

Meade's Passing Earns Award

By Tim Brown

"Football is a game of breaks, and with a few breaks going our way we can come out on top against Iowa State next week-end," reported Ron Meade, this week's Daily Nebraskan Star of the Week.

Meade stated, "With both teams coming back from defeats, Nebraska's added depth will be essential for an NU win."

Ron is a six foot, 178 pound senior from Canby, Minn. His outstanding performance in Saturday's game with KU was highlighted with the 30-yard pass which he fired to Jim Hoge to spark Nebraska's only TD drive. Meade racked up three completions for a total of 53 yards and quarterbacked the touchdown play.

The Husker place kicking expert has converted eight of 11 extra point kicks, one field goal and scored one TD, scoring 17 points for the Huskers.

The 20-year old accounting major is married and the father of a two month old girl. His plans after graduation are undecided but he is considering playing pro ball.

RON MEADE

Bowling Tourney Set

Entries for a scotch doubles tournament to be held in the Student Union at 7 p.m. Nov. 19 are due Friday.

The tourney is limited to 16 teams with the entry fee one dollar per couple.

Free refreshments will be served and the first and second place teams will receive trophies.

By The Old Pro
-Bob Prokop

Homecoming has come and gone, And with it another sad Husker song, With hopes raised on high, Alumni soon did sigh, And the question soon did arise, What happened with all that size, And again a Husker nightmare appears, As it has in the past many years.

To the members of the Old Pro Fan Club, I wish to express that all material and predictions in this column are the Old Pro's opinion and all implications of Daily Nebraskan support are purely coincidental. As you might have noticed, my perfect string of misses was broken Saturday with the Husker loss.

The Husker attack looked good in the second half against Kansas when Bill (Jennings) decided to allow his team to pass. For the first time this year, the defense loosened up and allowed the Huskers to look like a football team. Ron Meade, with his soft pass, filled a missing link in the Husker offense. Dennis Claridge has a problem of throwing too hard at close range and too far at distances of more than ten yards.

Kansas gained a lot of yardage over our oversized guards and tackles. Their small, agile linemen were making holes big enough for a ten ton truck, showing that weight must not have much effect on defense. Our offense looked good around the ends because of the poor KU pursuit. The best play all day was Johnson going one way, Thornton going the other, and guess which one had the ball.

The Old Pro feels the daily state papers have made a mistake in not nominating Dick McDaniel for All-American honors. Dick is the best defensive lineman on this team and one of the best offensive ends to play under Bill Jennings.

The Old Pro wants everyone to be informed on what and who are responsible for the selection of our coaches and athletic director.

The Chancellor of our University is given the power of this selection and, at the present time the guessed list of his prospects looks bad! Anyone who is interested in NU's future, should take a look at the list of candidates rumored to be considered for the athletic director.

First, Cactus Jack Curtice of Stanford with his 0-10 record in football last year and his present 2-5 record, is being given high consideration. Stanford, at the present time, does not have outstanding strength in any sport. Virg Yelkin, at Omaha University, also has a good record with a mediocre football team and a basketball team which won two games last year. George Sauer couldn't hang on at Baylor, Kansas, or the Navy, and there is no indication he could do much better here.

Paul Amen at Wake Forest sports a 2-3 football record last year and, outside of being an NU alum, has no other recommendation. Dal Ward, refuge from Colorado, is also being considered but what he accomplished at Colorado, merited his resignation there. Jim Owens, another Sooner, had been mentioned, but what luck have we had with Bud's boys. This is, I guess, the Chancellor's considerations of good selections.

Why aren't we considering men who have proven themselves in the game such as Norm Van Brocklin, Otto Graham, Duffy Daugherty, Sammy Baugh, Paul Brown, Robert Waterfield, Darrell Royal or Eddie Erdelatz for example! It's too bad that we have to sacrifice our athletic program to please the Lincoln businessmen for donations to our school. It's time some officials realized that Lincoln is dependent on the University, not vice-versa.

(Continued on Page 4)

Frosh Play K-State

Nebraska and Kansas State yearlings square off at Manhattan Friday in the final 1961 grid competition for both clubs.

It will be a battle of two winless teams. Iowa State blanked the young Huskers 19-0 while Kansas was trifling Kansas State.

