

Selleck Quad: Director Carlyon Resigns

Don Carlyon, director of Selleck Quad, has resigned his job effective July 1, 1956.

Director: New MB Post Given To Snyder

Helen Snyder assistant dean for women has been named one of the four new section directors of Mortar Board.

Spring Day: Bar-B-Que; Other Plans Under Way

Ag Exec Board will sponsor a Bar-B-Que for the Spring Event May 4 if they are given a financial guarantee.

"We'd like to do it and we have been working out how we would handle the affair," he said.

So far, the Ag Exec Board is awaiting permission from the administration before they plan further.

Don Beck, chairman of the student planning committee of the Student Council, said, "The decision reached by Ag Exec will add greatly to the program for the Spring Event."

Other activities during the spring event include a series of athletic events in the afternoon, sponsored by the N Club, and a street dance.

The Union will present hourly shows in the Ballroom during the street dance.

The members of the Student Planning Committee of the Council are Don Beck, Bruce Brugmann, Marshall Wright, Tom Olson and John Fagan.

Everest Conquest Subject Of Movie

"The Conquest of Everest" is the second in the series of movies presented by the Film Society.

This is a documentary describing the 29,002 foot climb of Englishman Colonel Hunt and associates.

Sir Edmund Hillary and Tensing a native guide, selected by Hunt to make the final assault which led to success.

The Challenge: Former Governor Contributes To Column

Val Peterson, former three-term Nebraska governor, has contributed a specially written article for "The Challenge" series, a regular feature of the editorial page.

He is a graduate of Wayne State Teachers College and received his Master's Degree in political science from the University in 1931.

Courtesy Lincoln Star Peterson

The 'Challenge' Article

Twenty-five years ago, when I was a political science student at the University of Nebraska, Communist Russia was in the midst of its first Five Year Plan.

And a 51-year-old physicist, Albert Einstein, was traveling extensively and forming the opinions that were to result in his leaving his native Germany for a new home in the United States.

Those somewhat detached events did not seem too important to me at the time — not when they were considered alongside the economic dangers we were facing right at home.

I can appreciate the reasons for the disinterest of many toward this thing we call civil defense, because I realize the enormity of the problems we are attempting to solve sometimes seem to defy the mind of man.

The free world was fortunate that men like Einstein were on its side in the early stages of the development of atomic energy.

Russia has nuclear weapons of such power that one bomb dropped on a city could devastate it in a matter of seconds.

Regardless of our distaste for the thought, we cannot escape the probability that, in any World War III, the United States would be a battleground and that the war could end in a matter of days.

We will need civil defense just as long as we will need military defense. It is just this kind of dual preparedness, military and civil, that can make attack a losing proposition for an enemy.

The Hiroshima atomic bomb that exploded with the power of 20,000 tons of TNT.

Transportation for students desiring to attend the discussion will be in front of the Union at 2:15 p.m.

Highlights of Religious Emphasis Week will be: Presentation of an original religious drama, "Childhood of Man" by Jim Tomasek, Sunday at 7:30 p.m.

"I am sure," Dr. Knowles added, "that going through Religious Emphasis Week will help make students realize what they are really doing here and what their purpose is in life."

Dr. Knowles said that over 100 students have been planning the Religious Emphasis program for March 4-8, and he hopes that the campus will live up to the expectations of the committee.

"I've never seen so many students work so hard," he stated. "John Nelson and Russell Lang, city campus and ag campus chairmen, and their committee members have worked almost endless hours preparing for it."

"And I feel," he said, "that we couldn't have had the week without the help and cooperation of Jackie Jackson, who is at the University for a year on a Danforth Foundation Fellowship to help any organization which needs help with religion."

"The Chancellor is serving as Honorary Chairman of the Week," stated Dr. Knowles, "and Prof. Herbert Jehle of the Physics Dept. will be the Adviser of the Week."

Religious Emphasis Week will actually begin on Sunday afternoon, March 23, at 2:30 p.m. with a two hour discussion held at the First Plymouth Congregational Church, 20th and D St.

The discussion is open to everyone on the campus. It will consist of a panel discussion by campus representatives on the problems of the University. Through this discussion, the religious speakers will be able to point their discussions during the week to the problems brought out in the Sunday discussion.

Pauling, former head of the American Chemical Society, appeared as a voluntary witness before the Senate subcommittee on constitutional rights and told how he was denied a passport until he was awarded the Nobel Prize.

His first passport, issued in 1926, expired in January of 1952, he applied for a new passport to attend the symposium of the Royal Society of London. His application was denied in April by the State Department on the ground that the travel would not be in the best interests of the United States.

The State Department on the other hand accused Pauling of helping the Communist cause in the U.S. through his support of various individuals connected with Communism.

There are cases where individuals have suffered as a result of clearance programs, Miltzer said. He also said that there have been cases where graduate students, applying for fellowships, have been turned down as a result of suspicion of Communist front affiliations.

"I think however that this sort of thing is past its peak," Miltzer emphasized.

