

Injuries Slow Husker Hopes For Colorado

By BOY WIRZ
Sports Staff Writer

Nebraska's Cornhuskers, currently tied with Oklahoma for first place in the Big Seven race with identical 4-0 conference marks, will be trying to get above the .500 mark this Saturday for the first time this season. The Huskers tackle Colorado at Memorial Stadium in the homecoming day game and will be trying to keep their conference slate clean.

Rex Fisher, senior halfback from Oakland, has been chosen by coach Bill Glassford as game captain. Glassford stated, "Rex has been a great contribution to the team and deserves the honor of being captain for the homecoming game." He currently is second in rushing in the conference and ranks eighteenth in the nation with 500 net yards gained in 105 tries.

Both teams will be minus some top performers who will be sidelined by injuries.

The number one Colorado man, senior halfback Homer Jenkins, will be out of action.

Sylvester Harris, Nebraska halfback, number one replacement for Fischer, will miss the game because of a dislocated shoulder. He probably will also sit out the game against Oklahoma University Nov. 19 at Lincoln.

Lyle Martin, who has seen very little action, Frank Nappi who hasn't seen any action so far this season and Gene Sandage are ready to replace Harris.

Harry Johnson may see action at both halfback positions as he did last Saturday at Iowa State.

Fullback John Edwards may be ready for the game but is listed as a doubtful starter by Glassford. He also was injured at Ames.

End George Mink who has seen very little action this season has

Flanker LeRoy Butherus is still listed as doubtful and Jim Murphy guard and Marlin Hilding are definitely out. Hilding is out for the season.

sive scrimmage working against the Colorado single wing attack. Some of the top men on the freshman squad ran Colorado plays against the varsity. Work will be of the same order for the remainder of the week.

Glassford said, "It is necessary to set up completely new defensive formations to face the single wing attack."

The starting lineup will be about the same as last week except for the fullback spot. George Cifra probably will move back to the starting lineup as John Edwards,

last weeks starting fullback, is

This will be the fourteenth game between the two teams. The Huskers have won seven, lost five and tied one but haven't been able to win on the home field since 1949. Last year Nebraska upset Colorado 20 to 6 at Boulder.

Oklahoma's Sooners, who would sooner be at the top of the heap in their gridiron competition, have achieved just that this week as they take over as the number one team in the Associated Press poll. The 55 edition of Wilkinson's wreckers seem to be following the script they used for a best seller in 1950 when they annexed the national championship in much the same manner.

Oklahoma sheds some light on the Big Seven as they seek to protect their 26 game skein in conference play. Their overall winning streak stretches into the fifties. As Maryland is in second position after being the top ranked eleven for several weeks, the Orange Bowl game should draw top interest this year. Due to the pact inked by the two conferences, it will be Oklahoma versus Maryland for sure, as both have death grips on the top rungs of their respective loops.

HERE'S A HIT - LUCKY DROODLES!

WHAT'S THIS? For solution see paragraph below.

YOU ALWAYS COME OUT ON TOP when you light up a Lucky, because Luckies are tops for taste. Luckies taste better because Lucky Strike means fine tobacco... mild, mellow tobacco that's *toasted* to taste even better. The men in the Droodle above have *come out on top*, too—in more ways than one. The Droodle is titled: *Convention of baldheaded men smoking Luckies*. Follow their shining example: light up a Lucky yourself. You'll say it's the best-tasting cigarette you ever smoked!

To those interested in advanced academic study while associated with important research and development in industry, Hughes offers two separate, practical programs:

HUGHES COOPERATIVE FELLOWSHIP PROGRAM FOR MASTER OF SCIENCE DEGREES

This program is designed to enable outstanding graduates in Electrical Engineering, Mechanical Engineering or Physics to obtain the Master of Science degree while acquiring experience in an industrial research and development environment. The program is comprised of full-time summer employment at Hughes under the guidance of experienced scientists and engineers, and part-time work at Hughes during the regular school year arranged to permit the student to maintain a half-time university schedule of graduate study.

Tuition, books and fees will be provided by Hughes. The income provided will enable the participant to enjoy a reasonable standard of living while pursuing his advanced studies. Travel allowances will be made to those living outside the area.

Applicants must be able to meet the entrance requirements for graduate study at the University of California at Los Angeles, the University of Southern California, or the University of Arizona. Because of the classified nature of the work at Hughes, applicants must be U. S. citizens for whom appropriate security clearance can be obtained. As many as 150 awards will be made.

Application forms and instructions may be obtained by writing to Committee for Graduate Study.

THE HOWARD HUGHES FELLOWSHIPS IN SCIENCE AND ENGINEERING

Eligible for these awards are U.S. citizens who have completed one year of graduate work in Engineering or Physics and who can qualify for graduate standing at the California Institute of Technology for study toward the degree of Doctor of Philosophy or post-doctoral work. Each fellowship covers a twelve-month period which includes a ten-week advanced development project carried out during the summer at Hughes Research & Development Laboratories, followed by a full-time program of study and research at California Institute of Technology. Each appointment provides a cash award of not less than \$2,000, a salary of not less than \$2,500, plus \$1,500 for tuition and research expenses. In case of financial responsibilities that might preclude participation in the program, suitable adjustment may be made. Moving and transportation expenses are provided for those living outside of Southern California.

For application forms and complete information, address correspondence to the Howard Hughes Fellowship Committee.
