

April 23:

# Open House Day Will Give Prepsters 'First Hand Look'

An opportunity for high school students to learn first hand about the educational facilities, programs and opportunities at the University is being offered April 23.

In addition to E-Week and Science and Agriculture Day, seven departments of the University are holding open houses at this time under the sponsorship of the Student Council All-University Open House Committee.

### More Opportunities

Jack Nielsen, co-chairman of the open house said, "For several years high school students have had an opportunity to visit E-Week and Science in Agriculture Day.

"The All-University Open House Committee is sponsoring open houses for students whose interests run to other study areas to visit the campus."

Departments sponsoring open houses are art, anthropology, Geology, Journalism, pharmacy, chemistry, Botany, zoology, bacteriology and

### Indian to Give Inter-Vars Talk

Rev. Bakht Singh, Bible lecturer of India, will speak at the Inter-Varsity Fellowship Thursday.

Educated in India and Canada, Rev. Singh's talk will be at 7:30 p.m. in rooms 315 and 316, Union.

His visit to the United States and Canada is under the auspices of International Students, Inc.

## Don't Break that Camera; Try these Photo Hints

The photo bug will be hatching soon and if you're not immune to its bite, try a tonic guaranteed to give you more pleasure out of every picture.

Ray Morgan, assistant professor of journalism at the University and an expert photographer, offers these timely tips to snapshot artists who want to quit snapping and start taking good pictures:

1. Buy a camera with a fixed focus lens. This reduces your chances of getting a blurry negative. It also soothes your frustrations when you can't find the right thing-a-ma-bob to turn on the camera.

2. Read the directions that come with the camera and film for information about exposure, distance, etc. If that doesn't work, bother the salesman who sold you the camera.

3. Use a film that is "medium fast." High speed film should not be used in cameras equipped with a slow-speed lens. Failure to heed this advice will result in over-exposed negatives and no pictures.

4. Learn how to use available light. Never point the camera at the sun. It isn't polite and the consequences are

disgusting. Sunlight should be to the side at a 45-degree angle.

5. Pay some attention to the background and foreground. When your subjects have fence posts standing on top of their heads or tree limbs sticking through their ears, it's time to yell "cut" and rearrange the scenery.

6. Make sure your subject fills up the camera's viewfinder. In other words, don't stand 600 yards away (or even 60) and expect to get a good picture.

7. Hold the camera steady during exposure. Flinching often causes accidental decapitation of your subjects.

8. Note the conditions under which the picture was taken. Ability to tell the man who processes your film that the fog in the picture really isn't fog may help clear up some mistakes you've made in handling the camera. Include the time of day, season, weather conditions, etc.

Now you're ready for that vacation trip. If you have photography troubles, however, don't toss the camera off some lofty ledge. Prof. Morgan reminds you:

"It's not the camera that's at fault, it's the fellow behind it."

Pharmacists from Nebraska attending the two-day seminar at the Union will also hear from Jouis Fischl of Oakland, Calif., president of the American Pharmaceutical Association; Frank Sojat of Kansas City, Mo., district supervisor of the Federal Bureau of Narcotics; P. A. Donnelly, manager of the sales training department of Eli Lilly and Company of Indianapolis; and Dr. Joseph Burt, dean of the College of Pharmacy.

Dr. James Tollman, Dean of the University's College of Medicine in Omaha, predicted Monday that "24 million people in the United States will die of cancer."

Speaking at the annual Spring Pharmacy Seminar at the Union, Dr. Tollman said that the present method of treatment can help only about one in every three persons afflicted with cancer.

"At the present time, 40,000 different chemicals are tested each year with the hope of finding out just one that can be effectively used," he said.

program that visits to other open houses will not be feasible," Nielsen said.

Those who are coming for Engineers Week, however, will have free time during the day for a visit or two to other departments," he added.

Open houses will be conducted between the hours of 9 a.m. and 5 p.m.

The All-University Open House was originally planned for the Friday before Spring Day, but due to scheduling difficulties was planned a week earlier on April 23.

