A.F., Army ROTC Announce Course Revisions

By Tom Kotouc

Academic courses will replace major portions of the basic two-year air science and army ROTC curriculum next fall, Cols. V. R. Rawie, professor of military science, and Richard L. Hamilton, professor of air science announced Thursday.

Freshmen in army ROTC will substitute academic courses for one-half the regular military science cirriculum during both semesters, attending one hour of classroom and lab each week. Sophomores will attend class and lab regularly.

Air Force ROTC fresh men will substitute academic courses for the air science curriculum during their first semester. Sophomores will substitute during the second semester of their sophomore year. One-hour drill labratory will be required weekly during the two-year program. The regular Air Science curriculum will be taught for second-semester freshmen and first-semester sophomores.

The Air Force program, Colonel Hamilton points out, "will lessen the workload of an entering freshman at the time when he is making a major and difficult adjustment to college life. Sophomores who decide not to go into the advanced course would be able to concentrate on required academic studies in the fourth semester when the student has no interest in ROTC."

Substitution

Air Science freshmen may substitute courses in the following areas: mathematics, chemistry, English, engineering, engineering mechanics, biology, botany, earth science, geology, zoology, Latin, Greek, French, German, Italian, Japanese, Russian, Spanish, business organization, geography, physiology, public health and education.

In the sophomore year, the Air Force cadet may substitute any sophomore course in mathematics, physical or natural sciences, foreign languages, the humanities or social sciences.

The Army program allows substitution of any freshman course during his first year.

The revisions will affect about 900 basic cadets in air science and about 1000 in military science.

Concentrated Study

The substitution program also will mean a more concentrated study in the Army and Air Science subjects, Colonels Rawie and Hamilton pointed out. Military history will be shifted from the first to the second year in the Army program. The first year program will include instruction in organization of Army and ROTC, individual weapon and marksmanship, U.S. Army and national security, and leadership laboratory. The second year will involve, in addition to military history, map and aerial photo reading, and introduction to operations and basic tactics.

Under the revised air science program, the second semester of the freshman year will involve subjects such as elements and potentials of air power, air vehicles and principles of flight, national security and professional opportunities in the Air Force.

The first semester of the sophomore year will deal with fundamentals of aerospace weapon systems. This will include an introduction of aerospace missiles and aircraft aerospace defense, modern targeting and electronic warfare, high explosive, nuclear, chemical and biological warheads.

The Navy ROTC program is continuing to review their program but does not expect it to be changed next year. This past year, the Navy has allowed the substitution of Psychology 70, taught by University personnel, for an advanced Navy-taught subject.

PBK's, Sigma Xis Chosen

The University chapters of Phi Beta Kappa and Sigma Xi, top scholastic honorary societies, announced their new undergraduate members at a joint dinner meeting Thursday evening.

Phi Beta Kappa, national honorary society for Arts and Sciences, elected 21 students, and 42 were chosen as new members of Sigma Xi, national honorary science society.

Irving Dilliard, former editor of the editorial page of the St. Louis Post-Dispatch, was the speaker for the meeting. As an authority on the U.S. Supreme Court, he spoke on "Are We Undermining Our Bill of Rights?"

Eight students were named to both societies. They are: Sonia Anderson, Kenneth Barjenbruch, Douglas Bereuter, William Fish, Douglas Kent, Mary Schmelzer, David Sell, and William White.

Prof. Emanuel Wishnow, chairman of the music department, was elected an honorary member of Phi Beta Kappa.

Other members of Phi Beta Kappa, all of whom have a high scholastic average and have completed requirements of the College of Arts and Sciences, are: John Anderson, Elizabeth Blore, John Else.

Grover Kautz, Richard Krause, Merlin Montgomery, Richard Newman, Jr., Pat Porter, Glenn Reed, Sylvia Rodehorst, Linda Rohwedder, Gail Simon and Carol Vermaas Smith.

