ENGINEERS

The demand for engineers experienced or graduate—for exceeds the supply. And, from now on in, you are going to be sought after more than a triple threat halfback for next year,'s varsity.

You will be promised many things (including the moon with a fence/around it), and for a young man just getting started these things are pretty hard

So, again, let's be frank. We at Farnsworth won't promise you the moon. (Although we are working on some ideas that may eventually get you there and back.) We are an old, young organization. Old, in the sense of being pioneers in the field of electronics. (Our technical director, Dr. Philo Farnsworth invented electronic television.) Young, by being the newest division of the world-wide International Telephone and Telegraph Corporation, devoting our efforts exclusively to research, development and pro-duction of military and industrial electronics, and

All of which makes Farnsworth big enough for stability and technical perspective, yet small enough for mobility, flexibility and recognition of the individual. Here you will be associated with and encouraged by a team of eminent scientists and engineers with many "firsts" to their credit in the field of electronics. Here you will be heard . . . not

We earnestly invite you to hear the whole fascinating Fornsworth story. We're pretty certain it will make the decision for your future easier.