The F.B.I. consults with Dr. Miltzer in regard to routine clearance procedure at the University in the College of Arts and Sciences. Miltzer declared that he has always found the F.B.I. to be "most reasonable" in security dealings.

Discussing some of the points made by Dr. Noyes, Dr. Georgi cited an example published in the Chemical and Engineering News. This article commented upon the case of Dr. Linus Pauling, winner of a Nobel Prize, who was

denied permission to leave the country for approximately two years as a result of questionable affiliations.

The Press Club, instituted last semester, meets bi-weekly and serves as a sounding board for complaints, suggestions and discussion of editorial policy.

Knowles On R-E:

Pastor Emphasizes Week's Importance

By PEG KELLEY, Nebraskan Reporter

"It is a fine thing that eight prominent speakers on Catholic, Protestant and Jewish faiths will be available to the whole campus for Religious Emphasis Week, March 4-8," said Dr. Rex Knowles, adviser of Religious Emphasis Week.

Courtesy Lincoln Star Knowles

From the standpoint of education, Dr. Knowles believes that the seminars during the afternoons are the most important. The "question and answer sessions" will be discussions for students to raise questions.

Varied interests of the students have been taken into consideration as to what subjects shall be discussed. The seminars will include discussions on love and marriage, science and religion, prayer and worship and higher education and religion.

"One of the problems of educational experience with too many people," Dr. Knowles commented, "is an accumulation of facts without any integrating force, like a wheel with a lot of spokes and no hub."

"It is the hope of the Religious Emphasis Week Committee that through the students' hearing of these religious speakers and through their own discussions, that they may develop a philosophy of life that may give deeper meaning to their own lives," he said.

"I am sure," Dr. Knowles added, "that going through Religious Emphasis Week will help make students realize what they are really doing here and what their purpose is in life."

Dr. Knowles said that over 100

Security Clearance: Lecture Discussed By NU Scientists

Two University scientists were questioned by the Nebraskan regarding a statement made Monday by Montgomery Lecturer, Dr. Albert Noyes, Jr.

Discussing security clearance procedure in government, Noyes said that scientists have probably suffered more from security alarms than any other class of persons. The merest rumor that someone is not reliable or has subscribed to a leftist magazine or has belonged to a liberal organization may cost him his job, he said.

Dr. Walter Miltzer, Dean of the College of Arts and Sciences, and Dr. Carl Georgi, chairman of the department of bacteriology, were asked to comment on the security clearance of scientists. Miltzer and Georgi recently made news for research on the composition of a cell.

There are cases where individuals have suffered as a result of clearance programs, Miltzer said. He also said that there have been cases where graduate students, applying for fellowships, have been turned down as a result of suspicion of Communist front affiliations.

"I think however that this sort of thing is past its peak," Miltzer emphasized.

The F.B.I. consults with Dr. Miltzer in regard to routine clearance procedure at the University in the College of Arts and Sciences. Miltzer declared that he has always found the F.B.I. to be "most reasonable" in security dealings.

Discussing some of the points made by Dr. Noyes, Dr. Georgi cited an example published in the Chemical and Engineering News. This article commented upon the case of Dr. Linus Pauling, winner of a Nobel Prize, who was

Rag Press Club Plans Meeting For Friday

The Rag Press Club will meet at 12 p.m. Friday in Parlor Y of the Union, according to Bruce Brugmann, editor.

A speaker and a discussion of editorial policy will be featured at the meeting. All Nebraskan and Cornhusker staff members, reporters, columnists and members of the Board of Publications are invited.

The Press Club, instituted last semester, meets bi-weekly and serves as a sounding board for complaints, suggestions and discussion of editorial policy.

The Outside World: Ike's Decision Expected

By ARLENE HRBEK President Eisenhower will hold a news conference at 9:30 a.m. (CST) Wednesday—his regular hour for meeting the press.

Hagerty told reporters he did not know whether Eisenhower planned to make a radio and television appearance later Wednesday. That step is generally expected to be taken by the President after any announcement of a decision on the second term question.

The question of the television appearance was prompted by speculation that Eisenhower might hold up any announcement on the big question until after the 2:30 closing of the New York Stock Exchange. The President has expressed concern in the past over market fluctuations stemming from his heart attack and related developments.

Hereditary Effect 'Negligible' A group of scientists Monday criticized the Atomic Energy Commission (AEC) for "misleading language in connection with the hereditary effects of the fallout from A-bomb and H-bomb tests."

Five members of the Cambridge, Mass. branch of the Federation of American Scientists said it is true that, percentage-wise, the number of harmful genetic "mutations" deemed possible as a result of the present rate of atomic testing represent "only a negligible" increase in the number of mutations carried by the human race as a result of other factors.

Air Force Back From Pole A U. S. 18th Air Force survey of seven men is back from the Antarctic with plans to airdrop an entire scientific base at the South Pole.

The base will consist of 485 tons of materials for buildings, radio towers, scientific equipment and supplies to sustain scientists at the polar station through January 1959 for studies connected with the International Geophysical Year.

