

# Ag College Has Varied Curriculum

On the peaceful Agriculture campus much work and fun is carried on. The curriculum of the Ag College allows a student to learn how to feed and butcher cattle, or how to cook and sew, and at the same time how to write themes and punctuate letters, and how to read and understand the principles of government.

There is an Ag Student Union, an Ag edition of the Nebraskan, and an Ag branch of the University of Nebraska Builders on the Ag Campus.

The College of Agriculture was founded in 1860 when the University was established by the State Legislature under an act providing for such a college. In 1872 the Regents ordered the college to be opened.

Students here may do research for teaching. On graduation from the College of Agriculture one receives a Bachelor of Science in Agriculture or Home Economics degree after successfully completing four years of work.

In home economics, courses are offered in food and nutrition, child care and development, clothing and textiles, institutional management, dietetics, economics, and housing and equipment.

Recently becoming a field full of opportunities is a combination of home economics and journalism. Publications demand nutrition and fashion experts and advisers.

Courses in physical and biological sciences, English, and the arts are required. Students select sequences that prepare them for the occupation they desire to enter.

The Agriculture Experiment Station is a branch of the College of Agriculture and is a research or fact-finding bureau. It serves the families of Nebraska, a valuable service in a primarily agricultural state, as well as numerous industries that are closely related to agriculture.

The function of taking new facts and methods developed at the Experiment Station to the farm people is carried out by another branch of Ag College — the Extension Service. This is a state agency and there are extension agents throughout the state. Information gathered in research laboratories in other states is also extended to the farm people by the Extension Service.

# 5-Year Course In Pharmacy

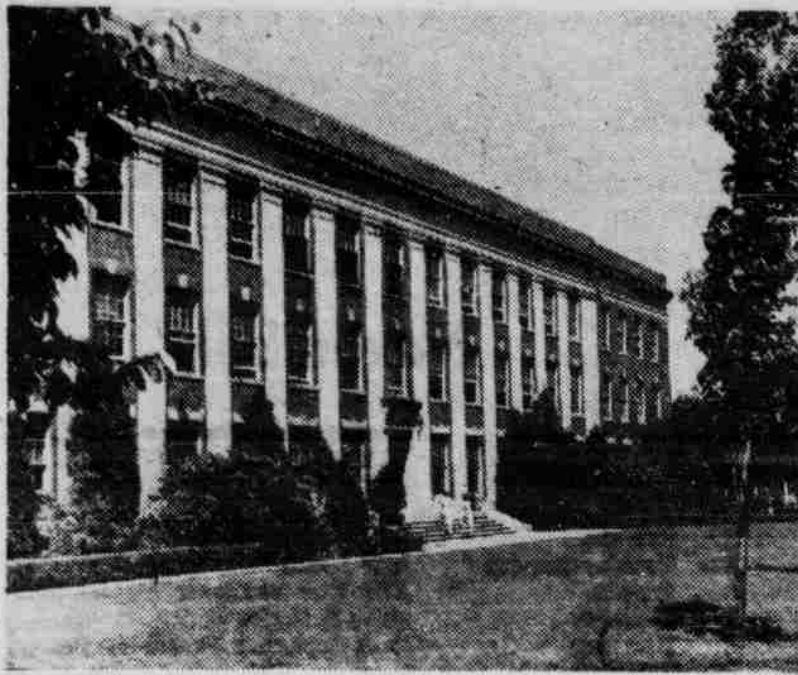

Students interested in the art of filling prescriptions may receive their degrees from the University's College of Pharmacy.

Starting in the fall of 1957, a five year program will be in effect. The first two years will be devoted to pre-pharmacy for the benefit of broadening the education and the last three years are devoted to 136 credit hours required for the present four-year program.

A new building is now under construction and it is hoped that it will be finished by the fall of 1957. This building will be a combination of Pharmacy and Bacteriology.

Graduate work leading to the Master of Science degree is offered through the Graduate College of the departments of the College of Pharmacy, with specialization in Pharmaceutical Chemistry, Pharmacology, and Pharmacy.

A graduate program in hospital pharmacy, leading to the Master of Science degree, is also available. This course requires two of residence beyond the Bachelor of science in Pharmacy degree and an internship in a hospital.