Newly elected undergraduate members of Sigma Xi, who have shown excellence in two or more departments of pure or applied science and have shown evidence of an aptitude in scientific research, are: David Armstrong, Henry Berns, Donald Elliott, Richard Eurich, Stanley Farlin, David Farlow, Richard Frahm,

Bernard Frakes, Gary Gilbert, Gary Hergenrader, Max Houser, Paul Kamrath, Don Kaufman, Philip Kester, Fernando Lagos,

Sara Lazlo, Dave McConanay, Ron McKeever, Richard Miller, Dennis Nelson, Sheryl Oberg, Heinz Otte, Keith Saxton, Ron Schafer, Roger Schindler,

George Schurr, Andris Staklis, David Swartz, Richard Truble, Richard Waldo, David Whitney, Arnold Wiebold and Larry Williams.

—Student Council—

Representation Plan Causes Controversy

By Norm Beatty

A reorganization of Studen Council representation plan was subect to harsh consideration by some to 20 students last night.

The open meeting was the final of three held to gather student views before the new reorganization plan is presented to the Council for approval.

Part I, sections 1 and 2 which establishes Student Council representatives elected from eight student living districts was passed 11-6 on a straw vote.

Part I, section three which reads: "Each district shall be represented by at least one representative with additional representatives alloted according to the number of votes cast in the individual district in the preceding general election. This allotment shall be established so as to make the total number of representatives, exclusive of holdover representatives, approximately 30," had seven students voting for its approval and nine against.

The question whether the present system of College representation or the proposed student living districts representation is the best method of selecting membership provided the debate for the evening.

The possibility of creating student factions thereby creating more student interest in the Council (an element in national politics which brings rise to candidate platforms) is an additional advantage of the new system, according to the committee headed by Bill Connell.

Students in attendance questioned the advantages of the plan over the present system of representation. Some felt the political faction would only further the situation of a few students "running the whole university."

Voting power for the graduate students and the doing away of activity representation were both given approval by the attending students. The question of hold-over members and the president and vice president of the council received the nod of assent with a minor revision.

Hardin Named Trustee

Chancellor Clifford M. Hardin has been named a trustee of The Rockefeller Foundation, according to an announcement by John D. Rockefeller III, chairman of the board.

Prominent national and world leaders are selected as members of the board of trustees. Secretary of State Dean Rusk was president of the Foundation prior to his appointment to President John Kennedy's cabinet this year.

Other newly appointed trustees for a three-year term are: Sir Oliver S. Franks, chairman of the Lloyd's Bank Limited of London; Father Theodore M. Hesburgh, president of Notre Dame University; Frank Stanton, president of Columbia Broadcasting System; and George D. Woods, chairman of First Boston Corporation of New York City.

Hardin, a nationally known educator, is the immediate past-president of the American Association of [illegible]

IFC Moves to Closed Session; Panty Raid Scare Noted

The Interfraternity Council (IFC) moved into closed executive session Wednesday night following officer and committee reports.

According to the Executive Council, the reason for the executive session was to consider several important matters and to review situations in a formulative discussion effort.

President Don Ferguson first read a letter from E. C. Dewey, president of the IFC Board of Control. The letter stated in part, "It has come to my attention that rumors are going about the campus relative to a spring 'Panty raid.' This sort of activity is definitely undesirable and is generally fomented and spearheaded by the more irresponsible and juvenile students . . . the several fraternity houses on the campus (should be warned) about the danger of any of their members participating in such an activity."

The 1955 "panty raid" was mentioned and it was indicated that the fraternity system received favorable light at that time because it was not overly involved as were Lincoln high schools, Lincoln Air Force Base personnel and the dorms.

Proposed Plans

The several proposed Student Council reorganization plans were discussed, and two members of the IFC voiced disapproval of one such plan which appeared in the Daily Nebraskan Wednesday, April 5, as it "would tend to lower Greek representation and leadership available through the same."

Rod Ellerbusch, Sigma Nu representive, in commenting on the ideas connected with representation of the Student Council, stated, "The main purpose of the new proposals is to obtain better representation on the council and to receive better opinion from closer contact with students. The college representation plan does not offer the contact with students which can obtain effective student opinion.