First Lt. Ernest Schmid of Syracuse, N. Y. is the first Air Force man to fly over both poles, but he "couldn't see a thing" at the South Pole, he said, because of a "white out" in the atmosphere where ice crystals shroud the horizon and deprive airmen of their sense of direction and balance.

Neff's Partner Testifies The law partner of John Neff disclosed Tuesday that Neff made trips or calls to Iowa, Montana and Wyoming in connection with his work for the natural gas bill.

Winning Skit

The Gamma Phi Beta's "Minstrel Madness" pictured above, was announced as the winning Coed Follies skit. Directed by Shirley Holcomb, the skit revived the "good old days" of the minstrel shows. The skit took place at midnight in a deserted theatre when the old vaudeville troupe returned to stage an impromptu performance.

Delta Delta Delta won the curtain act competition for "Midnight Madness of Paul Revere." Honorable mention went to Kappa Alpha Theta for "East Meets West" in the curtain acts.

Madness" were the songs, "When the Saints Come Marching In," "Dixie" and "Dry Bones." A giant minstrel face which glowed in the dark was used as a backdrop to the Gamma Phi skit, and the members of the chorus wore luminous gloves and ties.

Gamma Phi Beta Wins Coed Follies ... KKG, DG Place In Show

Phi Beta, placed first in the annual Coed Follies competition. Second place went to Kappa Kappa Gamma for "Midnight Dolls' Delight." "Knights of the Road," Delta Gamma, placed third.

The winning traveler's act was "Twila's Tormentous Triumph," presented by Shirley McPeck, Virginia McPeck and Kathy Carpenter. Honorable mention went to "Blackout," a drum and piano duet, by Billie Croft and Carole Unterseher, and "Midnight Melodies" by the Sigma Alpha Iota trio, made up of Jan Boettcher, Phyllis Maloney and Lois Ripa.

country lobby for their home area, but the convention votes to hold the meeting in the same place next year.

Holy War: Tryouts Set For Theater Production

Tryouts for this year's last University Theater production, "Mary of Scotland," will be held Monday, Tuesday and Wednesday of next week.

Monday tryouts will be from 3 to 5 p.m., Tuesday, from 3 to 5 p.m. and Wednesday, from 3 to 5 p.m. and 7 to 10 p.m. in Room 312, Temple.

Also judging were Henry Thomas, Frances Vogel and Max Whitaker.

Shirley Holcomb, junior in Teachers College, was skitmaster for the winning skit. The skit was centered around a minstrel show returning to active life.

It begins as the members reminisce about the "good old days" and at midnight re-enact an actual minstrel show.

Chickens: Research Produces New Line

University poultry research scientists have developed seven lines of inbred pedigreed chickens which may be the source of exceptional hybrid varieties.

Professor F. E. Mussehl, poultry husbandry department chairman, said the inbred chickens have been made available, in limited quantities, to several of the major midwestern hatcheries.

When the Nebraska inbreds are crossed with other commercial lines, Prof. Mussehl reported, hybrid chicks of high quality have resulted.

One of the inbred lines of Leghorns has high resistance to lymphomatosis, or range paralysis, a virus-like disease which annually destroys over 800,000 chickens in Nebraska, causing a loss estimated at \$1,000,000.

The lines developed were of four breeds — Leghorns, Plymouth Rock, Rhode Island Reds and California Greys. The inbreeding work, now supervised by Dr. T. S. Yao, poultry geneticist, seeks to improve egg size, interior egg quality, hatchability and total egg production.

The research project is now directed to crossing these inbred lines to develop more vigorous hybrids, Mr. Wight said, and some promising stocks are resulting.

The-Inside World

Poetry Entries

March 1 is the deadline for the Bone Gardner Noyes poetry contest and the Prairie Schooner Fiction Awards for short stories. Bernice Slot, assistant professor of English announced. Entries, in triplicate form, should be taken to 207 Andrews, she said.

Palladian

A variety show will highlight the meeting of the Palladian Society Friday at 8:30. The meeting is open to all students and no admission will be charged. The group will meet at Temporary J.

Recreational Swim

A recreational swim will be held Wednesday night from 7:30 to 8:30 for all women students. They must have a swim permit and there is a charge of ten cents for use of the suits.

May Queen

The deadline for May Queen filings is Friday, March 8. Senior women should file at Ellen Smith Hall by 5 o'clock Friday afternoon. Mortar Boards sponsor the May Queen.

ROTC Offers Minute Man Award Medals

Minute Man Awards, offered annually by the ROTC Department, will be presented at one of the ROTC parades this spring.

The awards originally set up by Col. James Ladd, are now under the sponsorship of the Sons of the American Revolution. The award consists of a medal.

Prior to April 2, two first year members will be selected from each platoon of the Army ROTC to participate in the competition.

The awards are based on leadership, bearing, appearance and interest in the ROTC program. Those entering competition will appear before a board of cadet officers in April. They will be examined on knowledge of the General Orders, Preamble to the Constitution, the American Creed and various elements of military drill.

As many as 30 medals may be awarded each year. Further information may be secured from the ROTC office in the Military and Naval Science Building.
