

Professor: Col. Duncan Joins Staff Of AROTC

Col. Carter Duncan, commander of the 323rd Fighter-Bomber Wing at Bunker Hill Air Force Base, Peru, Ind., has joined the University staff as professor of air science.

He succeeds Col. Joseph Stenglein, who has served as head of the Air ROTC unit for the past three years. Colonel Stenglein is leaving this week end for his new duties as group commander of an air-sea rescue unit in Alaska.

A native of Bloomington, Ind., Colonel Duncan received his commission from West Point in 1938. He entered flying training and received his wings at Kelly Air Force Base in 1939.

During World War II, Colonel Duncan was with the Allied Air Forces in Africa and the 12th Air Force in Italy. In 1944, he was assigned to SHEAF Headquarters in Brussels, Belgium, and then with the occupation force in Europe.

He has attended the Air Command and Staff School, the Naval War College Senior Course and instructed at the Command and General Staff College. From 1949-52, he was assigned to the Joint Brazil-U.S. Military Commission.

Since 1952, he has served as air inspector of the 9th Air Force and base commander of Pope Air Force Base, Ft. Bragg, N. C.

Square Dance Sessions Set For July 5, 6

Square dance sessions for both the inexperienced and the "pros" will be held July 5 and 6 in the Union Ballroom.

The Roundup is sponsored by the Women's Physical Education Department and the Nebraska Folk and Square Dance Association.

The schedule for July 5 is 4 to 6 p.m. and 7:30 to 10 p.m. July 6 the afternoon sessions will be from 3:30 p.m. to 5:30 p.m. The evening session will be from 7:30 p.m. to 10 p.m.

Mixers, rounds, as well as the traditional squares will be taught.

There will also be chance to learn fundamentals and simple dances.

Callers will have their day too, as special sessions for both experienced callers and beginners have been planned.

Members of the steering committee from the University are Loyd Collier, caller-teacher; Mrs. Elvera Berck, coordinator; Dr. Dudley Ashton, advisor, and Mrs. Jessie Flood, music.

Assisting from the state association will be Mrs. Cornelia Putney, Lincoln; Mrs. Grace Smith, Omaha; Dave Rockwell, Lincoln; Roland Badberg, Lincoln, and Joseph Vavra, Schuyler.

Prochnow Tells Convocation Audience Greater Output Brings New Problems

The prospect of greatly increased world production will not necessarily simplify foreign relations, especially with underdeveloped countries, a U.S. State Department official told a University convocation audience Monday afternoon.

Herbert Prochnow, deputy under secretary of state for economic affairs, said that world output may very well expand in the next 20 years faster than it has in the past.

He also pointed out that world output is expected to rise a great deal faster than world population.

These prospects, he said, will bring new problems as they ease old ones. While the rate of growth of underdeveloped countries might

technology, Prochnow said. This is a primary resource, he said, because without it the usefulness of other resources would be severely limited.

"The real significance of the unfolding of the American economic drama involves more than new gadgets and material things," he said. "It gives people more choices on what to do with their lives."

Prochnow said we cannot assume that economic progress will dispose of all our problems.

"There will be serious problems of adjustment as we go along, such as temporary imbalances (as in agriculture today), the increased savings needed for public and private investment, and the shortening of hours of work."

World economic growth will have several consequences for the United States, he said.

"Economic growth," he said, "may bring long-term strategic shifts of power centers in the world since population and output do not everywhere expand at the same rate. Such shifts will probably lead Americans to realize, even more clearly than now, that we cannot work out our destiny alone."

Prochnow said one of the greatest consequences will be the expansion of world trade.

"As regions develop economically, they become bigger markets," he said. "We in the United States will be sending our products abroad in quantities much greater than those of today."

As national production rises, the expanding demand for raw ma-

terials will have to be met increasingly from overseas, he said.

He said there may well be the opening of larger and more appealing opportunities for Ameri-

cans to carry their enterprise and investments to foreign countries. These investments in turn will contribute to faster development in the countries where they are made.

Air Tours

Air Tours to Omaha will be held every Wednesday afternoon, leaving at 12 noon.

The group will eat at the Hayden House in Omaha and tour various points of interest including the Weather Bureau and the Observation Tower.

Arrangements should be made with the Air-Age office, Room 200-A, Teachers College. The cost is \$3.

exceed that of the United States, he said, the absolute gap between us may widen.

"This situation will call for all the diplomatic skill and public understanding that we can muster," Prochnow said. "While economic progress is a necessary ingredient to improving the welfare of free men everywhere, it alone by no means assures the continued existence of a free society."

Prochnow said these economic forecasts are based on projections which suggest that world population and world production will experience unprecedented rates of growth during the next two decades.

These same factors are true in the United States, he said.

The sharp growth in American population, he said, will make it possible to reach tremendous economic heights in a comparatively short period of time.

He said it has been forecast that the gross national product, which is now approximately \$400 billion annually, can be expected to be above \$500 billion by 1965. It is predicted, he said, that there will be an annual outpouring of \$670 billion of goods and services by 1975.

A second factor which will make this growth possible is that there is no foreseeable exhaustion of

Pioneer Abstract Art In Exhibition

The University Summer Sessions office and the University Art Galleries will present a special exhibition of painting July 1 through Aug. 5.

The exhibition, entitled Pioneers in American Abstract Art, is being circulated by the American Federation of Arts. It consists of approximately 50 paintings by 18 artists, generally considered the forerunners of present day painting.

According to persons in the galleries, these artists are considered today to be leading American painters.
