# No Holiday Today, Cats Win

HERSCHELL TURNER reaches skyward as he grabs rebound from 6-6 Ced Price and 6-4 Steve Douglas in second half action under the Nebraska boards. The shorter Nebraskans managed to snatch 48 rebounds to 32 for Kansas State.

## Mid-Year Graduating Class Largest Since 1952

**Regents:**  
**College Shopping Fee Set**

### Degrees Granted To 406

Four hundred and six students were graduated from the University in Saturday mid-year commencement exercises.

The mid-year class is the largest since 1952, with 61 more students receiving degrees than last year.

Two engineering students and one coed in the College of Arts and Sciences were conferred degrees "with high distinction," the University's highest honor for scholastic achievement.

The three are Marion Wright, Ned Lindsay and Alexander Peters.

Eighteen other students received degrees "with distinction."

Both engineering students have averages of nearly 90. Lindsay, an electrical engineer, and Peters, a mechanical engineer, were graduated at the top of the 98-member class of the College of Engineering and Architecture.

Miss Wright was elected to Phi Beta Kappa, top scholastic honorary society for Arts and Sciences students.

Students who were graduated "with distinction" include Jacqueline Higbee, Michael Smith, Natalie Anderson, Robert Dolezal, Lewis Parent, Gordon Warner, Vernon Schoep, Don Sorenson, Donald Hide, J. M. Tarvin, Myrna Grunwald, Kenneth Berns, Judith Chapman, Sandra Foell, Patrick Mallatt, Larry Perkins and Karen Sukovaty.

Chancellor Chester Alter of the University of Denver was the principal speaker at the commencement exercises. Chancellor Clifford Hardin presided while A. C. Breckenridge, dean of faculties, served as master of ceremonies.

Gary Frenzel, senior in the College of Engineering and Architecture, introduced the speaker, and the Rev. Robert Heydon, pastor of Second Baptist Church, was chaplain. Norman Riggins was soloist.

### Terry To Address Young Republicans

State Sen. Terry Carpenter of Scottsbluff will be the main speaker at the University Young Republican's Wednesday.

He will discuss problems concerning Nebraska Republicans. The meeting will be held at 7:30 p.m. in the Student Union.

### Clarinet Jobs Open

Several clarinet positions are open in the University band, according to Don Lenz, director. Lenz will handle applications for the positions.

By Randall Lambert  
There was a quiet hush over the Husker dressing room. The only noises present were the low murmur of voices and the running showers.

Absent was the loud shouting and backslapping that accompanied the Nebraska victory over Kansas State last year. The hallway leading to the swimming pool was dark. Last year the Huskers had been charging down the hall and jumping into the pool, clothes and all. No, this was nothing like the dressing room of last year.

#### Lost to Best

The Nebraska team had been beaten by one of the nation's finest, if not the finest, quintets and had lost no respect in the loss.

Coach Jerry Bush was the image of the atmosphere in the room when he said, "I was proud of the boys tonight. They made a few mistakes, but they did what I told them. They lost

to a real good team tonight."

Most of the team was quiet as they dressed in a hurry and left the Coliseum. Herschell Turner signed a few autographs, while around the corner outside the Kansas State dressing room a happy Tex Winter told reporters he wished he had a guard on his team the likes of Herschell.

George Swank was congratulated by Bush for his rebounding prowess as he left for home. Swank captured 10 rebounds after coming in for John Cahill early in the first half. Big George also hit for eight points.

#### Cheerleaders

When Nebraska's cheerleaders started a "Beat K. State" chant at the beginning of the game, the Wildcat cheerleaders responded with a "Beat Those Cornflakes" response. However, they were soon drowned out.

Coach Tex Winter of Kansas State is famous for drinking about half his team's drinking water during the game. This time the fiery Wildcat mentor didn't touch a drop. Neither did his basketballers.

Late in the second half a Husker fan who was sitting behind the Wildcat ei-

ther made too much noise or said something that raised the Wildcat coaches' dander because they immediately asked for silence or his ejection from the game. After a brief consultation between the opposing coaches everything was restored to normal.

## Off-Campus Class Bill Sent to Unicameral

### Junior College Instruction Also Boosted

### Kellogg Fund Gap Narrows

Only \$70,000 remains to be raised in the \$1.1 million fund drive for the Nebraska Center for Continuing Education.

