

Theft Of Lockers Prompts Warning

Coeds Taking Phys Ed Advised To Keep Gym Compartments Closed

Theft of approximately \$30 from lockers in Grant Memorial physical education building, has brought a warning and explanation of the locker system from Miss Dudley Ashton, chairman of the department.

"At the beginning of every semester and again at each eight-week term, classes are checked and locker assignments are definitely made. Each girl is asked to secure her locker assignment. We ourselves do not have copies of the combinations of lockers in this building, in order to protect the girls."

"EACH GIRL gets a slip with her combination on it. The only record is the number of the locker assigned to her. Her locker combination is a confidential matter between her and the assignment committee. We ask that every time she uses the gymnasium facilities she lock up all her valuables in order to protect them. It is her responsibility."

The theft occurred Wednesday

between 4 and 5 p.m. while girls, all physical education majors, were in class. Peggy Larson reported \$17 missing, Cynthia Lonsbrough, \$10, and Dorothy Frank, \$2.

According to Miss Ashton, this is the first time a theft in the building has been reported this year. During her two years at the University, only one other such occurrence was reported. That was for a small amount last year.

JUNIOR AND senior women who are no longer taking physical education do not have assigned lockers, although they may be participating in sports activities. Miss Ashton stated that although no formal arrangements have been made, such arrangements could be made at the coed's request.

Matrons are on duty in the locker rooms from 7:30 a.m. to 5 p.m. Girls have been warned to keep lockers locked at all times, but many fail to do so. During tournaments which are held between 5 and 6 p.m., the matron is not on duty and the building is open.

The possibility of that could be eliminated, according to the instructors, if all women in the physical education department would keep their lockers locked at all times.

Art Works Interpreted By Worth

By GLENN BERRY Staff Writer

The work of art is contained within itself and the intent of the artist does not have to be discovered in order to enjoy the painting, Peter J. Worth, acting chairman of the art department said Sunday.

His lecture, "A Matter of Interpretation," was the fourth in a series of lectures about the Nebraska Art Association's 64th annual exhibition.

IN ILLUSTRATING his topic, Worth chose Ben Nicholson's "Two Forms, Version 3." Although this oil is an architectural abstraction, he said, it conveys definite emotions to the viewer through the intrinsic or "iconic" values of form and color.

"A block of red, he said, not only represents 'brightness,' but suggests a certain warmth and vivaciousness. A trumpet is used for military rallies because of the tonic effect of its tone, Worth added.

IN THE SAME WAY, a certain color may be employed to convey a definite emotional effect, he said. Worth pointed out that iconic meanings are also present in gestures, postures and the arrangement of forms. While studying the order and regularity of "Two Forms" the viewer is instinctively impressed with the calmness embodied in the painting.

ALTHOUGH THE presentation of forms may be simple, he said, it often represents complex emotions.

The question and answer session following Worth's lecture centered about Kline's controversial "Painting." Many appeared to be repelled by the painting. Worth compared its force to the impact of two skiers in collision. The next lecture in the series will be presented by Wilbur Gaffney, assistant professor, of English, Tuesday. His topic will be "Art as Stimulus."

Home Ec Group Hears Speech By Sorenson

International barriers must be removed so that products and ideas can be moved quickly, Dr. Frank E. Sorenson, chairman of the department of educational services, told the Conference of Home Economists Saturday.

He spoke at the closing session of the conference. Theme was, "The Investment in Humanity." Janet Lindquist, University junior, was elected president of the College Club division of the Nebraska Home Economics Association. Jo Ann Heilmann, sophomore, was elected secretary-treasurer.

Home economists and home economics students from all over the state attended the annual meeting of Nebraska Home Economics and Dietetics Association, held as part of the conference.

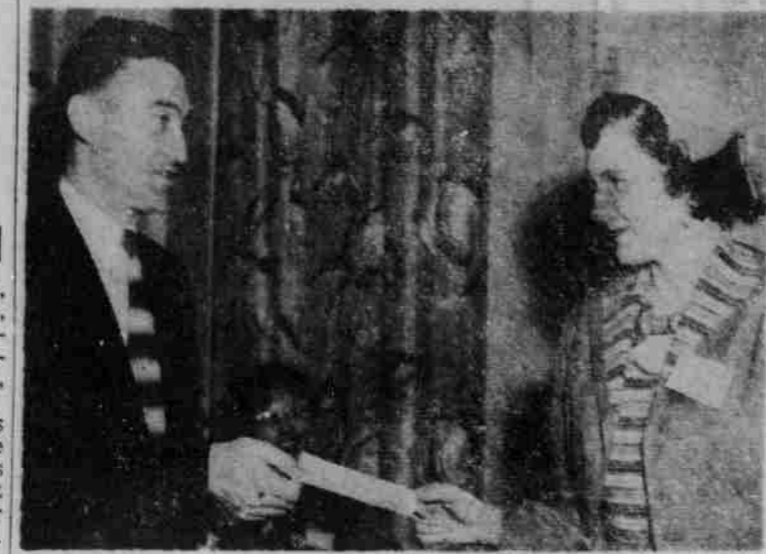

University Rifle Team Takes Second Place In Tournament

University riflemen took second place in team competition for the Invitational Gallery Championship held Saturday.

