### **Editorial Comment-**

## **Aid for Education**

Tuesday is the traditional day for big elections in the United States. Many Nebraskans believe that this year's big one came on a Tuesday early in November when the Republicans through out the state woke up grinning and went to bed early the next morning frowning. There is little doubt that discontent for the Republican way of things was made known that day when Donald McGinley, Lawrence Brock, Richard Larsen and Ralph Brooks -although a few foggy-eyes souls have refused to admit it-won out over Republican opponents.

This Tuesday may, over the long haul, prove almost as important to Nebraska citizens. This is the day when the Nebraska State Board of Education may say "yes" or "no" to federal aid from the National Defense Education Bill of 1958. Local school boards have been polled to determine their stand on the issue. The results has been about 130 for and about 150 against. The weight swings in favor of participation, however, when one realizes that Omaha, Lincoln and Hastings, leaving out only one of the state's four largest cities-Grand Island, have voted in favor of accepting the aid.

W. A. Schindler, consultant in school administration in the State Department of Education, and Cecil Stanley, director of

the division of vocational education, have been busy these past weeks devising plans for the state's possible participation in the act. Wesleyan and the University of Nebraska have already decided to participate in one area of the plan, matching funds from the federal government for loans to students in institutions of higher education. These men now are working on problems of the high school plans, where the bill would provide matching funds for assistance for strengthening mathematics. science, and modern foreign language; for guidance, counseling and testing, and for area vocational education programs.

There is no way for Nebraskans to avoid paying tax funds to the federal government to support this program. It would be silly for the state to pass up a chance to bolster curriculums of Nebraska schools. The cries of federal control are senseless, Title I of the act "sets forth Congressional findings and policy declaration and prohibits federal control over the curriculum, program of instruction, administration, or personnel of any education institution or school system participating in the National Defense Education Act." A "yes" from the State Board of Education would give Nebraskans another important Tuesday in 1958 and improved schooling for years to come.

> It's things like this that we don't ever want to change.

. . . by judy truell history room in the first place? Do the dent students still look like the most professional group on campus when they gather in a whitecoated cluster around the coke machine in Andrews Hall.

Can you still, if you sit inside the Union door, eventually see every person you know? Does the Union still sell coffee for 10 cents a cup? Do the professors still eat upstairs in the Union and do they talk of men and things or do they talk of storm windows and tire chains? Do the engineering buildings continue to be the male refuge that they are or have women infiltrated their hallowed halls? Can you still wander freely through Morrill Hall and see student-paintings must be missing something. that you like above anything you have ever seen?

> In short we don't want our University to change because then we will no longer feel so close to it.

Actually this has been one long beat-the-drum campaign to arouse feelings of intense loyalty for the old school for basketball games.
