

Homecoming Finalists Revealed At Pep Rally

Five candidates for Homecoming Queen were revealed at Friday night's pep rally held in front of the Union. The five girls are:

Nadine Calvin, a junior in the College of Agriculture majoring in Home Economics. She is a member of Phi Upsilon Omicron, Alpha Lambda Delta, Home Ec Club and Council, Newman Club. She is AWS Board Secretary, a member of Tassels and is Scholarship Chairman of Love Memorial Hall.

Judy Chapman, a junior in Teacher's College, Tassels Notification Chairman, Secretary of Student Council, member of Builders Board, and Rush Chairman of Alpha Phi.

Judy Douthit, a junior in Teacher's College, a member of Union Board, Young Republicans, Tassels and Social Chairman of Delta Delta.

Karen Krueger, a junior in Teacher's College, WAA Secretary, past member of Coed Counselors Board, a cheerleader and rush chairman of Alpha Omicron Pi.

Barbara Lantz, a junior in Teacher's College, a member of

Tassels, Coed Counselors, Canterbury Club, University Theater, Student Council, and Scholarship Chairman of Alpha Xi Delta.

The candidates were presented by Jan Shrader, president of Tassels. The election of Homecoming Queen was held in the Union immediately after the pep rally at which an estimated thousand students voted. The Queen's identity will not be revealed until the half of the Kansas-Nebraska game, Nov. 2.

At the rally, Bill McQuistin, Yell King, commended students for the spirit and attendance. Dick Prusia, Husker co-captain of the Syracuse game called it the largest turnout he had seen at a rally in his four years at the University.

A committee consisting of Jan Shrader, Donna Sauveil and Marilyn Waechter, Tassels officers; Bill McQuistin, Yell King; Gordon Warner, president of Corn Cobs; Bill Hawkins, president of the N Club; and Dr. Donald Clifton, professor of History selected the five finalists.

A candidate for Homecoming

Queen "must be a junior with a 5.5 cumulative average.

"She must be a junior Tassels, active or pledge, or a substitution for the junior Tassel member submitted by the organization she represents.

"The five finalists shall be selected on the basis of school spirit, campus loyalty, leadership, service to the University, poise, and character," according to the Tassels constitution. (Last year's queen was Jan Davidson.)

Homecoming Dance Tickets On Sale

Tickets for the 1957 Homecoming Dance Nov. 2, which will feature Duke Ellington's orchestra, went on sale today in the Union.

Price of the tickets is \$3 per couple. They are being sold by members of Tassels and Corn Cobs, co-sponsors of the annual dance.

The dance will climax Homecoming activities which will feature a football game with the University of Kansas, crowning of the 1957 Homecoming Queen and house displays.

Duke Ellington was called "one of the great traditions of Ameri-

can Jazz," in a recent article in Look magazine.

His orchestra was featured at last year's Newport Jazz Festival, and Look's article said of the performances, Ellington "emerged last year in a dazzling display of the old fire and verve that had made him great."

This year, Ellington has appeared at universities in Colorado and Minnesota, and made night club appearances at the Blue Note in Chicago, Birdland in New York, and Hotel Flamingo in Las Vegas. Jan Davidson was last year's Homecoming Queen.

Display winners in the men's large house division were Delta Tau Delta, first; Phi Gamma Delta, second; and Alpha Tau Omega, third. Prize winners in the smaller house division were Delta Sigma Phi, first; Acacia, second; and Theta Chi, third.

Alpha Chi Omega topped honors in the women's display division, with Delta, Delta Delta, second, and Sigma Kappa, third.

Stag Prize Recipients Announced

The All-university Stag was held Thursday night in the Union Ballroom. Door-prizes were given courtesy of Golds of Nebraska. The following were the prizes and winners:

Botany 500 suit (\$65)—Neal Hoagameyer
Michael-Stern topcoat (\$65) — Dean Przak
McGregor Surburban Coat (\$39.95) — Russ Swanson
McGregor Corduroy Suit (\$35) — John Fehrs

Pair of Bostonian Shoes (\$22.95) — Darren Althouse
McGregor Sweater (\$7.95) — Don Gibson
McGregor Ivy League Shirts (\$5.95 each) — Don Cross and George Welch

McGregor Weekender Sport Shirt (\$5.00) — Sam Panimura
Van Heusen vintage White Dress Shirt — Don Soucik

Other prizes were given but the names of the winners were not available at this time. Gary Briggs sold the most tickets.

NU Women's Residence Halls Organize

Upperclass students of the Residence Halls for Women have organized for the first time.

After one week of campaigning, the following girls were elected to head the organization: president, Myrna Soule; vice-president, Pat Erickson; secretary-treasurer, Dixie Lee Peterson; social chairman, Joyce Clark.

Except for the counselors living in the freshman halls, the majority of upperclassmen are living in Love Hall. Plans are now being made for dorm parties, hour dances and other social activities during the year.

