

### Finalists Announced

Finalists for Cornhusker Beauty Queen, presented at Coed Follies Monday, are from left, first row, Joan Pollard, Carol Link and Arlene Hrbek; second row, from

left, Anne Wade, Joan Riha, Lucette Makepeace, and Janice Carman; back row from left, Mary Ann Daly, Sandra Stevens, Mary Keys, Carol Beattie and

Shari Lewis. The Cornhusker sponsors the annual competition. Organized houses are allotted one candidate for each 25 Cornhuskers sold; finalists are selected from these candidates.

# Twelve Finalists, INC Named At Coed Follies

## ...Jody Chalupa Presented

The Twelve finalists for Cornhusker Beauty Queen and the Ideal Nebraska Coed for 1956, Jody Chalupa, were presented Monday night at the intermission of Coed Follies.

Finalists are Carol Beattie, senior in Agriculture; Nancy Carman, senior in Arts and Sciences; Mary Ann Daly, senior in Teachers College; Arlene Hrbek, junior in Arts and Sciences; Mary Keys, junior in Agriculture; Shari Lewis, junior in Teachers College; Carol Link, junior in Teachers College; Lucette Makepeace, junior in Teachers College; Joan Pollard, senior in Teachers College; Jean Riha, sophomore in Teachers College; Sandra Stevens, senior in Teachers College, and Anne Wade, sophomore in Agriculture.

Queens in Many when the Cornhusker yearbook, sponsor of the competition, is published. The winning six were selected Thursday by Stan Kenton, orchestra leader. Miss Chalupa, Ideal Nebraska

### Coed Follies

Coed Follies will begin at 7:30 p.m. Tuesday. First, second and third place awards for the skits and first place for the curtain acts will be awarded after the performance. The Ideal Nebraska Coed and finalists for Beauty Queen will also be presented.

Coed, was presented by Carol Link, AWS board member. The name was changed from Typical Nebraska Coed to make it more appropriate, Miss Link said.

Miss Beattie is a member of Home Ec Club, University Four M Club, Ag YWCA and Alpha

Omicron Pi. Miss Daly is a member of Aquettes, WAA and Alpha Chi Omega. Miss Carman is a member of Theta Sigma Phi, a former Nebraska copy editor and a member of Kappa Kappa Gamma.

Miss Hrbek is a Nebraskan staff writer, a member of Kappa Alpha Mu, Theta Sigma Phi and Delta Delta Delta. Miss Lewis is a member of Builders and Delta Delta Delta.

Miss Keys is a member of Theta Sigma Phi, Phi Upsilon Omicron, Home Ec Club and Gamma Phi Beta.

Miss Link is a member of Pi Lambda Theta, AWS Board, Teasels and Delta Gamma. Miss Makepeace is a member of Red Cross, Builders and Kappa Kappa Gamma.

Miss Pollard is a cheerleader and a member of Pi Beta Phi. Miss Riha is a member of Red Cross and Alpha Phi.

Miss Stevens is a member of Red Cross and Kappa Alpha Theta. Miss Wade is a cheerleader and a member of Pi Beta Phi.

### TC Junior Maintains 90 Average

Jody Chalupa, who is working her way through college and still maintaining slightly more than a 90 per cent grade average, was presented Monday evening as the 1956 Ideal Nebraska Coed.

She was selected by a special student faculty committee from 38 candidates and five finalists and presented at the opening performance of Coed Follies sponsored by the Associated Women Students.

The 20-year-old junior in Teachers College works 20 hours a week as secretary in the Teachers College Office of Dean F. E. Henzlik. Her overall average for two and a half years is 8.1. She is majoring in English.

Besides her studies and secretarial work, she also is secretary of the Y.W.C.A., junior board member of Coed Counselors, and president of Alpha Xi Delta.

She is a member of Pi Lambda Theta, honorary teaching society, and Alpha Lambda Delta.

Other finalists in the competition were: Jeanne Elliott, Sue Simmons, Diane Knotek, and Hanna Rosenberg.

### Europe: Fellowship Awarded To Krueger

Joan Krueger, 1953 University graduate, has been named one of the outstanding graduate students to receive a Rotary Foundation Fellowship for advanced study abroad during the 1956-57 academic year.

There were 121 graduate students from 32 countries named to receive the award this year. Each grant averages \$2500 and the awards total more than \$300,000.

Miss Krueger was recommended for the Fellowship by the Rotary Club of Norfolk. She will travel to Europe where she will study international law in preparation for a career in an international organization or in government.

