

# Bazaar Features Gifts of World

The Indian Suite of the Student Union will turn into an International Fiesta next week.

Booths representing different areas of the world will display the gifts which add up to a value of over \$6,000.

International students on campus will be on hand to explain the items and tell the stories or legends behind some of the unique items.

Also on display, but not for purchase, will be international doll collections loaned by Lincoln collectors.

Prices range from 10 cent to fifteen dollars per item and the variety of items includes China, wood carvings, jewelry, boxes, linens, silks, rice straw pictures, paintings, hand painted dinnerware, decorative glass ware, puzzles, dolls, mechanical toys, stuffed animals, novelties, Christmas decorations, and traditional items from particular countries.

### Refugee Contributions

A group of refugee families in the Holy Land have sent hand made nativity wood-carvings, cane-train carvings, pearl covered New Testaments and other Mother of Pearl items.

B. J. Holcomb, who conducted the University European tour this summer, selected and purchased items for the bazaar as did Jan Hansen while in Turkey.

The event, which began five years ago with a small number of items made by the Y members and advisory board members, has grown to the \$6,000 display this year.

"All one's Christmas shopping for family and friends

could be done at the bazaar, said Susan Wood, chairman. "Even if one doesn't want to make any purchases, it will be fun to see the collections from around the world," she said.

### Special Coverage

Special radio and television programs are being devoted to the explanation of the event which involves many people in Lincoln and outside the city as well as the University students.

Some of the countries which will be represented include Israel, Japan, Philippines, China, Italy, Rumania, Poland, Egypt, Czechoslovakia, Norway, Denmark, Sweden, Holland, Germany, France, Belgium, Austria, Spain, India, Mexico, Africa, and the South Sea Islands.

The doors will open November 29 at 11 a.m. and be open on Tuesday, Wednesday and Thursday from 11 a.m. to 9 p.m.

Information concerning the items available may be obtained at the campus Y office. Also advance orders may be made there.

MADDEN

## Madden Is Junior 'FC' Pledge Queen

Lucy Madden was chosen as the 1960 pledge class queen at the Junior Interfraternity Dance Saturday night at Turnpike.

Approximately 1,000 people attended, according to public relations chairman John Zilinger.

Miss Madden, a Delta Gamma, was selected from the seven finalists selected last week. She was presented at intermission by Jr. IFC President Dennis Christie.

The finalists, Marilyn Hand-schuh, Kappa Alpha Theta; Sue Myers, Kappa Alpha Theta; Kilt Thompson, Kappa Alpha Theta; Ginger Van Horn, Gamma Phi Beta; Judy Jaspersen, Zeta Tau Alpha; Kayla Grueber, Alpha Phi and Miss Madden, all received charm bracelets with "IFC 1960" on them.

Decorations for the dance, which featured Bobby Layne's band, consisted of replicas of the University's fraternity and sorority pledge pins.

## LITTLE MAN ON CAMPUS

"I'M STUCK ON A HOMEWORK PROBLEM, FREDA. - COULD I STOP BY AND SEE YOU FOR ABOUT 15 MINUTES?"

## Campus Funds Needed For Christmas Display

The proposed all-University Christmas display will become a reality if enough funds are raised by campus groups.

The Council initiated project has caught the enthusiasm and support of the Student Union staff and many members of the administration.

### Resource Material

Al Bennett, Student Union manager appeared before the Council and reported on the available resource materials and special groups which would assist in the designing of a display and manpower to do the work.

Bennett noted that he was not necessarily voicing the thoughts of the Student Union but more of a personal feeling of the staff.

As a campus we are not doing much to add to the spirit of Christmas as far as outside displays are concerned," Bennett said.

Some of the help he promised included the use of a tool shop every day from 1 to 5 p.m., a person to help supervise construction, to elicit all of the unnecessary lighting for the display, art and design help and possible help in rounding up funds.

Funds, according to Neil Ferguson, chairman of the Student Council Christmas display, will probably come from the IWA, Panhellenic, RAM and IFC who would solicit funds from their respective members. With each house and hall donating around \$2 we could have around \$100 to \$150," he said.

### Supplement Funds

He noted that this amount would need supplement from outside sources in order to construct the proposed "Merry Christmas" sign and possibly other decorations outside the Student Union. Bennett told the council members that some alumni funds may be available.

"If we don't have the money we can't do anything."

## Engineers Will Hear Navy Officer

Captain J. E. Rehler, district public works officer for the United States Navy, will speak before a joint meeting of the American Society of Mechanical Engineers, the American Institute of Electrical Engineers-Institute of Radio Engineers and the American Institute of Civil Engineers on Nov. 30 in 217 Ferguson at 7:30 p.m.