Coe College of Cedar Rapids won the competition with a score of 1,394 points out of a possible 1,500. The University scored 1,383, and the third place winner, Omaha University, tallied 1,381.

Winners were presented with a 23-inch trophy and five gold medals provided by University ROTC students, according to Capt. A. L. Belknap.

MEMBERS OF THE University team are Paul Jordan, George Medley, Thomas McAndrews, Don

Dietetics Award

Stephanie Allen, University intern in dietetics from Vern Watkins of DuBois. She received the award at the Conference of Nebraska Home Economists in Lincoln Friday.

Feeney Chosen To Head Newest NU Department

Biochemistry, Nutrition Created

Dr. Robert E. Feeney has been named chairman of the recently formed Department of Biochemistry and Nutrition. Feeney came to Nebraska after seven years' work with the Western Regional Research Laboratory of the United States Department of Agriculture. He obtained his Ph.D. degree from the University of Wisconsin, and for two years was in the faculty of the Harvard Medical School. During World War II he served with the Army as a Food and Nutritional officer.

THE DEPARTMENT of Biochemistry and Nutrition was formed by combining the Department of Agricultural Chemistry and the Department of Chemistry. Functions of these departments will be continued by the new department. Biochemistry, literally life chemistry, has become so vital to modern agricultural science that it is used in solving nearly every research problem. For example, biochemistry is employed in basic studies of nutrition, in the work of antibiotics, insecticides and weed killers.

A MAJOR function of the new department will be to supply basic information to the other departments of the Experiment Station. New research in swine diseases, grass tetany in cattle and internal

parasites of livestock is being initiated by the department of Animal Pathology and Hygiene. Other major areas of study by the department now include listeriosis and bovine hyperkeratosis.

TO IMPROVE the animal disease research program, three new staff members have been appointed. They are Dr. Alvin B. Hoerlein, animal pathologist; Dr. Connell L. Marsh, biochemist, and Dr. George W. Kelley, parasitologist.

Dr. Marsh and Dr. Kelley both received graduate degrees from the University of Nebraska. Dr. Hoerlein received training in veterinary medicine at Colorado A and M College and additional training at Cornell University.

"TO FIND answers to animal disease problems, we need cooperative work by men trained in different branches of science," Dr. Carl Olson Jr., department chairman, said. "Our new staff members form a research group that can use several avenues of approach in solving our problems and can be mutually helpful to one another."

Marvel L. Baker, associate director of the Nebraska Experiment Station Quarterly, stated that this new department should serve as a catalyst for improved research throughout much of the Station. The increase in personnel and support for animal disease investigation will help us meet an important problem of better understanding and controlling livestock diseases.

DUE ATTENTION is being given to studies of principles, sometimes referred to as "basic research," as well as to studies that have immediate application to farm, ranch and home problems. Ultimate progress depends upon knowledge of basic principles.

Phys Ed Fraternity Elects Wear President

Dr. C. L. Wear, assistant professor of physical education, has been elected national president of Phi Epsilon Kappa, professional fraternity for men majoring in physical education. Dr. Wear is faculty adviser for the Nebraska chapter. He will go to New York in March for installation ceremonies.

Moot Court

Four Law Students To Debate Supreme Court To Hear Cases

Finalists in the Allan Moot Court competition will argue their cases in the Nebraska Supreme Court chambers at the state capitol March 25.

Those in the final round are Janice Lindquist and Eleanor Knoll and Richard Hanson and Kenneth Legg. With the exception of Hanson, they are all in their fourth year of Law College. Hanson is a third year student.

This is the first time a women's team has competed in the final round, according to Gerry Fellman, publicity chairman for the competition.

Miss Knoll was a winner in the national moot court competition held in Washington this winter.

The final round will be judged by three Nebraska Supreme Court judges. Winners will have their names inscribed on a plaque in the University Law College.

