

'Your Investments'

Bank Official Stresses Budgeting For Security

A sound budget is the backbone of family security, Linus Southwick, vice-president of the First National Bank, said Tuesday at the first discussion of a series entitled "Your Investments: Finances, Family and Future."

Moderator for the first three discussion sessions is Robert McNutt, practicing lawyer and Nebraska legislator. Southwick spoke on the first topic, "Personal Finances."

FINANCIAL MANAGEMENT, he said, depends on diagnosis of present financial status and, planning for the future. He stressed that it was important that all members of the family over ten years of age should be included in both diagnosis and planning.

Budgeting, Southwick said, helps plan the families' expenditures and should be based on such questions as: how old the family members are, the size of the family, the needs and wishes of the family, where they live and what kind of entertainment they enjoy.

DECIDING HOW to spend money is not only a purely financial matter, he said, but determines the family's way of life.

He urged families to live within their means, and to make long-range plans setting sums aside before families begin spending.

HE OUTLINED problems of obtaining loans from banks. He urged all people to meet and become a friend with their banker.

The discussion session ended with a question and answer period. Supplementary material including a budget book, a booklet on money management and a safe deposit box record folder were handed out to each person.

Dale C. Tinstman, assistant manager of the investment department of the First Trust Co., will speak at the next discussion on "Investments." The series, sponsored by the Union, are held in Union Paro ABC at 4-p.m. on Tuesday.

Nine Included In Art Exhibit Opening Friday

Works of nine American painters of this area will be included in a special summer exhibition opening Friday at the University Art Galleries and continuing through Aug. 29.

The nine painters are: J. Franklin Sampson of Edmore, N. D.; Robert Huck of Aberdeen, S. D.; Karl Mattern of Des Moines, Ia.; Tom Cavanaugh of Kansas City, Mo.; R. J. Hunt of Topeka, Kan.; Robert D. Ray of Denver Colo.; Ilya Bolotowsky of Laramie, Wyo.; Fores Whiteside of Oberlin, O., and Warrington Colescott of Madison, Wis.

Both Cavanaugh and Ray were purchase prize winners at the Joslyn Art Museum's exhibition, "The Midwest," this year. Mattern and Whiteside have exhibited in Nebraska Art Association showings. The other five are exhibiting for the first time in Morrill Hall Galleries.

Selections from the University's permanent collections and works of American sculptors from the Frank M. Hall collection will also be on view.

Soil, Crops Day Planned For Friday

Nebraska farmers will receive information on plant production at the Soils and Crops Day to be held Friday at the College of Agriculture.

The day officially opens at 9:45 a. m. in the Agronomy Building auditorium when four well-known speakers will discuss common and current problems of the farmer.

DR. ROSCOE HILL, chairman of the entomology department, will discuss insect control. Melvin McCarty, USDA agronomist at the University, will speak on the renovation of pastures. "Crops Beneath the Soil" is the topic of Dr. Tom McCalla, agronomist. Dr. M. D. Weldon, extension agronomist, will stress the use of fertilizer.

The afternoon program includes a tour of the Agronomy Farm to observe corn, wheat, barley and oats plots.

Two Baseball Shorts Planned For Thursday

Baseball will be featured in sports shorts Thursday in the Union main lounge. "Baseball Today" and "The Umpire in Baseball" will be shown.

Last Thursday's sports shorts were canceled because of the McCarthy hearings. The pictures will be held this week during the noon recess of the hearings.

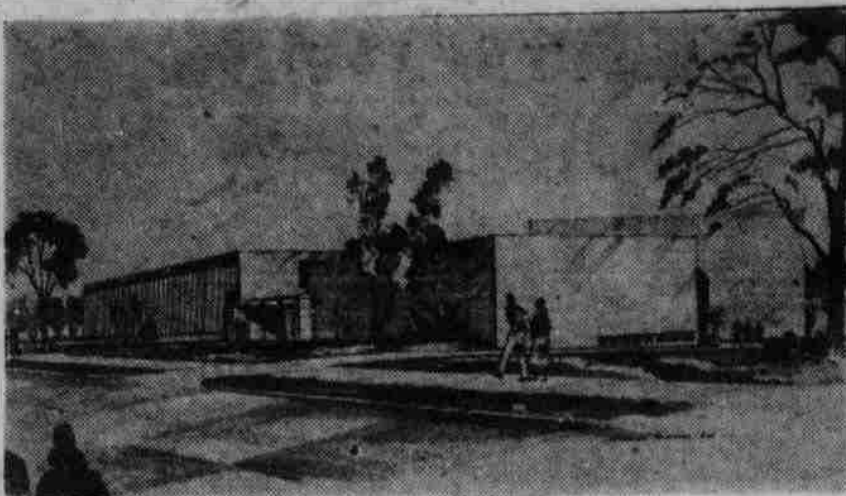

The series are sponsored by the Union and the physical education department.

NU Swimming Program For Women Announced

The physical education department is sponsoring a recreational swimming program for women enrolled in the University summer session.

Women may swim from 4 to 5 p.m. in the coliseum pool Monday through Friday, until July 18. Swimmers must bring swim permits from the Student Health and bathing caps.

A ten-cent fee will be charged for towels. Swimming suits will be provided by the physical education department.

