

# The 'Fairer' Side Cast Says Farewell Behind Iron Bars

By PHYL CAST  
Sports Staff Writer

This is kind of a farewell to arms type thing. You see, my cheery commentary will be lack-

ing next week as we will be at the AFCW Convention in Northampton, Mass. After vacation my successor, Sarol Wiltse will add her talents to this space.

The new ping pong champion is Sue Detwiler, Delta Gamma; second place went to Caroline Johnson, Love Hall, and third place went to Carol Wolf, Residence Halls for women.

Because of Convention, the Co-Rec schedule for next week has been moved up to this week. Those teams who are playing tonight have been contacted. Those teams playing tomorrow night are: ALPHA PHI No. 2 and DELTA UPSILON, KAPPA ALPHA No. 3 and DELTA TAU DELTA, GAMMA PHI BETA No. 2 and PHI DELTA THETA, WILSON HALL No. 1 and CORNHUSKER COOP, DELTA GAMMA and BETA THETA PI, ALPHA OMI-CRON PI and ALPHA GAMMA RHO.

# Nebraskan Lists 1955 'B' Stars All Star B Team

FIRST TEAM	POS.	SECOND TEAM
Bob Ebers—ATO's	F	Skip Hove—Delta
John Fagan—Beta's	F	John Gray—Sig Chi's
Bob Benter—Phi Gamma	C	Jim Jacques—Delta's
Loren Peterson—C	G	Dick Kleiber—ATO's
Jack Braley—Phi Delta	G	Phil Hart—Phi Gamma

RONORABLE MENTION: Don Becker, Phi Delta Theta; Don Hefferman, Don Lundin, Canfield B; Al Dagget, Phi Gamma Delta; Wayne Gunderson, Alpha Tau Omega; Warren Seger, Manatt B; Sam Olsen, Delta Tau Delta; Joe Wachter, Beta Theta Pi; and Ivan Paulson, Hitchcock B.

By BRUCE BRUGMANN  
Sports Editor

A tall trio in the front court and a pair of rugged guards feature the Nebraska All Star B team selected by the intramural managers of the various B quints last week. The All Star B team is the first of the all star aggregations that will be announced on the Nebraskan sports page, the final outfit to be the All-University All Star teams next week.

### Forward Slots

Bracketed at the forward slots are Bob Ebers, steady jumping jack of the Alpha Tau Omega B champs, and John Fagan, 6 foot jump shot artist, who paced the Beta Theta Pi quintet to an unblemished season in League 6-B. Competition for the pivot position was keen with the nod going to Bob Benter, towering Phi Gamma center, over Jim Jacques, the 6'6" Beta mainstay.

Rounding out the squad are Jack Braley, versatile Phi Delta cager, and Loren Peterson, sparking up Canfield B's All University squad. Benter and Ebers harvested all but one vote of the IM ballots submitted.

The second squad boasted almost as much height as the first team with Delt forward Skip Hove, Jacques, the Sigma Chi's 6 foot 5 1/2 foot John Gray and the Tau's 6 foot 4 inch Dick Kleiber supplying the stratospheric punch. Phil Hart, diminutive Phi Gamma guard and set shot specialist, is almost overshadowed amidst the big boys. Ebers, a fine rebounder and

playmaker, scored consistently throughout the season to pace the ATO scoring machine. An excellent defensive player, Beta stalwart Fagan added an array of jumpshots to spark a 10-0 slate. Loren Peterson led a fine Canfield team through a successful campaigning dormitory competition.

Big Bob Benter started slowly in IM basketball play but found himself as the season progressed and slammed in 25 points against the ATO's in a semifinal encounter. Jack Braley, a dependable rebounder and defensive player, was the Jack of all trades in the Phi 5-5 win skein.

### Hove, Jacques Progress

Skip Hove and Jim Jacques both began throwing the basketball through the hoop more regularly as the season progressed, and Dick Kleiber, on the disabled shelf toward the end of the campaign, turned in fine all round performances for the Taus. John Gray, employing an assortment of soft hooks and Phil Hart a lethal pocket-sized backliner, fell out the second team aggregation.

Pushing for first and second spots Don Hefferman, Al Dagget, Wayne Gunderson, Don Lundin, Warren Seger, Sam Olson, Joe Wachter, George Barlow, Walt Blore, Jim Shook and Ivan Paulsen.

### Correction

Howard Vann and Morse Weisgart were initiated into Alpha Epsilon Rho Monday. Tuesday's Nebraskan reported they were pledged.

# Calvin Bentz Wins Nebraskan Award For 'Star Of The Week'

By FRED DALY  
Sports Staff Writer

Calvin Bentz, four-year letterman on Coach Hollie Lepley's tank team, has been selected as the Nebraskan's sixth 'Star of the Week' for his outstanding performance in the Midwest AAU Swimming Meet last week.

Bentz, a consistent performer and high scorer all his four years on the varsity, won the 150-yard backstroke and the 440-yard free style, and took second in the 220-yard free style.

### Medley Relay

He later teamed with Huskers Tom Houchen, Gordon Peterson and Dick Hli'ek to take the 400-yard medley relay.

