

Migration Nabs Cupid's Business

Plans for migration and homecoming temporarily overshadowed Cupid's activity this week. Only six pinnings and engagements were announced Monday night.

Pinnings:
 Anne Sowles, Delta Gamma junior in Arts and Sciences from Lincoln to Dave Calhoun, Phi Delta Theta senior in Arts and Sciences from Lincoln.
 Ruth Read, Pi Beta Phi sophomore in Arts and Sciences from Lincoln to John Weaver, Phi Delta Theta sophomore in pre-med from Lincoln.
 Jill Laverty, sophomore in Teachers from Valley to Charles Greenwald, Sigma

Phi Epsilon senior in Teachers from Henderson, Kentucky.

Julie Ferris, a junior in Teachers College and a member of Willard sorority at Wesleyan, from Central City to Richard Bringelson, a Farm House junior in Agriculture from Gothenburg.

Engagements:
 Carol Frey, Alpha Phi alum from Lincoln to Lowell Hansen, Sigma Alpha Epsilon senior in Business Administration from Sioux Falls, South Dakota.
 Kathy Walters, Sigma Kappa sophomore in Arts and Sciences from Alliance to Walter Carpenter from Alliance.

Joan Schultz, Towne Club senior in home economics from Lincoln to Richard Madden from Lincoln.

Hardin Gets Health Board Appointment

Chancellor Clifford M. Hardin was appointed as a member of the National Advisory Arthritis and Metabolic Diseases Council, it was announced today by Dr. Leroy E. Burney, Surgeon General of the Public Health Service.

Dr. Hardin, who will serve through Sept. 30, 1964, will advise and make recommendations to the Surgeon General and to the Director of the National Institute of Arthritis and Metabolic Diseases concerning the Institute's extramural programs.

These programs furnish Federal support to basic and applied research in medicine, biology, and other health-related fields by making funds available for such research and by investigation of specific problems in medical science.

The Council is comprised of 12 members who are prominent in science education, and public affairs. In addition, there are ex-officio members representing the Veterans Administration and the Department of Defense.

The Council meets three times a year at the National Institutes of Health, research bureau of the Public Health Service, in Bethesda, Md.

Splash Sessions For Aquaquettes

Practice sessions to learn the stunts necessary for aquaquette tryouts will be held Oct. 25 and 27 at the coliseum pool.

The stunts which are learned will be performed at membership tryouts Nov. 1 and 3. Those trying out will be judged on poise, accuracy and form.

- Parking Board, 5 p.m. 334 Student Union
- YWCA Foreign Student Noon Luncheon, 12 noon, Student Union
- Young Republicans, 7:30 p.m., Student Union

Nineteenth Century Toys, Dishes Displayed

Recently acquired turn-of-the-century dishes and toys are being exhibited at the State Historical Society museum for the first time this week.

"The three new displays have proved very successful with both collectors and the general public because people are interested in items which show how their grandparents used to eat and live," said W. D. Aeschbacher, director of the Society.

Many of the toys the children played with were miniatures of the objects of the day, such as these display trains, stoves and skillets, Aeschbacher pointed out.

"Probably the first children to play with toys in Nebraska were those who played with miniatures such as these found at Ft. Atkinson dating back to 1820," Aeschbacher said.

Ironstone, the "China of the sod house," is shown in an adjoining exhibit. It was patented in 1813 by Charles Mason of Fenton, England, and exported to the colonies throughout the 19th century.

Early settlers also decorated their dishes to look like gold, silver and copper, but it was so expensive only the wealthy could obtain it until John Hancock invented lusterware in 1769, Aeschbacher noted.

The lusterware exhibited at the Historical Society was excavated from Ft. Atkinson and includes a rare set of

six cups as well as several pitchers and a hot water pot.

"This lusterware was manufactured until the 1800's by coating the dishware with a translucent metallic oxide," Aeschbacher explained.

The new exhibits are located to the right directly from the reception desk in the entryway.

Canadian Film Shown Thursday

Canadian culture and art will be featured in the first of a series of art films to be shown in the Union auditorium Thursday at 5 p.m.

The hour long program will include two films entitled "Primitive Paintings of Charlevoix" and "Canadian Landscapes."

The art films, sponsored by the Union arts and exhibits committee, will be shown once a month. Each film program will feature a different country including Alaska, Greece, China and Russia.

Marriage, Money, Learning Make Up Average Coed's College Expectations

Coeds have three expectations for attending college said Dr. Helen LeBaron dean of the College of Home Economics, Iowa State University, at a home economics convocation yesterday.

These expectations are to find a mate, to have an insurance policy and to get a well-rounded education, she said. Dr. LeBaron added that

students must face the future and should consider their career and education.

Scientists predict that most college women will marry and will work outside of the home, Dr. LeBaron said.

She also said that most of the college coeds will have their youngest child by the time they are 26 and that their children will all be in school by the time they are 32.

Mothers tend to go to work when their children reach school age, she said. This accounts for the fact that nine out of 10 coeds will be working outside their homes after they are married.

Dr. LeBaron pointed out that women are becoming more important politically. She said that college students must prepare themselves for their part in the political majority.

Now that women have become more important politically, they also are beginning to travel more, Dr. LeBaron said. One out of every five will spend part of their lives outside of the United States, she said.

"Because you have attended the University, you will have higher quality in your family life," Dr. LeBaron said, adding that "home economics" students will have a market for their services. The home is the basic element in American life and any service related to home economics should definitely have a market.

Such a market should call for students to continue their education upon graduation. "Education is life and learning is a great experience, she said.

Graduate Group Plans Discussion

The emerging role of Sudan, Libya and Nigeria in today's world will be the topic of a panel discussion, this Friday at 7:30 p.m.

Sponsored by the Graduate and Professional Students Association, formerly the Graduate Club, the discussion will be held in rooms 232-234 of the Student Union.

All graduate and professional students and guests are invited to attend.