Voss Sidelined With Flu

Coach Bill Jennings announced that Husker tackle Lloyd Voss was confined to Student Health with "chest complications."

Also on the NU injury list are backs Willie Ross, Dennis Claridge and Warren Powers, along with sophomore and

Pat Fischer, who sprained an ankle.

Jennings indicated he may use Thunder Thornton or Willie Ross at either halfback or fullback against Iowa State Saturday and may try Dennis Claridge, sophomore quarterback, at a left half spot.

how quiet is quiet?

Cats are notoriously silent in their singularly feline way. But even the most stealthily treading tomcat could take lessons from the men at Ford Motor Company whose job it is to track down and suppress unwanted noise in vehicles.

At our Ford Research and Engineering Center in Dearborn, engineers have created a unique room without echoes, virtually duplicating the perfect stillness that exists miles above the earth's surface.

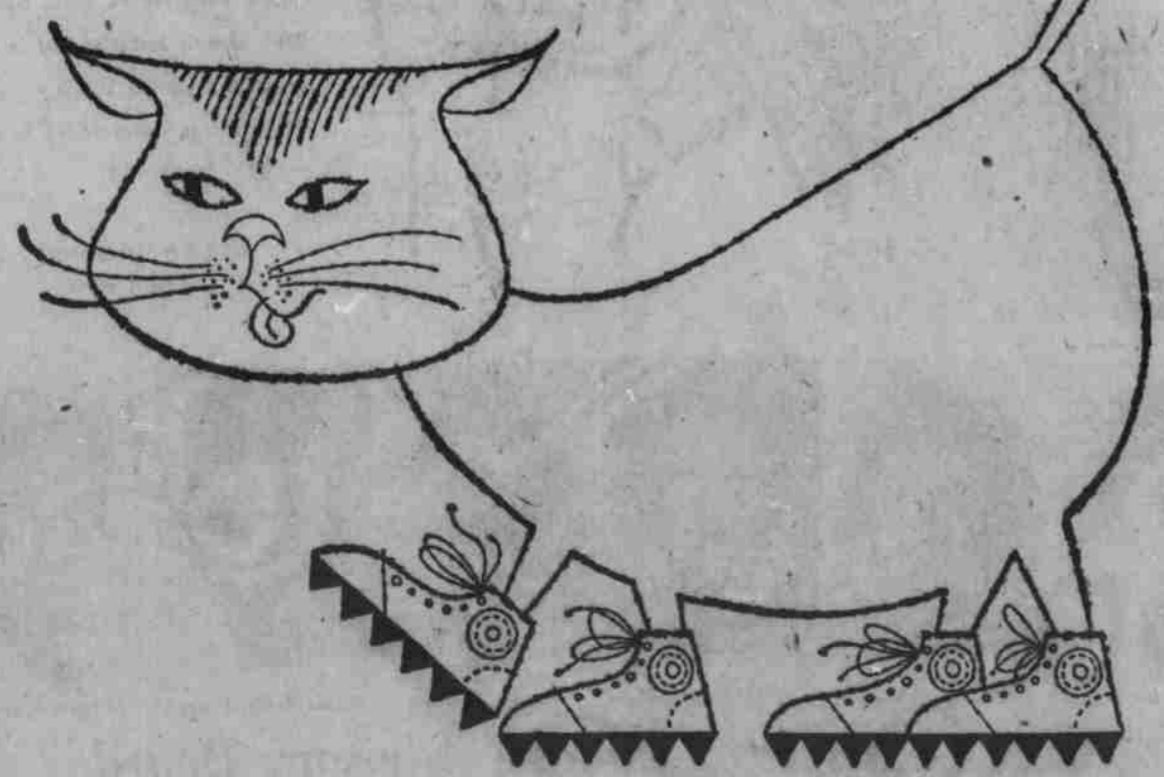

The "Silent Room", as we call it, is a chamber utilizing fiber-glass wedges as sonic "blotters" to soak up noise emanating from subjects undergoing developmental tests. In this acoustically sterile environment, electronic instruments seek out the source of vibrations, rattles, rumbles and squeaks so that they can be eliminated in production.

This scientific approach to silence is but a tiny facet of the many-sided program of pure and applied research which goes on daily at Ford Motor Company. It is another example of Ford's leadership through scientific research and engineering.