ANDREWS HALL is where the English and dental classes are held.

# Future Doctors Work 4 Years

The University's College of Medicine, which has operated in Omaha since 1902, had an enrollment last season of 360 medics, 90 new students and a full and part-time staff of 209. The entire four-year-course has been given in Omaha since 1913.

To enter the College of Medicine, a student must have at least three years of college work, or 90 semester hours in an accredited college.

As a junior and senior, he has his first opportunity to observe the effects of disease, the treatment and subsequent progress of individual patients. His chance to apply his gathered knowledge comes in the following two years of internship.

### 8 Years In All

The young med student who receives his degree from the College of Medicine will leave behind him four years of medical study. However, he will be directing the information and experience gained from these four years toward four more years of post-graduate preparation.

The degree of Doctor of Medicine is granted under the following conditions: 1. The candidate must be at least 21 years of age. 2. He must possess a good moral reputation. 3. He must have complied with all the requirements of admission. 4. He must have pursued the study of medicine for at least four years and must have passed all required courses and examinations of the College of Medicine. The last two years of work must have been taken in residence. 5. He must have written an acceptable paper on an examination posed by the Examination Committee at the end of the senior year. 6. He must have written and presented an acceptable typed senior thesis. 7. He must have discharged all indebtedness to the University of Nebraska.

### New \$25 Million Center

The University College of Medicine is growing with the addition of a new \$25 million medical center. This center will include nine buildings when completed. Part of these buildings will be financed by the University and the rest by private firms. This building program will put the University's medical facilities on a par with those of other leading schools in the Midwest.

The degree of Doctor of Medicine cum laude may be conferred upon a student who has made a high scholastic record and who, in addition, has in the course of his medical studies performed some original research that has been published or is in preparation for publication. Such a student must be recommended by the department in which the original work was done. Usually he must stand

in the upper 10 per cent of his class.

Alpha Omega Alpha is a medical college honorary society in which membership is based upon scholarship and moral qualifications. Elections are made from the students who have completed nine or more quarters of the four-year medical curriculum and are by unanimous vote of the active members of the chapter.

Probably for the first time in the history of this University, one whole class got a complete mental picture of the situation at hand. As roll was being called in P.E. 63, a dance class composed of both sexes, one girl answered from the dressing room stairway, "I'm here but I can't come out. My—my zipper broke."

# American Dental Ass'n Ratifies Dental College

Nebraska's College of Dentistry is fully approved by the Council on Dental Education of the American Dental Association and is a member of the American Association of Dental Schools. It was first known as Lincoln Dental College and was founded in 1899. In 1904 it became part of the University School of Dentistry. It became a separate college in 1918.

Admission to the College is based on the quality of the applicant's work in his pre-dental courses and liberal arts courses, his character, his personality, and his aptitude for and interest in the study of dentistry.

In recent years, a large percentage of applicants for admission has necessitated presenting a comprehensive pre-dental program. A student may complete his specific pre-dental requirements within a two-year period.

Requirements include 60 semester hours exclusive of physical education and military science, and specified grades and hours in such courses as zoology, chemistry, and physics.

If a student desires, he may submit his application to the College of Dentistry after he completes the two-year requirements. All students are also required to take aptitude tests after they apply for admission.

The quota is limited to 32 freshmen.

After receiving a notice of acceptance for admission, the student is required to make a deposit of \$25 which will be applied on the cost of tuition for the following academic session. It will be forfeited if he fails to register for that session.

Each student who enrolls in the College of Dentistry pays a fee of \$355 each semester. This covers the major expenses for the period.

All required textbooks, dental instruments, and materials are loaned for the student's use during his four-year dental training. Upon completion of the course and the conferring of the D.D.S. degree, all textbooks and instruments become the property of the student.

Omicron Kappa Upsilon is the honor society of the Dental College. Alpha Alpha chapter was chartered at the University in May, 1929. Election to this society is based upon scholarship, conduct, and data gathered by the faculty and recorded on a character analysis chart.

Degrees which may be received from the Dental College are Doctor of Dental Surgery, Master of Science in Dentistry, and Bachelor of Science in Dentistry.
