

Living District Representation Proposed for Council

By Ann Moyer
Student Council representation according to established living districts is presently the recommended plan which will be submitted to the Council today for consideration.
Following Council discussion a final open meeting will be held Thursday at 7:30 p.m. in 234 Student Union to allow students to present their final views concerning the proposed plan.
The representation committee will then present an official motion to the Council requesting that the Constitutional amendments be written to embody the final

recommendations of the committee.
The amendments would first require the approval of 2-3 of the Council and then ratification by a majority vote in a general election in which at least 30 per cent of those eligible students voted.
The plan to be presented to the Council today included the following recommendations:
Part I—Council Representation.
1. The Student Council shall be composed of representatives elected from eight student living districts.
2. The eight living districts shall be:

- a. Social fraternities
- b. Social sororities
- c. Men's city university dorms
- d. Women's city university dorms
- e. Men's co-op houses and professional fraternities maintaining houses
- f. Women's co-op houses and ag dorms
- g. Unmarried students living in unorganized housing
- h. Married students living in unorganized housing

3. Each district shall have at least one representative.
4. Affiliated students, regardless of their true place of residence, shall vote within the affiliated living districts.
5. Graduate students shall be eligible to vote.
6. There shall be no activity representation.

Part II—Holdover Representation and Officers
1. The Council, sitting as a nominating committee, shall nominate two of its members for president and two for vice-president. These two offices shall be voted upon by the student body at the general election.
2. The two losing candidates shall be holdover members of the Council.
3. The office of second vice-president shall be eliminated.
4. Holdover representa-

tives shall be eliminated except for the four nominees specified under section 1.
Presently, five seniors are nominated and elected by the outgoing Council as holdover members. Officers are then elected from the holdover members by the outgoing Council.
The number of Council members would remain approximately the same as at present. Representation by colleges would be eliminated in favor of the living district representation method. The representation

committee supported this method.
Bill Connell, chairman of the representation committee, cited the following advantages to the living district plan: it would avoid double representation, provide closer Council contact with the individual students and assure equitable representation of all segments of the campus community.
Students are encouraged to attend the open meeting Thursday evening and present their views concerning the proposed plan.

Drop-out Fees \$19,398

By Leon Nyberg
Students who have withdrawn from the University so far this year have lost \$19,398 in tuition and fees, according to records in the Registrar's office.
This amount is the difference between total fees paid and the amount refunded to the students who have withdrawn from school last semester and so far this semester.
The Registrar's records show that 309 students have withdrawn or have been dropped from school since the beginning of the fall semester. In addition, approximately 400 first semester students failed to register for the second semester.
The 309 students paid a total of \$37,373 to the University, and they received refunds totaling \$14,200.
First semester refunds amounted to only \$5,866, indicating that many students left school after the fifth week of the semester.

A University accountant explained that a student who registers but then withdraws before classes start gets a complete refund with the exception of a five dollar processing fee.
During the first two weeks of school 80 per cent of the tuition is refunded. This percentage drops to 20 per cent a week until after the fifth week, when there is no refund to the student.
The accountant said there is no way to determine if the amount retained from each student actually covers the entire cost of the process of administrative work and classroom instruction before the student withdraws from school.
The loss in revenue to the University this year amounted to the refund total of \$14,200, plus \$3,775 in tuition scholarships which withdrawing students failed to use.
