#### **Editorial Comment:**

# Proposed Eppley Institute Points to New Progress

The announcement that an institute for research in cancer and allied diseases will be built at the University College of Med-icine in Omaha is a very important one to this institution.

Financed by funds from the Eugene C. Eppley Foundation, the U.S. Public Health Service and the University's medical levy, the \$1.8 million structure will begin to rise

What does the construction of the Insti-tute mean? Chancellor Clifford Hardin seemed to hit the nail on the head. He said the Institute will be "one of the most important educational and medical seeds ever planted in Nebraska."

Intended accomplishments are threefold: to gain a better understanding of the causes of cancer and allied diseases; to assist in the improvement of methods for treatment and prevention of cancer and similar disorders; and to assist in the im-provement of methods for diagnosis.

Cancer clinics and seminars will be held there making available to area physicians and medical students-some of whom will benefit are attending classes on this campus now-news of advances in research and treatment of cancer.

The program insures for the state of Nebraska an outstanding anti-cancer program and insures strengthening of the cancer-related phases of the state's medi-cal education program.

Besides the prospects of advancement for mankind, construction of the Institute will gain the University recognition not only in the Midwest but throughout the

To the Eppley Foundation must go gen-erous thanks. And to the future staff of the Institute, the best of luck in finding a cure see.

In less than a month's time, hundreds of

## For the Trio. Brubeck, Thanks To the Cobs

For those who like jazz a la Brubeck, the Corn Cob sponsored concert May 12 at Pershing Auditorium is a real boon.

Tickets for the performance are at very reasonable prices-75 cents and 96 cents for students who can show ID cards, \$1.50 and \$1.90 for others.

The Brubeck concert will of course be the second sponsored by the Cobs this semester. Several months ago, the Kingston Trio was brought in and a good-sized crowd enjoyed their performance-after Johnny Mathis cancelled out.

The Cobs didn't make money on the Trio's visit, but they're coming back with another fine group with appeal for a large chunk of the University audience.

For this, they should be commended. Although the Cobs wouldn't have to sponsor appearances of groups like these, they are: although they may lose money again on the Brubeck appearance, they are willing to, in order to sponsor an evening of entertainment a lot of us will enjoy.

No doubt there is a lot of work and a lot of worry connected with such a project, but the Cobs seem to thrive on it. It seems like the group is going "above and beyond the call of duty" in promoting these appear-

so well on the exam that

she told the class that they

must have cheated; so she

didn't count the grades. Oh,

those foolhardy stu-

dents who scored well be-

From the files of the sec-

ret police of Social Science,

there comes the case of the

missing test. If instructors

are going to leave tests ly-ing where students can look

at them or be too lazy to

make up two tests for two

sections, then they must be

suggesting that we cheat, for they know that there

are always a few of the

low caliber in every group.

But then there seem to

be a few professors who

haven't been properly in-doctrinated in university policy and are actually

shocked to discover cheat-

ing. They are innocent

souls, however, and simply slap hands and punish the entire class, as would a high

school teacher. But the pro-

fessors can't be expected to treat college students as

adults - after all, it will

still be a year or two be-

fore they become "the leaders of tomorrow."

Let's all cheat. It's the most popular fad of the an instructor gave the same University. Since the rehour exam to her eight quirements and standards o'clock and ten o'clock secof this institution are ristions. The latter section did ing, I sup-

the University must

Else Why is everyone complaining about the fact that the student who sat in for a friend on an hour exam did not receive a more severe punishment than conduct probation? Think of the benefits to education that this provides. Now we can have a 'well-rounded" education. Now we only have to study half of our courses which should give us the time to be active and the "apathy" of the campus will soon disappear. Now activities will thrive and the campus will surge ahead.

This is received with joy

Besides, the instructors

### Counsel Is Needed To Protect Student expect it, and they shouldn't there was the case in which

This is the third in a series of articles discussing the operation of the Sinderi Tribunal, featuring an interpretation of that body's procedures by Day Rodrey. Daily Vehrashan copy editor and former vice chairman of the Tribunal.

By Doc Rodgers The two previous articles in this series have alluded to a certain rountinism of student conduct cases. Only a few cases leave the question of guilt yet to be resolved.

In the majority of the cases the judgment is made only as to how guilty the student is. Does he (1) rate suspension (expulsion has not yet been resolved to), (2) deserve to be placed on conduct probation and if so for how long, or (3) merit conduct warning?
In those cases where the

## It Seems to Me . . . By Carroll Kraus better answer, but it seems to me that it's a good trend away from the all too hectic pace that thousands of young executives of the last few years have lived. And too, if security is replacing barnburning, perhaps this great country of ours will be saved from self-destruction and moral decay that just seems to naturally follow the quest for the almighty dollar. Philosophy is good for the soul.

Most seniors in ROTC have their assignments by now, at least length of duty, branch and location of initial assignments, My run-in with the Army placement service hasn't been too bright-infantry, two

Of course there are more muscular types who were gung-ho for infantry assignments, but yours truly didn't exactly have that in mind.

But they tell me in the infantry you get to see a lot of the countryside, and what's more, you walk over most of it.

Of course, things could be worse. I'm sure I wouldn't fit in too well in the engineering corps, even though I did take Math 14. Quartermaster Corps-well. 1 don't even know my shirt size. Armor-I'd probably get claustrophobia in a tank.

But the infantry does have a great tradition, they say, and is called the Queen of Battle. As General Bruce C. Clarke

"On any battlefield of the future, when the air and artillery bombardment lifts, you will see silhouetted against a rising, telitale mushroom cloud, the ground combut soldier emerge from his foxbole, rifle and bayonet in hand. He is the courageous soldier who, though exhausted, bearded, bloodled but unbowed, must advance another mile, fire another shot and carry the fight to the enemy."

And General Willard G. Wyman said

"Until a B-52 can occupy a city or a submarine take a hill, we will need men with their feet on the ground . . . The Infantryman will continue to be the conclusive element in war."

Perhaps so. Sir. but what if a big missile blows up said city or hill? They tell me the H-Bomb is mighty tough.
