club Camp in Washington.

Allen will take a leave of absence for one year when he will study 4-H and rural youth, federal and farm problems under the U.S. Department of Agriculture.

Courtesy Lincoln State school students attending the University All State Fine Arts Course, study the calorie automat at the University Museum. The display, built by the Cleveland Health Museum and donated by Ralph Mueller of Cleveland, shows the number of calories for various foods.

Concert Ends All State Instruction

The three-week intensive training session of the 1953 University All State ended Wednesday evening for 320 high school students.

A concert on the east lawn of Memorial Stadium with David Foltz, Fine Arts director conducting Noble Cain's "Ode to America" climaxed the All-State's instruction by University professors.

The All State speech choir, conducted by Joyce Iwohn, presented "Wynken, Blynken and Nod."

Preceding the concert, All Staters attended a formal banquet at the Union. Mrs. Oscar Warp of Minden and Dr. Arthur E. Westbrook were recognized for outstanding services to All State.

Brain Twister

Presented below is a series of numbers. This series occurs quite regularly in nature, but with a rather long period.

At some time in his life each reader has seen each number represented. Identify the series in common physical terms.