The purpose of the meeting will be to acquaint the students with the Civil Engineer Corps of the Navy, especially those who have obligated military service and prefer to serve their duty in billets related to their chosen profession, according to a letter from Capt. Rehler.

The types of engineering graduates who are eligible for consideration for this program are those in civil, mechanical, electrical, architectural, mining, petroleum, electronic, nuclear, chemical and construction engineering, the letter said.

### Main Feature Clock

Varsity: "Inherit The Wind," 1:40, 2:11, 6:42, 9:13.  
State: "Fast and Sexy," 1:23, 3:24, 5:25, 7:26, 9:27.  
Nebraska: "Wild River," 1:00, 5:05, 9:10. "Waite Me When It's Over," 2:55, 7:00.  
Lincoln: "Butterfield 8," 1:10, 3:10, 5:15, 7:15, 9:15.  
Stuart: "Can Can," 2:00, 8:00 only.

## NU Male To Be Feted At Follies

### 'Collegiate Man' Title Parallel to 'Coed'

A male student for the first time will be honored as "Outstanding Collegiate Man" at the 1961 Coed Follies.

The "Outstanding Collegiate Man" will be parallel to the Ideal Nebraska Coed.

Candidates must be of junior standing and will be selected on the basis of scholarship, leadership, service to the University, and attitude and personality at the interview.

Each organized house will submit one candidate and Seven finalists for each title will be chosen by an interviewing board.

This is a change from previous years when two candidates from each house were interviewed for Ideal Nebraska Coed, and five finalists were selected.

Coed Follies, which is sponsored by AWS, will take place Feb. 24 at 8 p.m. in Pershing Auditorium. Finalists for the Cornhusker Beauty Queens and Eligible Bachelors will be presented at this time.

The title "Bells on Their Toes" has been chosen for this year's event, but skits are not to pattern a particular theme.

The skits which are approximately ten minutes in length will be judged Jan. 17, on originality and showmanship. Five or six skits will be selected for the production. No costumes or scenery will be used during try-outs.

General ideas for the skits are to be turned in Nov. 21, to Jeanne Garner at the Delta Gamma house.

## Home Ec Club Collects Clothes

A used clothing drive is being conducted by Phi Upsilon Omicron, home economics professional sorority, to promote home economics across the globe.

Members of the sorority will mend the clothing donated by students and send them to students in Africa. Shipping costs will be paid for by the proceeds from their

annual fruit cake sale. Students wishing to purchase Christmas fruit cakes, which will be delivered on Dec. 12, may contact Bev Swoboda, Sharon Baughman, or Janet Hansen.

Contributions for the clothing drive may be brought to the Women's Residence Halls, Room 2203, or to any Phi U member Dec. 8.

## ENGINEERS AND SCIENTISTS NAA's On-Campus Interviews

NOVEMBER 28

The NAA industrial family has a career for you

Atomics International Division is a leader, both here and abroad, in the development of nuclear reactors for power, research, and mobile systems.

Autometrics Division produces computers, inertial guidance, armament control, and flight control systems. Developers of inertial guidance systems for first Polaris-carrying subs, Minuteman ICBM, GAM-77 missile.

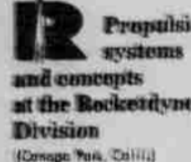

Columbus Division, a complete center of systems capability, produces Navy's Mach 2.53 Vigilant, is developing new Army target missile, and building the reflector for the world's largest radio/telescope.

Los Angeles Division is the home of next-generation manned weapon system—the Mach 3 B-70 Valkyrie—and America's first manned space vehicle, the X-15.

Missile Division produces GAM-77 Brum Dog missile, is at work on space exploration vehicles and methods, and is conducting research well in advance of existing technology in the space sciences.

Rocketdyne Division, Free World's leading producer of large rocket engines, supplied main-stage boosters for 25 out of 28 successful U.S. satellites and space probes.

## Engineering 'New' Says Hurlbut

Engineering is considered practically a new profession as 90 per cent of all engineers graduated from college are still alive, said L. W. Hurlbut recently.

Hurlbut, chairman of the agricultural engineering department, spoke at a meeting of the American Society of Agricultural Engineers at Moline, Ill., and emphasized that most of them have graduated in the last 15 years.

Another astounding fact, Hurlbut noted, is that "our scientific knowledge has doubled in the last 15 years." The drive toward professionalism within agricultural engineering ranks has kept pace, with the membership of ASAE more than doubled that of 10 years ago.

"The farm producers of today and tomorrow will have a growing need for agricultural engineering services in connection with their farming enterprises," Hurlbut said.

He termed the purpose of agricultural engineering as "that of designing the machines and planning the materials handling processes farm producers need and want."
