Symptoms Of Flu Reported At NU

By BOB IRELAND
Chief Copy Editor

Student Health reported patients Monday who had symptoms "highly suspicious" of Asian Flu, according to Dr. Samuel Feunung, director.

Although nothing definite had been established as of Monday afternoon, Dr. Feunung stated that the cases "make us feel" that they are of the Asian Flu category. "The next few days will be fair-

ly indicative of just exactly what we're dealing with," Dr. Feunung said.

Dr. Feunung reported that should a flu epidemic outbreak occur it will "spread rapidly". There have been "no major outbreaks in any of the houses so far," Feunung commented.

"We have had no shipments of flu vaccine since September 5," Dr. Feunung reported. "We were promised a shipment around the

first of October but so far nothing has come through," Dr. Feunung stated.

If there is an epidemic at the University it will spread before any newly-shipped vaccine will be effective, Dr. Feunung said. "It takes ten days for a person to be immunized," he added.

Dr. Feunung reported that the Student Health Center has been receiving cases of the flu "right along this year" and that all had "similar symptoms." He added, however, that none of the cases before turned out to be of the Asian type.

Complete laboratory analysis will have to be made before a definite conclusion can be made regarding the presence of an Asian flu virus on the campus.

Should a shipment of flu vaccine arrive within the next few days, Dr. Feunung stated that inoculations would begin immediately. Students, as this year's procedure has been, will be vaccinated on a priority basis.

The papers have stated that the vaccine supply will be in "great abundance" by the middle of October, Dr. Feunung explained.

Dr. Feunung stated he hoped that the flu cases on the campus would be "sporadic" in number.

A Lincoln medical supply company reported over the weekend that it is now receiving larger shipments of the flu vaccine.

People throughout the state have received almost unlimited inoculations from their family doctor or their local hospital it has been reported.

However, the state health director had complained on Sept. 22 that state and local departments had not been receiving their share of the vaccine.

A Public Health Service spokesman said Saturday that the disease probably has reached epidemic proportions in Alabama, Illinois, Michigan, and Oregon, and possibly has done so in California.

He explained that a decision on whether a disease has reached the epidemic stages in a state or local area is one of judgment on the part of state health authorities.

In 1954 Shapiro studied in Rome as a Guggenheim fellow and lectured on American poetry in India and Ireland during the next summer.

seminar at the University of Indiana in the summer of 1955.