Centennial Show Opens On Monday

"Opportunities Unlimited," the 1954 Centennial Vocations Exposition, will be held at the University of Omaha Fieldhouse through Friday.

Designed to supplement vocational guidance programs, the exposition will feature 125 exhibits, informal talks with business representatives, demonstrations and talks on various careers.

The exhibit hall will be open from 10 a.m. to 6 p.m., and from 7 p.m. to 9 p.m. the entire week.

Missouri Valley Advertising Exhibit Winners Announced By Schwindler

The Ayres Advertising Agency of Lincoln and the Bradley Lane Advertising Agency of Denver are the winners of the Missouri Valley Advertising Exhibit. The exhibit was shown in Morrill Hall in honor of the 60th anniversary of journalism education at the University.

Dr. William F. Swindler, director of the School of Journalism, announced that the winners were judged on six categories from a field of 75 entries.

THE AGENCY swept the contest-winning first place in newspaper advertising, layout, advertising color art, single sheet mailing pieces and booklet mailing pieces.

The Bradley Lane Agency won first place in magazine advertising layouts and posters. Gamma Alpha Chi, national advertising honorary for women, sponsored the exhibit.

Extension Division

Correspondence Courses Discussed At Meeting

Unusual? Yes! Such was the meeting held in the offices of the Extension Division last month.

Why? Because it was the first meeting of its kind in which all correspondence instructors representing the 17 departments of college instruction in the Extension Division were present.

When a University wishes to offer its college courses to those unable to attend regular classes, it does so through correspondence courses. These courses are handled through the Extension Division. Seventeen departments in the College of Agriculture, Arts and Science, Business Administration, Engineering and Teachers offer the courses.

LAST YEAR these departments, through the Extension Division, "taught by remote control" 3,000 students over 40,000 lessons. Forty-six instructors work for the various departments in conjunction with the Extension Division.

The program of the meeting centered around a panel discussion. Dr. Gayle B. Childs, specialist in high school and college correspondence instruction; Mrs. Grace Griffin, associate editor of college correspondence courses, and Miss Evelyn Splichal, supervisor of college correspondence instruction, presented some of the problems that exist in correspondence study.

Dr. Childs discussed correspondence study and what it means. He pointed out that correspondence study differs somewhat from other extension instruction in that it is an individual rather than a group device. It may thus be used in a situation where one person, or at the most a very limited number of people, want instruction in a particular

subject—where the establishment of a class would not be feasible.

THE POSITION of the departments offering correspondence study was reviewed by Dr. Childs. The department is the unit of organization through which courses are offered. It is responsible for providing teaching materials and instruction. The job of the Extension Division is to provide the administrative facilities necessary to make this material and instruction effective and available to those who need it.

The determination of course content is the responsibility of the department. Other responsibilities include approval of course writers and teachers, and the granting of credit to those who successfully complete their correspondence work.

MISS SPLICHAL concluded by explaining some of the things which Extension Division does to help instruction in college correspondence study. She listed the mailing of the Extension Reporter, a news sheet, to students; the provision of advisor's slips for guidance to matriculated students at the University who study through correspondence, and the furnishing of kits and reference books.

A question and answer session concluded the meeting. Plans are being made for a future similar meeting which would further facilitate discussion in an attempt to improve the University's college correspondence study program.

Two Faculty Members To Receive Recognition

Two members of the Agriculture Extension staff will be honored at a recognition dinner Thursday.

Dominic Gross, extension agronomist from 1921 to 1953, and Willard E. Lyness, associate agronomist who will retire this spring after 33 years of service, will be the guests of honor. The dinner will be held in the Union at 6:30 p.m.

Imported briefcases. Finest craftsmanship. Leather that will last a lifetime. Ideal for student, professor or businessman. Call: 7-1453.

Physics Professor Perfects Unusual Low Cost Hi-Fi Set

Dr. Donald Moore, acting chairman of the department of physics, has perfected a unique design of folded exponential horn for loud speakers.

Explaining how he came to work on this project, Dr. Moore said, "I have always been interested in good music, and lacking the money to purchase high fidelity record playing equipment, I decided to work on it myself."

LIKE COMMERCIALLY marketed hi-fi equipment, his horn gives a brilliantly faithful reproduction of the recorded tone. Dr. Moore said that while equipment equal or possibly superior to his can be purchased, it sells

for approximately \$800. He estimated his model cost him around \$40.

Robert Lee of the photo-reproduction department gave him what Dr. Moore termed aesthetic assistance with the project. The reason for this, he continued was that "my wife said that the next time I made something, I had to make it look like a piece of furniture instead of a packing case." The cabinet which they designed to house the horn follows lines of modern art.

