

Council: Tribunal Answers Received

Replies to questions concerning existing student tribunals at various colleges throughout the country have been coming from all parts of the country, according to Mary Breslow, corresponding secretary of the Student Council.

The letters have indicated that there is a great variety in types of tribunals and the authority they exert.

Replies have been received from Virginia, Colorado, Montana, Stanford, Utah, Michigan, Princeton, Illinois, Kansas State and Iowa State.

The most common form of tribunal seems to be in use at Kansas State College. The court consists of six students and three faculty justices, whose decisions are subject to review and — or acceptance by the President of the College.

"The Tribunal is a real success," Herbert Wunderlich, Dean of Students at Kansas State, said.

Iowa State College uses a Cardinal Guild which derives its authority from the administration and has the power of recommendation.

"We are very happy with their (Guild's) good judgment and their splendid recommendations," the Director of Student Affairs said. He added, "In many cases if the President has any question about the situation, he will come to my office for a conference."

Montana State University has just started a tribunal which has the power to exercise responsibility in student conduct "as long as the desired outcome is achieved."

"The desired outcome is students responsible for their actions and acting in accordance with the accepted standards," the assistant to the Dean of Students said.

He added, "Presently the area of action has to do with liquor standards, but the hope is to have the council act on all matters of student standards."

The Inside World

Cosmo Club

Benjamin Lall, a member of the ecumenical mission team visiting the campus, will speak at a meeting of Cosmopolitan Club at 7:30 p.m. Tuesday in the Round-Up Room of the Union. Pictures taken at last Saturday's dance will be displayed at the meeting. Gunnar Green, president, urged that all ticket sellers attend the meeting and return unsold tickets.

Bridge

The third in a series of beginning and advanced free bridge lessons will be Tuesday at 5 p.m. in Room 315 of the Union. The lessons are sponsored by the Union Recreation Committee. The instructor is James Porter.

Poetry Critique

Karl Shapiro's poems will be reviewed by Bernice Slote, associate professor of English, 4 p.m. Wednesday in the Union Faculty Lounge.

Shapiro, a Pulitzer Prize winning poet, will join the faculty next fall.

The review of his works is one of a series sponsored by the Union.

4-H Club

University 4-H Club will meet Wednesday at 7:30 p.m. in the gym of the College Activities Building.

The program will include installation of officers and announcement of committees and committee chairmen. A film, "County Fair", will be shown.

Math Colloquium

A mathematics colloquium will be held Tuesday, 3 p.m. in Room 209 Burnett. Dr. Frank Anderson, instructor of mathematics will discuss, "Lattice of Continuous Functions."

Audition Winners

Pictured above are Martha (left) and Janet Danielson, the student audition winners of the Lincoln Symphony Orchestra. The Danielsons have studied piano for 12 years and are now pupils of Beth Miller Harrod. They are both University students and members of Kappa Alpha Theta. Neither are music majors. They were the first duo-pianists to win the audition in the 14 years since it was established. The Orchestra will give the concert Thursday 7:30 p.m. in the Stuart Theater. The Danielsons will play Poulenc's concerto in C minor. The Lincoln Symphony series closes April 24 with a concert by the orchestra and Erica Morini, violinist.

'Good Try':

North Carolina Leads In Panty Raid Derby

By LUCIGRACE SWITZER
Copy Editor

"Credit" for the first panty raid of the spring must go to the University of North Carolina although it was something of a fizzle.

According to the "Daily Tar Heel", approximately 300 students participated in the attack on one of the women's dorms, but were somewhat dispersed by police. They then proceeded to another dorm but left after a few minutes. Oh, well, one should probably give them credit for "the old college try."

Confession

A Wyoming University law student has found himself on the other side of the law, following the murder of another law student, Carl Williams.

John Patton, junior law student was taken into custody and bound over to the district court on a charge of first degree murder after Williams was found dead in his car in front of the Wyoming University law building. The coroner's report showed that Williams had been struck with the jack handle of his car.

The events leading up to the crime rose out of a dispute over which of the two had a date with a certain WU coed.

The "Roundup", Wyoming student publication, finally confessed to the crime . . . part of a plot to publicize the Moot Court proceedings where the fictitious case is to be debated.

ceedings where the fictitious case is to be debated.

Dog's Life

Critics who claim that colleges are going to the dogs may have a case in point at Kansas State.

There, the administration hired a student to serve as dog catcher to pick up all dogs running loose on the campus. The dog catcher is a veterinary student who asked that his name not be released because he felt that his job wasn't very popular, according to the "K-State Collegian."

Example

Students at Syracuse University in New York found an effective reminder of Brotherhood Week in a sign in front of some new construction. It said: Temple Adath Yeshuran Religious School Annex. Underneath was the name of the contractors, Irish Construction Co.

Album Hour

An album hour will be held in the Union Music Room at 7 p.m. Tuesday. A member of Sigma Alpha Iota will discuss the classical records to be played. Coffee will be served.

So Good to your TASTE —
So Quick on the DRAW!

1. SUPERIOR TASTE

So good to your taste because of L&M's superior tobaccos. Richer, tastier—especially selected for filter smoking. For the flavor you want, here's the filter you need.

2. SUPERIOR FILTER

So quick on the draw! Yes, the flavor comes clean—through L&M's all white Miracle Tip. Pure white inside, pure white outside for cleaner, better smoking.

RELAX WITH L&M MAKE TODAY YOUR BIG RED LETTER DAY!

research
and development

The technology of guided missiles is literally a new domain. No field of engineering or science offers greater scope for creative achievement.

Research and development at Lockheed Missile Systems Division cover virtually every field of engineering and science and have created new positions for graduates possessing outstanding ability in the following fields:

Electronics
Research and development as applied to missile systems and associated equipment.

Computers
For solution of complex problems and missile guidance.

Systems Engineering
Research and development in missile systems.

Antenna Design
Related to missile guidance.

Communications
In the broad area of information transmission.

Electromechanical Design
As applied to missile systems and related equipment.

Instrumentation
Associated with aerodynamics, physics and electronics.

Physics
Theoretical and experimental aero-physics, upper atmosphere research, optics, nuclear physics and spectroscopy.

Structures
Structural design and analysis of missile systems.

Thermodynamics
Aerodynamic heating and heat-transfer problems.

Aerodynamics
Concerning performance of missile systems.

Dynamics
As related to missile body flight problems.

Operations Research
Applied to tactical weapons operations.

Advanced Study Program

Graduates in Physics, Electrical, Aeronautical and Mechanical Engineering are invited to contact their Placement Officer regarding the Advanced Study Program which enables students to obtain their M.S. Degree while employed in their chosen field.

The complexity of missile systems research and development has created a number of positions for those completing their M.S. and Ph.D. degrees. The positions carry immediate responsibility commensurate with the advanced academic training and experience required.

Representatives of the Research and Engineering staff will be on campus

Wednesday, March 21

You are invited to consult your Placement Officer for an appointment.

Check this new collar style — the ARROW Glen

Here's a broadcloth shirt with features that please the college man with an eye for style. The collar, (button-down, of course), is a shorter, neater-looking model. The fine broadcloth cools you throughout the warm days ahead. The trim checks are available in 7 color combinations, including blue, tan and grey. \$5.00.

And, an Arrow repp always sets off an Arrow shirt just right. Tie, \$2.50.