The University needed to raise \$1,142,000 in order to accept a \$1.6 million grant by the W. K. Kellogg Foundation for the \$2.6 Center.

#### Bond Approved

Of the sum, \$1,034,000 was raised by the Dec. 31 deadline with the remaining \$108,000 being approved in a \$350,000 bond issue by the Board of Regents.

Chancellor Clifford Hardin said that the Regents hoped the remainder could be raised so the bond issue would not be necessary. To date, \$38,000 of \$108,000 has been collected, leaving \$70,000 to go.

#### March Beginning

Construction on the Center is scheduled to begin in March with the completion expected in 1961. The Center will be located on the University's College of Agriculture campus.

Recent contributions include a \$4000 gift by the Nebraska Highway and Heavy Chapter of the Associated Constructors of America.

### YW Mass Meet Set Tuesday Eve

YWCA will hold a mass meeting tomorrow night at 7:30 in the Lutheran Student House basement.

A report for the National Students Assembly will be given and sign-ups for second semester groups will be held.

#### Authority Denied

The University has not been holding off-campus classes since last year when an attorney general's opinion revealed the school had no legal authority to do so.

Prior to that time, off-cam-

pus classes taught by University professors were held regularly. During the last semester of the 1957-58 school year, 39 classes were held in 29 Nebraska towns outside of Lincoln.

pus classes taught by University professors were held regularly. During the last semester of the 1957-58 school year, 39 classes were held in 29 Nebraska towns outside of Lincoln.

The bill introduced Monday, LB 387, specified that the junior colleges must bear the expense of University instruction.

#### Contract Basis

The bill authorized the Board of Regents to furnish instruction on a contract basis at duly constructed junior colleges throughout the state.

Senators Marvin Lautenschlager, 30th District, J. O. Peck, 26th District, and David Tewes, 15th District, introduced the bill.

Chancellor Clifford Hardin's approval of the bill was expressed in a letter to Senator Lautenschlager concerning the proposed legislation.

The letter read in part: "The University of Nebraska believes this bill a service which it should be authorized to perform. It is an assignment we are willing to accept and one which we believe we are able to do and do well."

"Our interest in this legislation is based solely upon the hope that it might provide greater educational opportunities for youth of the state wherever they may be."

#### One Dissenter

LB 380 had been previously approved by the Education Committee by a 5 to 1 vote.

Senator George Syas of Omaha voiced the dissenting vote. He said he felt an amendment should be added requiring the University to have the approval of colleges and universities in the towns where they held off-campus courses.

Such an amendment had been proposed to the committee by Dr. Donald Emery, dean of the College of Adult Education at Omaha University.

LB 380 was advanced with an emergency clause, allowing it to go into effect immediately if passed rather than after the usual 90-day waiting period after unicameral adjournment.

**Nebraska Skies, Earth Featured**

"Star Pictures of Winter" depicting Nebraska's skies is the subject of the Mueller Planetarium Show in Morrill Hall.

Visitors will also be taken on an imaginary trip to the center of the Earth and the explanation of the four seasons will be given.

The new show will be held Tuesday and Thursday evenings at 8 p.m., daily Thursday through Saturday at 2:45 p.m., and Sunday afternoons at 2:15 and 3:30 p.m.

### \$12,000 Nuclear Test Equipment Grant Received

A \$12,000 grant for buying equipment for training in nuclear technology has been received by the University.

Awarded by the U.S. Atomic Energy Commission, the money will be spent for equipment consisting of radiation detection, monitoring and counting instruments.

With the new equipment, the departments of biochemistry and nutrition and agronomy will be able to offer jointly a proposed course in theory and techniques of radio-biochemistry which will be open to all areas in the University.

The grant was among the \$80,873 in teaching and research grants accepted by the University Saturday.

#### Sig Gam Eps Elect Harper

John Harper has been elected president of Sigma Gamma Epsilon, earth science national honorary fraternity, for the spring semester.

Other officers are: Ken Wehrman, vice president; John Allington, secretary; Bert Becker, treasurer; and Don Irwin, scribe.

FIRST DAY of classes saw many students still going through the registration process of pull cards and "bear down, you are writing on five copies at once." Mrs. Carl Olson finds cards for (left to right) John Roze, Paul Sebesta and Gerald Voeks. (KAM Photo)
