Action by the Committee on Student Affairs followed a resolution which was submitted by the IFC requesting University clarification on its policy regarding social activities.

Colbert said Monday that the Committee on Student Affairs of the Faculty Senate would take into consideration the dispatch of the IFC when particulars are submitted.

"The doors are open for members of the IFC to present their case before the committee," he commented. "However, there are a number of questions we feel need clarification at this time and we must wait until word is received from the IFC before any definite comment can be made."

He said that the committee will

meet again after it receives further word from the IFC on the original charges.

Colbert declined to say whether members of the Committee had mentioned that charges of inconsistency in the social policies had ever been brought up before the committee previously.