Honoraries To Present NU Concert

Delta Omicron, Mu Phi Epsilon, and Sigma Alpha Iota, musical sororities at the University, will combine to present a concert Thursday at the Union at 7:30 p.m.

The public is invited to attend the program. There is no admission charge.

The concert will consist of baroque music, a style which extended from 1600 to 1750, the year of Bach's death. Combined chorus and instrumental groups will be included.

The program follows: Choral numbers — "Come Shepherd Swains," by John Wilbye, and "With Drooping Wings Ye Cupids Come," by Purcell, directed by Lois Watson with Cynthia Hansen as accompanist; "Prepare the Hymn, Prepare the Song," by Handel, and "O Jesus so Sweet," by Bach, directed by Beverly Pickering with Elaine Peterson as accompanist; and "Stabat Mater," by Pergolesi, with soloists Norma Bossard, Carolyn Boesinger, Myrna Mills, and Cynthia Barber, directed by Lois Ripa with Elaine Unterseher as accompanist.

Instrumental numbers — "Quartets," by Scarlatti, with Merewenna Ellison, Carol Ashbury, and Miss Bossard, violins, Elizabeth Blunn, cello, and Pat Erickson, piano; "Courante for Woodwinds," by Lully, with Gretchen Blum, flute, Gwen Chab, clarinet, Joy Schmidt, oboe, and Miss Mills, bassoon; and "Sonata," with Miss Blum, flute, Rogene Wunderlich, flute, Miss Blunn, cello, and Terry Smith, piano.

Missouri Migration Slated For Weekend

Migration to Missouri University this weekend will not be counted as an out-of-town overnight for women students, according to Karen Dryden, AWS vice president.

Anyone leaving before Friday must have a special permission slip from their housemother. Also women students should check the Dean of Women's office to see if their parents have given them permission for migration.

Students leaving elsewhere this weekend will be charged with an out-of-town overnight, Miss Dryden said.

Every woman student who goes to migration must be back by 11 p.m. Sunday. There is no permission for a Monday return.

A downtown rally will commence Migration preparations Wednesday night at 6:45 p.m., according to Bill McQuistin, Yell King.

The rally will start at Carillon Tower and will proceed to 16th Street from 16th to R street, R street to 15th, 15th to O street, O street to 13th. At that corner the rally parade will stop and the cheerleaders will lead the students in cheers and songs. The rally parade will then proceed to 13th and R street and then from R street back to the Union.

For the rally McQuistin said there is a possibility that Bob Reynolds, former All-American halfback, will be the guest speaker.

Migration to Missouri University at Columbia, Missouri, has not been officially endorsed by the University, according to Helen Gourlay, Student Council president, because the University cannot be responsible for any accidents or events. Miss Gourlay said that Student Council has endorsed Missouri as the site of official student migration this weekend.

There are still 550 tickets left for the Missouri-Nebraska migration game at Columbia, A. J. Lew-

andowski, athletic department business manager said.

At last year's migration to Colorado University at Boulder 6000 students participated. In 1955 migration was at Missouri.

In the past few years, the Tigers and the Huskers have run neck and neck in their long rivalry, splitting their wins and losses almost evenly. Since the rivalry which commenced in 1892, Missouri has won 19 and Nebraska has tallied 26 victories with three ties.

The bronze Victory Bell has been the trophy of the Missouri-Nebraska football classic. The bell now is in possession of Nebraska after last year's 13-14 Homecoming game victory at Nebraska.

The bell is presented at the half-time of every Missouri-Nebraska game to the school that won the year before.

At the end of the game the team will take the bell home with them.

The inscription on the base of the bell reads, "Tigers, Huskers, who win or lose gloriously."

Regents Approve Public Health Aid

Even the Nebraska swine population may have "runny noses" from the spreading Asian flu.

To check the possibility, University researchers are undertaking a project to determine if Asian flu virus has the capacity to establish itself in swine.

A \$5,000 grant from the U.S. Public Health Service will finance the work. The funds were accepted Saturday morning by the Board of Regents.

Dr. George Young, chairman of the animal husbandry department, said that Asian flu would not have a serious or widespread effect if it did penetrate swine. Studies show, he said, that flu viruses cause only a small part of respiratory illnesses among swine.

However, he explained, the most important consideration is the potential threat to man if the Asian flu virus should enter swine, lay dormant, and then break out some 10 to 30 years later.

In 1955, after extensive studies, Dr. Young and Prof. Norman Underdahl reported that 10 per cent of some 1,600 midwestern swine from 1949 through 1953 carried a strain of the virus which caused the 1919 flu epidemic.

He said, "This evidence of persistence of an influenza virus

among swine for perhaps as long as 35 years warrants consideration.

"An understanding of how the virus penetrates the animals and how these penetrations might be prevented in the future could serve as an aid in eventual control of epidemic infections," he said.

Other grants accepted by the Board included:

\$28,758 for undergraduate psychiatric training at the College of Medicine from U.S. Public Health Service.