### Pre-Easter Fete Planned Sunday

An annual Pre-Easter breakfast will be held at the Ag College Activities building at 7 a.m. Sunday.

The program will feature Dr. Gustave Ferre, dean of the Cotner School of Religion, and the Ag College Chorus will perform.

The \$8.00 tickets can be obtained from members of the Ag YWCA or at the Ag Student Union.

## Outside World

### Missing Pilots Arrive

Two pilots, who had been reported missing, arrived in Bangkok, Thailand yesterday. The two had been reported missing between the Azores and Lisbon a week ago.

### Iraq Revolts

Nationalist rebels in Iraq claimed their army is marching on Baghdad to crush the Communist-influenced government of Premier Abdel Karim Kassem.

Kassem's planes bombed Mosul, seat of a revolt led by Col. Abdel Wahab Shawaf.

Unrest in Iraq had broken into rebellion some eight months after Kassem led the coup that killed King Faisal in July of 1958.

### Students Return

Attendance is up at Lincoln High as students return from a flu siege that brought absenteeisms to large figures last week.

### Man of Many Hats

British Prime Minister Harold Macmillan, who donned a fur hat for his Russian visit, has selected the derby for his US visit. Macmillan's headwear during a recent trip to Ireland was a cloth job.

### Wedemeyer Cautions

Lt. Gen. Albert Wedemeyer has recommended that Americans not be fooled if the Russians try to ban use of nuclear weapons.

This would put the western powers in a very vulnerable post, the retired General said.

## WHO SAID IT FIRST?

A column of incidental intelligence by Jockey brand

### "LOVE IS BLIND"

Next to the Bible, Shakespeare is the richest source of common quotes. He's responsible for this one, too. See his "Merchant of Venice," Act II, Scene 6:  
"But love is blind, and lovers cannot see  
The petty follies that themselves commit."

### "THIRTY DAYS HATH SEPTEMBER," ETC.

No need to recite further from this bit of doggerel which has served us all as a pony ever since grade school. For this universal handy reference we are indebted to a man named Richard Grafton who was nice enough to compose the rhyme way back in 1570.

### "PUT IT IN YOUR PIPE"

No, Sir Walter Raleigh didn't originate this smoker's challenge. It was R. H. Barham, in "The Lay of St. Odille":  
"For this you've my word,  
and I never yet broke it,  
So put it in your pipe,  
My Lord Otto, and smoke it."

### Jockey T-Shirts

The most respected, creative name in underwear is Jockey brand. It stands to reason, then, that Jockey brand T-shirts are unmatched for quality as well as styling. You can choose from standard T-shirt, "taper-tee" shirt, sleeveless T-shirt, and V-neck T-shirt models. Every man needs a drawer full of T-shirts—and the label to look for is Jockey brand. Let it guide you to the world's finest underwear.

## Do You Think for Yourself? (HERE'S A TEST THAT WILL TELL YOU! ✱)

- Can you honestly say that you've made an effort to understand modern art? YES  NO
- If you were to break a New Year's resolution, would you renew it on the spot rather than wait until next year? YES  NO
- Would you be unwilling to play a single game of "Russian Roulette" for a million dollars? YES  NO
- Are you fully convinced that the saying "Money does not buy happiness" is completely true? YES  NO
- Would you be at all hesitant to rent a desirable apartment where the previous occupants had died under mysterious circumstances? YES  NO
- If you were walking to town in a hurry, would you be unwilling to accept a ride in a garbage truck? YES  NO
- Would you be reluctant to participate in an important medical experiment which, though not dangerous, would cause some discomfort? YES  NO
- If you had an independent income sufficient for all your needs, could you be happy never to go to work? YES  NO
- Can an extravagant claim make you switch from one filter cigarette to another? YES  NO

The truth is, thinking men and women aren't influenced by extravagant claims—especially when choosing a filter cigarette. They use their heads! They know what they want. They know that only VICEROY gives them a thinking man's filter... a smoking man's taste.

\*If you have answered "YES" to three out of the first four questions, and "NO" to four out of the last five... you certainly do think for yourself!