While attending the University, Miss Krueger was president of NUCA, a member of Mortar Board, debate squad and was editor of The Nebraskan.

She is now a graduate at the Fletcher School of Law and Diplomacy in Massachusetts.

## Montgomery Lecture: Noyes Stresses Relationship Between Government, Science

Dr. W. Albert Noyes, Jr., dean of the Graduate College at Rochester University, Monday evening cautioned that the future of science and technology in America "depends above all other things on sound government practices."

And, he said, that despite a large volume of "fine scientific work in government laboratories, it behooves all of us to recognize that in many respects the situation is not so good."

Dr. Noyes delivered the first of three Montgomery lectures, entitled "Science on the National and International Scenes." Dr. Noyes explained that certain areas of scientific work will be conducted only by the

government either because they are very costly or because they are of such a character that only government can provide the necessary facilities.

The consultant to the Atomic Energy Commission from 1948-53 said it is wishful thinking to pretend that the government's role will ever diminish.

He said it was quite understandable that the government has trouble in recruiting able scientists.

Another factor, he said, which has hurt scientific work in government is the instability of government budgets.

He said the evil of fluctuation budgets "can only be overcome by a rather drastic revision in our whole appropriation mechanism, but at least Congress should

inquire less into details and possibly more into principles in shaping government, he said that scientists have probably suffered more from security alarms than any other class of persons.

The merest rumor that so-and-so is not reliable or has subscribed to a leftist magazine or has belonged to a liberal organization may cost him his job. Not only that, he may never get another one.

"Small wonder that some persons cringe at the mere thought of accepting government employment either on a part-time or on a full-time basis.

"It may be suggested that the dangers are more imaginary than they are real. Undoubtedly this is true, but the damage done by certain congressional committees and by the security procedures in certain government departments has been very real.

"The persons responsible for this damage are the real subversives today."

Dr. Noyes explained that America's system of education, "if we do not allow it to die of malnutrition, is better geared to the modern technological world than any other.

Pointing out that about two-thirds to three quarters of university research is today supported by government contracts and grants, he said there are dangers in this particular type of system.

He said that "the universities had led into activities which may not belong on university campuses. The type of research not well suited to training students and to encouraging scholarly work by faculty members should be left for industry and for government."

Dr. Noyes explained that the operation of research in industry "is such as to tend to make the large corporation grow larger and to place the small corporation under some handicap.

"This should be looked upon as not due to the innate wickedness of individuals and corporations but to something which is more or less inevitable. The small company with the right men, the right ideas, and it must be admitted, with a little luck can still crash through and make its pile."

Dr. Noyes will deliver the second in the series of three Montgomery Lectures Wednesday at 8 p.m. in the Love Memorial Library auditorium. The public is invited to attend.

NOYES

## Science: Importance In War Told By Lecturer

"You can't get ready for war without a lot of scientific knowledge," Dr. Albert Noyes, dean of the Graduate College at Rochester University, said in an interview here Monday.

He then continued that because of this science has a very noticeable effect upon the course of government policies.

Dr. Noyes said that science and technology changes our way of life, a good example of this being the automobile and the effect it has produced upon civilization.

"The development of intercontinental missile can change the whole philosophy of war," said Dr. Noyes. "An atomic bomb that can fly 5000 miles by itself is bound to bring a great change," he said.

"Those that believe that science has no bearing on government are the people that I am in conflict with," he stated.

The leaders of our nation should have a knowledge of science since it does so greatly concern us today he went on to say. The problem of the Salk anti-polio vaccine and how to handle it is under Marian Folsom, a lawyer, and yet it is a scientific question, he stated.

When asked about the race with Russia to produce more scientists and engineers, Dr. Noyes said that Russia probably has as many scientists as we do yet their rate of production is two to three times greater than ours.

## 340 Participate: Tourney Nets NU 14 Superior Awards

Three University debate teams received superior ratings at the two-day Intercollegiate Debate and Discussion Conference, which ended Saturday afternoon.

The teams were composed of Nancy Copeland and Sara Jones, Dick Andrews and Jerry Igoe, Jere McGaffey and Allen Overcash.

Receiving superior awards in debate were McGaffey, Overcash, Igoe, Miss Jones, Russel Gutting and Sandra Reimers.

Igoe was awarded a superior rating in discussion and Miss Reimers received a superior in oratory in the largest tournament ever held at the University.