\$4,000 for study of availability of phosphorus compounds on the Nebraska Fertilizer Market, directed by Dr. Robert Olson of the department of agronomy, from the Nebraska Fertilizer Institute through the University Foundation.

\$2,500 for the study of dehydrated alfalfa as a protein supplement for fattening beef cattle, directed by Dr. J. Matsushima of the department of animal husbandry, from the American Dehydrators Association through the University Foundation.

\$2,500 for the study of availability of phosphorus compounds on the Nebraska Fertilizer Market, directed by Dr. H. F. Rhoades of the department of agronomy, from the Allied Chemical and Dye Corporation through the University Foundation.

Poultry Professor To Address Group

Dr. John L. Adams, chairman of the Poultry Husbandry Department at the Ag College will present a talk at the 23rd annual Nebraska Poultry Improvement Association convention Wednesday and Thursday in Lincoln.

Title of Dr. Adams talk will be "Nebraska—Egg Basket or Corn Crib." He also will be on a panel discussion.

Dr. Adams joined the Nebraska staff this summer. Before that he was a professor of poultry husbandry at the University of Wisconsin.

The event is open to all interested persons and especially to poultry producers.

KK Workers

There will be a meeting of all Kosmet Klub workers in room 306 of the Union at 7:30 p.m. next Tuesday according to Dave Herzog. Information regarding tickets and advertising will be given, Herzog said.

The three divisions of competition are men, women and honoraries. The parade will be led by the University band. Classes will be dismissed Saturday morning.

Austrian Literature

Nearly 200 books of new works of contemporary and recent Austrian literature have been presented to the University department of German and Germanic literature by the Austrian government. Dr. William Pfeiler, departmental chairman, shown examining the collection called the gift of great value to the department's library. The University was one of a select few to receive the gift, he said (U. of N. Photo.)

NU Theater To Present First Play

University Theater's first production of the year, "What Every Woman Knows," will be presented at Howell Memorial Theater at 8 p.m. Wednesday through Saturday this week, according to Dallis Williams, director.

A comedy by J. M. Barrie, the play reveals the secret role that women have in most prosperous marriages, but of which their unknown spouses are usually unaware.

This production is the first of five plays and operas planned this season by University Theater.

"What Every Woman Knows" tells the story of a husband who discovers during a fatuation with a beautiful countess that the demure and modest wife is really the whole spark and spirit of his success.

IFC Action Reviewed

The dean of student affairs Friday announced that the office has "reviewed and concurs with the action taken by the Interfraternity Council" concerning a hazing violation by Theta Chi fraternity.

Dean of Student Affairs J. P. Colbert said "no further action is contemplated" against the individuals or fraternity involved.

Lishner

A recording of ten Hebrew songs, sung by Leon Lishner, a baritone and associate professor of music at the University, was released this month by Columbia Record Company.

Courtesy Lincoln Star Miltzer

Dean Miltzer continued: "We have been referring to the launching as the greatest triumph

of man. It is a great achievement and I don't want to talk it down. But we have had many great achievements in science and in the triumph of human mind over matter which, to me, are just as important as the satellite, including the invention of the microscope or the first aerial voyage of man."

As another example, he listed the discovery of America by Columbus.

"In his days Columbus was opposed in his ideas that the earth was round. The belief that the earth was flat was actually a national law. Here Columbus was with an idea which many people opposed and thought was foolish; yet he embarked upon his idea that the earth was round and made it stick."

Dean Miltzer pointed out that the theory of the satellite has been known for 300 years, when Sir Isaac Newton developed the theory of gravity.

"If we had taken all the available resources and placed them in the hands of the members of the University physics department, they, too, could have launched the satellite just as well as the Russians."

Sputnik Views: Dean Exclaims Satellite Overestimated

A University dean said Sunday that in his opinion the launching of the first satellite by the Russians doesn't show a failure in American science and technology to keep pace.

Dean Walter Miltzer of the College of Arts and Sciences believes that the "furor over the satellite is the result of our overestimating the Russians and underestimating ourselves.

"All we know is that the satellite is in outer space. Why don't we give our scientists a chance. Perhaps, they are working on many things which eventually may be worth more to us than the satellite."

Speaking on the University's weekly radio program, "Your University Speaks," the physical scientist also regretted that the public considers the launching as a part of a race.

"If we had concentrated all our time and scientific resources on the satellite and the Russians had done the same — which they might well have done — then perhaps they have won a race. But I don't think we have done this."

He felt that we could have looked at the launching more calmly

and in a proper scientific perspective if the satellite had not been attached to the international arms race.

Dean Miltzer continued: "We have been referring to the launching as the greatest triumph

Courtesy Lincoln Star Miltzer

of man. It is a great achievement and I don't want to talk it down. But we have had many great achievements in science and in the triumph of human mind over matter which, to me, are just as important as the satellite, including the invention of the microscope or the first aerial voyage of man."
