The University Board of Regents authorized hiring of the Lincoln architectural firm, Clark and Emerson, to begin planning specifications.

Preliminary plans call for a dormitory which will house 60 women and a dorm to house 120 men.

The cost of the project will be financed by bonds, backed by revenue from the dormitories. No tax funds are involved.

Acting Chancellor John K. Selleck said occupancy of the dormitories is not expected until the fall of 1955 at the earliest.

★ ROTC Program 'Ludicrous For University To Continue Present Policy'

It would be ludicrous for the University to continue the present ROTC policy unless there is a change in the Defense Department policy concerning armed forces spending.

Bruce Nicoll, administrative assistant to the Chancellor, made this statement to The Nebraskan Tuesday when asked about remarks he made to the University Board of Regents Saturday.

Saturday Nicoll said, "We compel students to take two years of military training and

then the Army can't give them commissions when they graduate." Tuesday he added the University would have "to work" out a solution to the problem, but did not suggest there would be any immediate change in the ROTC requirement.

"Any change," he said, "will probably be made on the national level with groups of universities and the Defense Department."

★ Regents Receive Chancellor List

The University Board of Regents announced they have given a list of suggested candidates for chancellor.

C. Y. Thompson of West Point, chairman of the board, emphasized that the information supplied by a special committee represents only a preliminary step in the search for a permanent chancellor.

Red Escapee May Be Beria; Promises Secrets To U.S.

A man who is believed to be Lavrenti P. Beria, the ousted Soviet secret police head, claims he has escaped from the Soviet Union and is now prepared to reveal Communist secrets to President Eisenhower and top American officials.

There is still some doubt in the State Department as to whether this man is really Beria. However the case will be thoroughly checked.

The escapee is now dickering with McCarthy's agents for a safe haven in the United States for himself and three other men said to be "top men from Russia." The man who identified himself as Beria stated that he was willing to talk with President Eisenhower, Vice-president Nixon or McCarthy.

The whereabouts of the escaped man are not known, but it was indicated that he is in a neutral, anti-Communist European country. However he may not be residing in the continent anymore. The governmental sources could not be more explicit about the stranger's hiding place because of the danger it would create for the person involved.

★ Red Lands On NU Base

For the first time a Korean pilot dared to land his Russian-built MIG-17 jet at a United Nations command base Monday, 15 miles northwest of Seoul. As soon as the plane landed American airmen took the pilot and ushered him to headquarters at Seoul for questioning. A spokesman for the airbase disclosed that the pilot "will not be interviewed or identified

★ COL. JAMES H. Workman

professor of military science and tactics, said the Army has done everything it can to insure that ROTC graduates will receive commissions, but cutbacks in military spending have cut down the number of men that can be absorbed into the service.

"The reason men are drafted rather than given commissions," Workman said, "is that regulations state that all men deferred for their years in college must serve on active duty. This eliminates the chance of giving men not needed on active duty reserve commissions."

"The Army could use college graduates on a reserve-commission basis, but cannot give them any but an active-duty commission because of the deferment rule."

Workman explained that men who cannot be commissioned become eligible for the draft because that is the only way they can serve their required period on active duty.

Workman said he expected all the 1954 graduates to be commissioned unless there are unexpected cutbacks in military spending.