One hundred and sixteen debaters from 54 schools competed in debate. For the entire conference, 340 students from nine states were registered.

Undeclared in five rounds of debate were Miss Copeland and Miss Jones, Bruce Brugmann and Gutting.

The teams of McGaffey and Overcash, Barb Sharp and Connie Hurst and Andrews and Igoe won four and lost one. Sharon Mangold and Miss Reimers won three and lost two. The record for the entire University squad was 25 wins and 5 losses.

Dan Stoops of Washburn University was elected permanent

speaker of the parliamentary session and Wilma Rugh of Ottawa University, Kansas, was chosen clerk.

Directors of the conference were Donald Olson, director of debate, and Bruce Kendall, director of forensics.

### Ag To 'Graduate' 32 From Course

Thirty two students from all parts of Nebraska will be awarded certificates Friday under the College of Agriculture's Short Course Program.

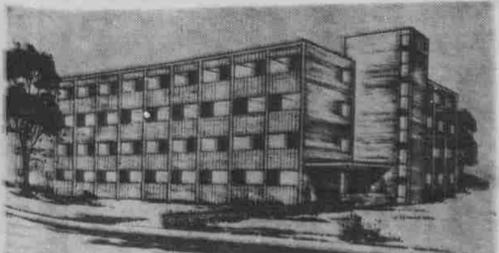

Short course sessions are four weeks long and two separate courses are taught during that time.

The program was planned at the request of many Nebraskans who wanted additional training in farm operations or home management, but who were not interested in a four-year college course.

"I feel that short course students are a very important part of our student body," Dr. Franklin Eldridge, associate director of resident instruction, said.

"The impressions that they carry back to their home communities are fully as important as those received by a four-year college student," he said.

# Proposed New Building Bids Announced

### Health Center

The proposed Student Union Health Center costing \$550,000 and located between 14th and 16th on U street is shown above.

It will include an out-patient clinic, a dispensary service laboratory and x-ray equipment room, a physical therapy department and 22 beds.

## The Outside World: Khrushchev Re-Elected As Soviet Secretary

By ARLENE HRBEK Nebraskan Staff Writer

The Central Committee of the Soviet Communist Party Monday re-elected the 11 members of its ruling Presidium. Nikita S. Khrushchev was re-elected to the strategic position of first secretary.

Defense Minister Georgi K. Zhukov, World War II hero, became a candidate (alternate) member of the ruling body. In Stalin's day the hierarchy was known as the Politburo. The so-called collective leadership of the Soviet Union remained unchanged at the close of the 20th Congress of the Soviet Communist Party. As first secretary, Khrushchev remains boss of the party.

Malenkov, former premier until he confessed failure at his job is back in the Presidium. He is now a deputy premier, minister of electric power stations and a Supreme Soviet deputy.

### Vaccine Plan Studied

The House of Delegates of the Nebraska State Medical Association Sunday voted to recommend discontinuance of Nebraska's 100 per cent state distribution of free Salk polio vaccine to the public paid by federal grants in aid.

A meeting of the State Polio Advisory Council is expected to be called at the state capital at 7:30 Wednesday to act on the recommendation.

The House of Delegates recommend dropping the state system of Salk injection pointing out the socialized medicine aspects of the federal government's buying vaccine for free distribution.

### Radar Net Grows

The United States is slowly assembling a radar warning system, in the air, on the ground, and at sea which will reach around almost half the globe.

The Distant Early Warning Line (Dewline) being built in secret places on the polar rim of the North American continent is only a component of the vast system intended ultimately to give warning to this country of enemy aircraft approaching from almost any point of the compass.

### Peron Evicted

"Breathes their a man with soul so dead who never to himself has said, this is my land..." Deposed Argentine Dictator Juan Peron must feel like that in his temporary Panama home. Under pressure kicked up in Congress, Peron's landlord, the government-owned Panama Canal Company has ordered the ex-dictator evicted from his Panama City home.

Peron is hoping to move into a rented house in Panama City while his request for a permanent residence permit is studied by Panamanian authorities.

### Mercury Climbing

Eastern Nebraska had quite a change Monday from earlier spring-like weather. The mercury managed to climb to only 25 degrees in Lincoln Monday. However, other state areas reported high readings in the 40s, with Imperial recording the highest of 45.

Lincoln was to be a little warmer, the weatherman predicted in a forecast that also called for scattered light snow in the central area Tuesday and in the west and north central areas Tuesday night.
