

# Nearly New Shop Bargains Net Loan Funds

More than \$1,000 has been made available for student loans through the sale of used articles sold at the campus Nearly New Shop.

The loan money is the result of \$350 profit realized by the shop during the past school year. It has been matched on a 3-1 basis by federal funds under the National Defense Loan Act.

The project was originally begun at the University College of Medicine in Omaha to serve the large number of married students located there.

In 1958, under the leadership of Mrs. Lyle Young, the project gained momentum on the Lincoln campus.

**Closet First Shop**  
A closet in the Temporary G building provided the first home for the shop. Moving the items out of

the closet into the classroom each Thursday night proved burdensome, however, and the store was moved to its present quarters in Wilson Hall, 1610 R St. in February 1959.

Articles sold at the shop include such items as curtains, clothing of all kinds, lamps, drapes, dishes, pans and even refrigerators.

All are donated by students, area residents and members of the Faculty Women's Club which sponsors the project.

According to Mrs. J. C. Weaver, president of the Faculty Women's Club, married students and foreign students are the most frequent customers.

"However, all students presenting ID cards are welcome to purchase items," she added.

The shop is open from 7-9 p.m. each Thursday

night during the school year.

### New Price System

Originally, items were priced by a marking committee composed of members of the club, but this year each sales lady sets the prices herself.

"This results in some price variation, but because general rules of the thumb are followed and the items are sold as cheap as possible, it usually evens out," Mrs. Weaver noted.

Kickoff for donations for the shop will be a "bundle

tea" to be held for club members Oct. 12 at the home of Mrs. Clifford Hardin. Each member will bring a bundle of items to be sold in the store.

Persons wishing to donate items at other times throughout the year may

bring them to any Dames Club meeting or to the shop on Thursday evenings.

Anyone unable to deliver the articles to be donated may call either Mrs. Floyd Hoover, IV 8-1515, or Mrs. James Hansen, IV 8-3960, for pick-up service. Mrs.

Hoover is chairman of the Newly New Shop and Mrs. Hansen is in charge of pick-up.

Members of the Dames Club will serve as board members of the project this year as well as helping to clerk in the store.

Following the retreat of the Howitzer, Cadence Countesses, stand ready at attention for further orders.

### Controversial Cannon Receives Retreat Orders

Nebraska's controversial "spirit" cannon has once again received orders to retreat.

The Howitzer cannon, which was added to the University football scene to announce scoring by the Huskers, was originally placed behind the bleachers at the south end of the Stadium.

#### Retreat

At last Saturday's game the cannon was moved to the southeast corner of the Stadium at the edge of the track.

Immediately following Nebraska's lone touchdown, the cannon, plus its trailer, plus a jeep used to haul it, retreated back to the original site under orders of James S. Pittenger, assistant to the Chancellor.

"When it was agreed that the Innocents would have the cannon, there were several stipulations," explained Pittenger. First, the Innocents are responsible to the Army

for the supervision of safety, since the ROTC is familiar with the machine.

Second, the shells are to contain half charges of powder. The third stipulation is that the weapon be located so that the sound will be deflected away from the Stadium.

#### Press Box

On Saturday the cannon was shot from the southeast corner of the stadium toward the northwest corner. Some people were annoyed and the press box was said to have been shaken.

"The weapon may continue to be used if it is done in accordance with the stipulations," Pittenger said. "It is a good idea for spirit and fun during the game."

Safety measures are en-

forced by a non-commissioned army officer with two members of the University Varsity Rifle Club. Two members of Innocents also remain with the 75 millimeter Howitzer; it is one of these Innocents who actually fires the gun.

Four to five dollars is the initial cost of ammunition used in each discharge of the weapon. This cost is borne by the Athletic Department.

The Howitzer was requisitioned from the army and presented to the University; the Innocents Society received responsibility of it.

The gun originally cost approximately \$5,000. It is now obsolete and is usually used only for salutes to important persons. It was originally used in the horse artillery and airborne troops.

### NU STUDENT REPORTS:

## Desire for World Peace Present in Turkey

"Turkey wants world peace."

"World peace is completely possible if the Turkish people are representative of the world's population," said Janet Hanson who recently returned from a National YWCA trip to Turkey.

Miss Hanson's trip was a part of the Volunteers Abroad Program where she spent seven weeks as counselor in a YWCA camp on the Sea of Marmara. Every two weeks she had a new group to counsel at the camp.

Turkey has two distinct classes of people, the upper class and the lower class, stated Miss Hanson. The majority of the campers were from the upper class. Most of the upper class youth had studied English said Miss Hanson or else they brought

their own interpreters along. Miss Hanson said she was able to carry on a simple conversation in Turkish before she left.

Duties for Miss Hanson were much like those of an American summer camp. She was always the target of inquisitive campers, who questioned her about American dating, customs and government.

The U-2 spy plane incident occurred while Janet was at the camp. She said that most of the people were sympathetic with the United States.

"I was intrigued by an island that I could see from a distance," said Miss Hanson. "This is the island where 600 members of the ousted Turkish government of Menderes and Bayer are being

kept." They were awaiting their trials which were to occur in September.

"During my whole trip I was under the impression that Turkey and her people looked to the United States as an ideal," she commented.

**Combinations**  
Miss Hanson, who is also the University YWCA president, said the trip interested her to try to combine foreign exchange programs in her future life. While at a stop-over in Geneva, Switzerland, she investigated the possibilities of combining the field of diete.

Perhaps the most important part of the trip was getting to know the Turkish people and discovering that our likenesses are greater than our differences, she said.

There were only 6,684 students in 1952, the lowest figure for the past 14 years. He attributed this to the Korean war.

The totals increased again in 1953 and continued to rise until enrollment numbers fell from 8,425 to 8,134 in 1957. These figures have increased each year up to this year's second total.

The only large jump college-wise over the figures of a year ago was in the College of Arts and Sciences. The final tabulations show 1,778 students enrolled for 1960-61 semester as compared to 1,546 last year.

Engineering and Architecture, the second largest college, enrollment wise, recorded a jump of 29 this se-

sonal year.

Final enrollment figures show that more students are now going to school at N.U. than any semester since 1949, according to F. L. Nicolai, deputy registrar.

"We know two things for sure. We have about 8,700 students enrolled and there are more students now in school than we have had since 1949," Nicolai said.

This fall's registration figures rank fifth in the all-time chart. The top record was set in 1947 with 10,153 students. Second high was recorded in 1948 with 10,067 enrollees.

In 1946, the third highest number of student enrollments was recorded at 9,669. Fourth place in the total all-time chart was set in 1949 when 9,410 students signed to attend N.U.

Of the approximate 8,700 students enrolled for the first semester, 7,945 are on either the city or agriculture campuses. There are 442 students on the Omaha campus, 271 students at University high school and 210 students enrolled at the agriculture high school in Curtis, Nebraska.

Nicolai said that the high number of students in the middle and late forties could be attributed to the high influx of veterans and war workers. He explained that this heavy enrollment dropped sharply in 1950 to 8,051 and even more in the next two years.

**Korean Low**  
There were only 6,684 students in 1952, the lowest figure for the past 14 years. He attributed this to the Korean war.

The totals increased again in 1953 and continued to rise until enrollment numbers fell from 8,425 to 8,134 in 1957. These figures have increased each year up to this year's second total.

The only large jump college-wise over the figures of a year ago was in the College of Arts and Sciences. The final tabulations show 1,778 students enrolled for 1960-61 semester as compared to 1,546 last year.