"We've got to raise the idea to a higher plane than Greek exploitation," continued Ellerbusch. "It is often recognized that the council is relatively ineffective. And it's five-sixths Greek—so in effect, this criticism points to Greek ineffectiveness. There is no need to be selfish. The Greek system can survive a lower ratio of representation on the Student Council. What's important is to look for an improved council."

Ferguson urged the IFC to attend the final reorganization committee meeting Thursday night. He announced that the Executive Council had decided to support the college representation plan with an elimination of activity representation.

Statement

Ferguson then read and and elaborated on a statement dealing with the criteria which the IFC Executive Council will follow in dealing with violations of the IFC rules, regulations, and by-laws. The statment read:

"1. The Executive committee shall receive any written or verbal complaint against any fraternity for infractions of the constitution, by-laws or rules.

"2. The Executive committee will then take the following steps:

a. Investigate and review the facts of the case with the fraternity involved and other sources as may be necessary.

b. After examining the issues, the committee will take such action as it may seem necessary and in accordance with the Constitution of the IFC.

c. All actions shall be reported immediately to the Interfraternity Council as a whole.

d. Appeals shall be in accord with the Constitution of the IFC."

Two reported violations of the pledge training code were announced by Ferguson. The action of the IFC in each instance was a severe warning to each house involved.

The first violation concernd a violation of the rule confining pre-initiation activities to the chapter house. The fraternity involved reportedly sent their pledge class to a sorority house in an effort to obtain the "measurements" of the young ladies on the house roll.

Stopping Cars

The second violation, involved the same rule, stemmed from an incident in which the pledge class of the fraternity concerned was stopping cars on a public road.

As the action was found to be a part of the ritual of the national fraternity, Ferguson asked for all houses to check their existing ritual and by-laws against IFC regulations, so that waivers can be granted for conflicting legislation.

In closing Ferguson commented on six main areas which the IFC has concentrated action during the past two months.

He listed the revamped committee system, an "activated" Greek Week, improved public relations, improved relations between houses, the IFC office expansion, and next summer and fall's rush program as areas in which considerable progress and improvement have been shown.

TODAY ON CAMPUS

Friday:
Psychology Symposium, 9:30 a.m. and 2 p.m. Small Auditorium, Student Union.
University Symphonic Band concert, 8 p.m.
State Vocational Agriculture Judging Contest, all day, Activities Building, Ag. Campus.
Baseball, Nebraska vs. Oklahoma, 1:30 p.m., two games, University diamond.
Tennis, Nebraska vs. Air Force Academy, 1 p.m., University tennis courts.
Golf, Nebraska vs. Air Force Academy, 1 p.m. Lincoln Country Club.
Saturday:
"Astrology—Fact or Fiction," 2:45 p.m., Ralph Mueller Planetarium, Morrill Hall.
Ceres, transparent woman, 10:30 a.m. and 3 p.m., Health Galleries, basement, Morrill Hall.
State Future Farmers of America Convention, all day, Activities Building, Ag. Campus.
Baseball, Nebraska vs. Oklahoma State, 1:30 p.m., University diamond.
Track, varsity vs. freshmen, 2 p.m., Memorial Stadium.
Jazz Concert, Don Rice Workshop band, 8:30 p.m., Student Union ballroom.
Sunday:
Spring Concert: University Singers, 4 p.m., First Plymouth Congregational Church, 20th and D Streets.

Food Manager To Attend Meet

Allen F. Krause, food service manager of the Nebraska Union, will represent the University April 16-19 at the 38th annual Association of College Unions' international conference at Colorado Springs.

This year's conference theme, in accordance with the purpose of college unions everywhere, is "Higher Education and the National Purpose". It will be studied throughout four days of 31 program sessions.