ADDITIONAL ASSISTANCE was furnished by Neil Munson, acting chairman of the department of practical arts. He helped with the woodworking which was done in the basement as a part of a talk on high fidelity record playing equipment at a dinner meeting of the Unitarian Layman's League Tuesday.

NU Alum Wins Purchase Prize At Art Show

Former University student, Lois Frederick won a purchase prize for her painting, "Autumn Eve," at the fourth annual Mid-America Artists Association exhibit now in progress in Kansas City.

Miss Frederick has been studying in France on a Fulbright scholarship since she graduated from the University in 1952.

SIX OTHER entries from the University, including one piece of sculpture are included in the show. They are:

LeRoy K. Burkett, assistant professor of art, oil and lacquer painting, "Figure in Flight"; Rudy Pozzatti, instructor of art, oil painting, "Roman Fragment," painted during his recent year in Italy.

Peter J. Worth, acting chairman of the art department, ebony sculpture, "Four Little Solids." Students whose entries were included are: Bruce Conner, oil, "Pariah," and Carol Haerer, oil, "Trees." These were among 162 entries from six midwestern states which were judged by ballot of gallery visitors.

Five Authors Publish Works In Periodicals

Five people associated with the University have had articles published in recent periodicals.

Roberta White, graduate student, Dr. Carl E. Georgi, professor of bacteriology, and Dr. Walter Miltzer, dean of Arts and Sciences, are co-authors of "Heat Studies on a Thermophilic Bacteriophage." The article appears in the January issue of Proceedings of the Society for Experimental Biology and Medicine.

JULIUS SAMUELS, assistant professor in the Graduate School of Social Works, is the author of "Modern Recreational Practice for a Modern Hospital," which appears in the February issue of the Journal of the National Association of Recreational Therapists.

Dr. J. E. Weaver, professor emeritus of plant ecology, is the author of an article in the January issue of the American Journal of Botany. The article is entitled "A Seventeen-Year Study of Plant Ecology."

Religious Council Plans Meet For Wednesday

A meeting of the city campus Religious Council will be held Wednesday in Parlor Z of the Union.

The meeting will begin with dinner which will be served at 6 p.m. Dinner tickets are \$1.00 and all members must attend.

Win a Chevrolet Corvette

City Club shoe contest!

NOTHING TO BUY—ENTER NOW. SIMPLE RULES OF THE CONTEST:

1. In 25 words or less tell why "I like City Club Shoes . . ."
2. Send in as many entries as you wish, but each must be on a separate piece of paper. Print your name and address clearly.
3. It is not necessary to use an Official entry blank but handy entry blanks may be procured at your City Club Dealer (they carry an extra advantage—see note above).
4. Mail all entries to Peters Shoe Company, Dept. C3, Box 5995, Chicago 77, Illinois.
5. Contest starts March 15—ends May 15, 1954. All entries postmarked before midnight May 15 and received by May 22 eligible!
6. Entries will be judged on originality, aptness and sincerity by the Reuben H. Donnelly Corp. Judges' decision final. Duplicate prizes in case of ties. No entries returned. Entries and ideas therein become property of Peters Shoe Company to be used as it sees fit. Winners will be notified by mail.
7. Contest open to all residents of continental United States and Canada. Contest not open to employees of Peters Shoe Co., of City Club Dealers, of their Advertising Agency, nor their families.

SEE your City Club dealer. Or for name of your nearest dealer, write: Peters Shoe Company, St. Louis 3, Missouri

IT'S ALL A MATTER OF TASTE

When you come right down to it, you smoke for one simple reason . . . enjoyment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, L.S./M.F.T.—Lucky Strike means fine tobacco . . . light, mild, good-tasting tobacco. Second, Luckies are actually made better to taste better . . . always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

COLLEGE SMOKERS PREFER LUCKIES
A comprehensive survey—based on 31,000 student interviews and supervised by college professors—shows that smokers in colleges from coast to coast prefer Luckies to all other brands! The No. 1 reason: Luckies' better taste!

It's not surprising Luckies lead in college circulation—These better-tasting cigarettes Are tops across the nation!
Roger Maserang
Southern Illinois Univ.

In cigarettes that always please, The flavor must be right, So students wise choose Lucky Strike, The tops in taste delight!
Robert A. Rutherford
Long Beach State College

If you try hard to write a rhyme For Lucky Strike to use, It really helps if you would taste A lucky while you muse!
Rena Mogil
Brooklyn College

LUCKIES TASTE BETTER
CLEANER, FRESHER, SMOOTHER!