A graduate of Hastings High School, the muscular Bentz has continually ranked high in scoring in University swimming meets. In his junior year he scored almost half the total points scored by the team.

Coach Lepley said that the versatile Bentz is "very cooperative" and will swim any event he is asked to. Starting out in the distance events, he gradually worked into backstroke, shorter free style races and the individual medley, an event indicative of a swimmer's versatility.

In addition to swimming in high school, he played guard on the Hastings High grid squad. He has also been active during the summer teaching swimming and lifesaving and helping younger fin sport hopefuls in developing their swimming strokes.

### Honorable Mention

Two honorable mentions have been awarded this week to Nebraska athletes giving outstanding performances in their fields.

The first is to Danny Fogel, senior member of the gymnastic squad

who won first place in the Midwest AAU Gymnastics Meet in Beatrice Saturday.

The second is to Tom Houchen, another swimmer. A sophomore

breaststroker Houchen won the 220-yard breaststroke, the 100-yard butterfly and the 400-yard individual medley in the Midwest AAU Swimming Meet.

# Sad Sam's Sports Scratchin's

By SAM JENSEN

Sports Day at the University an occasion which usually attracts a great deal of "on the basis of," "if he can continue his present pace," "things don't look too bright for the Husker mentor," and "prospects are very good for a successful season" comments.

How much can be accurately foretold by results of the annual All Sports Day activity is merely a large and variable question mark. But the value of the day is not questioned.

The University's plant and athletic program are placed on display, usually favorably, and if the weather is pleasant the proverbial good time is had by all.

### king football . . .

Most sports fans eagerly watch King Football and pray for an indication of a successful season for next year. Any hint of another Bob Reynolds is capitalized on by sports writers and played to the hilt. Underclassmen showing any promise are especially played up and strangely enough with some accuracy of prediction.

Standouts during the last three grid All Sports Day contests have been Bob Smith, Rex Fischer and Don Comstock.

### smith, fischer, comstock shine . . .

Last year, Comstock led the so called second unit to a 25-14 victory over the Red team. The Scottsbluff sophomore is almost an unquestioned starter next fall and showed spots of greatness during the past season. He scored the only Husker touchdown in the Orange Bowl.

Two years ago it was Fischer's day. The junior from Oakland has suffered setbacks from injuries and other sources and has not yet had a chance to show his suspected potential. He is now vying for quarterback spot on the first team.

Smith, who shared the football spotlight with John Bordogna three years ago, was one of the leading Husker contenders for All Big Seven honors and is one of the few four year lettermen on the campus. The Grand Island Senior put in several outstanding performances this year against the Scarlet's toughest competition.

So if past performance and precedent mean anything, keep your eye on that underclassman whose names appears in the headlines Sunday morning. He may be destined to be a Husker grid "Great."

WHAT'S THIS? For solution see paragraph below.  
Droodle suggested by Norman Gerber, C. C. N. Y.

HAVE A LITTLE FUN when you smoke. Enjoy yourself. Give yourself the pleasure of a better-tasting Lucky Strike. The enthusiasm often inspired by Luckies' famous better taste is illustrated in the Droodle (right) titled: Alphabet soup for Lucky smoker. So why stew over what cigarette to smoke? Luckies' taste is letter-perfect. After all, L.S./M.F.T.—Lucky Strike means fine tobacco. Then, that tobacco is toasted to taste better. "It's Toasted"—the famous Lucky Strike process—tones up Luckies' light, mild, good-tasting tobacco

to make it taste even better . . . cleaner, fresher, smoother. When you light up, enjoy the better-tasting cigarette . . . Lucky Strike.

**STUDENTS! EARN \$25!**

Lucky Droodles\* are pouring in! Where are yours? We pay \$25 for all we use, and for many we don't use. So, send every original Droodle in your noodle, with its descriptive title, to Lucky Droodle, P. O. Box 67, New York 46, N. Y.

# HONEYWELL OFFERS DIVERSIFIED OPPORTUNITIES

The opportunities for engineers in the automatic control field are unique in their variety and in the insight provided into all of the industries of today's modern world.

The development and manufacture of tiny transistors for electronic control . . . the design and manufacture of quality electronic photo flash units . . . the challenge of finding fish with underwater sonar . . . of providing automatic flight for supersonic jets . . . temperature controls for today's modern home . . . for atomic piles . . .

These are a few of the fields in which Honeywell's several divisions are engaged, providing automatic controls for industry and the home

These controls are made possible by the creative imagination of highly trained engineers working with the very latest research and test facilities.

With twelve separate divisions located throughout the United States and with factories in Canada, England and Europe, Honeywell offers unlimited opportunities in a variety of challenging fields. Based on diversification and balance between normal industry and defense activities, Honeywell will continue to grow and expand because automatic control and instrumentation are so important to the world's progress.

That is why we are always looking for men with the ideas and imagination and the ambition to grow with us. In addition to full time engineering and research employment we offer a Cooperative Work Study program, a Summer Student Work Study program and Graduate Fellowships. If you are interested in a career in a vital, varied and diversified industry, see our representative, Mr. Hilding Ekstrom. He will be on your campus for interviews March 24. Make arrangements with the Dean of Student Affairs, J. P. Gilbert.