New High School

This architectural drawing of the new \$1,000,000 Teachers College High School shows the three units: classroom unit at left, auditorium unit at right foreground and gymnasium unit, right background. The building will face south on 14th and Vine Sts.

New School To Enlarge NU Teaching Program

(Editor's Note: This is the second in a series of articles concerning the University's ten-year building program.)

Construction started only two weeks ago on the new million-dollar Teachers College High School, one of the University's most recent projects to be built with funds from the ten-year Institutional Building Levy.

The new school will replace the present high school facing S Street on 14th. Two grades, seventh and eighth, will be added to the school's classes and estimated enrollment of the school will be 300 students.

THE BUILDING will enable Teachers College to enlarge the present student teaching program and to institute an observation program for Teachers College students prior to their class in practice teaching.

Norman F. Thorpe, principal of Teachers College High School and director of teachers training, pointed out that in this way practically all of the 600 Teachers College students would come in contact with the school during their college career, either through practice teaching or observation.

Thorpe also said that high school students, who are picked by applications of their parents, are selected to form as representative a high school enrollment as possible.

THE SCHOOL, which is being built on the women's athletic field on Vine St., will contain three units—classroom, auditorium and gymnasium.

Textbook Exhibit To Close Friday

The annual textbook and audio-visual exhibit on display in Love Library will be concluded Friday.

The exhibit, sponsored by the Textbook Publishers Association, contains textbooks for elementary and secondary classes published by nearly 40 companies in all parts of the United States.

The purpose of the exhibit, according to F. B. Shrader, secretary of Textbook Publishers, is to aid teachers and others attending summer school to choose books for next fall.

The display also shows samples of audio-visual aid for classroom use.

All-State Fine Arts Students To Present Public Programs

A series of programs in art, drama and music are being presented to the general public by students attending the University All-State High School Fine Arts Course.

The Clinic, sponsored by the School of Fine Arts, offers courses in the music, art and speech departments to some 227 high school students.

Approximately 200 members of the All-State Band, Orchestra and Chorus participated in an open rehearsal Sunday. David Foltz, Donald Lentz and Emanuel Wishnow, University faculty members, directed the group.

STUDENT RECITALS and student reading hours, under the direction of the music and speech departments, are being presented throughout the All-State course. These programs feature vocal and instrumental work by music students and choral readings, plays, dramatic monologues and pantomimes by speech students. The programs are open to the general public free of charge.

High school art work will be displayed at the All-State Student Art Exhibit which opens in the Union lobby Friday at 7:30 p.m. Drawings, paintings and sketches by 17 students will be shown in the exhibit.

INSTRUMENTAL AND vocal groups will be featured in an Ensemble Concert at 3 p.m. Sunday in the Union ballroom. Approx-

mately one hundred students will participate in the program.

The WHO Song Fellows will be the guest artists at a choral concert at 8 p.m. Wednesday in the Union ballroom. The complete All-State Chorus, under the direction of David Foltz, will take part in the program.

The classroom unit alone has three floors, but the ground floor will be concealed at the front because of the slope of the land.

The main entrance of the school leads into the second floor, where the gymnasium, auditorium, library, administrative offices and classrooms are located.

The gymnasium will contain folding bleachers and a basketball court 50 by 84 feet. When the bleachers are folded back, the space can be separated by a curtain into two courts for boys and girls.

The auditorium will contain seating for 360 people. The stage will include trap doors for transporting stage props to and from ground floor supply rooms.

THE SECOND floor will also contain offices for supervisors and a student activities room. The activities room can be separated into three smaller rooms for club meetings by folding doors or can be left as one large room for parties and dances.

On the ground floor will be located storage rooms, home-making classrooms, woodwork and metal shops, and rehearsal rooms for music groups. The cafeteria and kitchen along with dressing rooms for boys' gym classes, and dressing space for theatrical and music programs, will also be on the ground floor.

The Teachers College High School will be finished and ready for use either first or second semester of the 1955-56 school year.

Pi Lambda Thetas Plan Luncheon For Tuesday

A luncheon for members of Pi Lambda Theta, women's teaching honorary, will be held Tuesday at 12 noon in Ellen Smith Hall.

Reservations may be called in until Monday morning to either Mrs. Lois Williams, Ext. 3139, or Wilma Kramer, Ext. 3130. Tickets are 60 cents.

Mayer Leads Mathematics Conference

A conference on the teaching of mathematics, led by Dr. John R. Mayer, professor of mathematics and education and chairman of the department of education at the University of Wisconsin, began Monday and will last until Friday.

Mayer is past president of the National Council of Teachers of Mathematics. He is listed in American Men of Science and Who's Who in American Education, and has served as editor of The Mathematics Teacher.

DURING EACH morning session of the conference, Mayer will speak on some important aspect of the secondary school mathematics program. A general discussion and small group discussions will follow each speech.

Afternoon activities include visits to other University departments concerned with mathematics. Visits will also be made to Lincoln business firms that make extensive use of mathematical abilities.

AS A highlight of the conference, a practical demonstration of the 604 Electronic Calculator was given Wednesday afternoon. A tour of the Lincoln Air Base is scheduled for Thursday afternoon and films on the study of mathematics will be shown Friday afternoon.

The conference, which is sponsored by the University department of secondary education, is open to all students enrolled in summer school.