Dilliard Speaks To SDX

Irving Dilliard, retired editorial page editor of the St. Louis Post-Dispatch, will discuss "Public Information: How Public—How Informed?" this evening at the annual spring banquet of Sigma Delta Chi.

Dilliard is a former national president of the professional journalism honorary and a fellow of the society.

Also to be present at the 6:30 p.m. banquet will be E. W. Scripps II, vice president of Scripps-Howard Newspapers and national president of Sigma Delta Chi, and Warren Agee, executive officer of the society.

Scripps and Agee will also be present at the Saturday business meeting of the undergraduate and professional chapters. The meeting will conclude with a luncheon at the Student Union.

The banquet is open to the public, and reservations may be made through the University School of Journalism, 309 Burnett Hall.

Thursday Dilliard spoke to the joint meeting of Phi Beta Kappa and Sigma Xi fraternities on the topic, "Are We Undermining Our Bill of Rights?"

He is presently writing a book on the United States Supreme Court and in 1959 was cited by the American Bar Association for outstanding contributions to public understanding of the judicial system.

Spring Concert Sunday

The annual spring concert of the 93-voice University Singers will be presented Sunday under the direction of Professor Earl Jenkins. The program, open to the public, will be held at 4 p.m. at the First Plymouth Congregational Church, 20th and D streets.

Tugging, Egg Race at Greek Games

By Dave Wohlfarth

Highlighting Greek Week this year will be the Greek Games, which will be held at 2 p.m. on Saturday, April 22 and will be the official end of Greek Week, according to Phil Tracy, public relations chairman of the Interfraternity Council (IFC).

The games, jointly sponsored by the Junior IFC and Panhellenic, will for the first time include both sorority and fraternity participation. The events will be held on the practice field, south of the stadium.

The featured events of the 1961 all-Greek day will include a tug-of-war and a pyramid race for the men, while the sororities will compete in an egg race and a [illegible] marathon. The events will be climaxed by the [illegible] chariot race, held on the north practice field, [illegible] Moffitt and Bob Siedel, Greek Week co-[illegible]

[illegible] will be scored on a 5-3-1 scale with [illegible] Panhellenic and IFC, being [illegible] accumulating the [illegible]

There will be three heats and the finals will consist of the top pyramid in each heat.

No Support

Three men will carry two seated secondary men on their shoulders and the last man will sit on the shoulders of the secondary men, with no support other than hands allowed throughout the pyramid construction.

The traditional chariot race will consist of four fraternity men pulling, while the sorority girl of their choice will compete in the finals.

The women's egg race will be run over a 150 yard course and requires three runners from each sorority. Eggs will be placed in the first runners mouth and in each elbow with the arms crossed. She must transfer the eggs to the second runner, who, likewise, transfers the eggs to the third. A team will be eliminated for running off the track, breaking another runner's eggs or breaking all of their own eggs.

One contestant from each house will participate in the women's tricycle marathon, riding a tricycle forward 50 yards and then backwards 25 yards.

Participants

Miss Moffitt said, "It is the hope of the Greek Week Committee that each house will include as many different participants as possible in these events and contribute to the support and spirit needed to supply a climax to the Greek Week activities. We want the houses to keep in mind that although the games provide a basis for competition, this must not undermine the basic purpose of Greek Week—enjoyment accomplished through the cooperation of the Greeks."

[illegible] Greek Games champion was Delta Tau [illegible] who have copped three straight chariot [illegible] event.

Book Nets Medal For Dr. Eiseley

The John Burroughs Medal for 1961, the highest honor granted for a popular book in the field of science, was awarded to Dr. Loren C. Eiseley, a University graduate, at the American Museum of Natural History in New York City, this week.

Dr. Eiseley, an internationally known anthropologist, author and provost of the University of Pennsylvania, received the award in recognition of his latest book, "The Firmament of Time."

The award is based on originality of observation and conclusion, and is presented annually for literature which combines excellence of writing with accuracy.

Dr. Eiseley completed his graduate studies at the University of Pennsylvania. He recently delivered a series of Montgomery Lectures on the University campus.
