## Football Fan Report Merits Hearst Award

Hal Brown's story of the Nebraska football fan, a "super-loyal nut," has earned him first place in national sportswriting competition, and 15 points toward one of ten grand prize fellowships worth up to \$2,200.

The William Randolph Hearst Foundation Journalism Awards Program sponsors seven month-long contests in news, sports, feature, and interpretative writing categories.

When the contests end in April the ten students who have accumulated the highest number of points will receive fellowships valued from \$800 to \$2,200.

As first place winner in the November sportswriting contest, Hal will receive a \$200 grant from the Foundation.

**School of Journalism**  
The senior in the School of Journalism, who is enrolled in the depth reporting course there, is now working on another entry, this time in the newswriting category.

Hal is planning a story on isolationism in Nebraska — whether the state is more or less isolationist, or whether it ever was.

In his story on the Nebraska fan's loyalty, Brown covered the history of Nebraska football through the eyes of coaches, sportswriters, former players, and fans.

With less than a month in which to get the story published, Brown spent about 80 hours on the depth article.

**Two Days**  
He spent two full days in Omaha interviewing former players, sportswriters, and fans, and a total of \$42 on telephone calls to former coaches.

Both his story and one on the development and use of

Sustagen, a liquid high protein diet, in athletics, written by Wendy Rogers, were published in the Daily Nebraskan.

Miss Rogers, a sophomore in the School of Journalism won sixth place in the same competition with her article.

Commented Brown, "I think the fact that Nebraska's School of Journalism produced two of the top six winners in the contest points up the fact that Nebraska is among the top journalism schools in the country."

Contest competition is limited to schools and departments of journalism in accredited colleges and universities.

Although each school is permitted to send only two entries for each month's contest, "entries come from everywhere in the United States, and competition is very intense," said Dr. William E. Hall, director of the School of Journalism.

The five schools or departments of journalism which accumulate the highest number of points will also share in the awards—grants from \$500 to \$3,000 will be awarded by the foundation.

Categories for the coming months include: January, newswriting; February, feature writing; March, newswriting; April, investigative or interpretative writing.

## Meetings

NUMEDS will meet tonight at 7:30 p.m. in the Student Union. Speaker for the evening will be Dr. Bell who will show slides and present a talk on skin diseases.

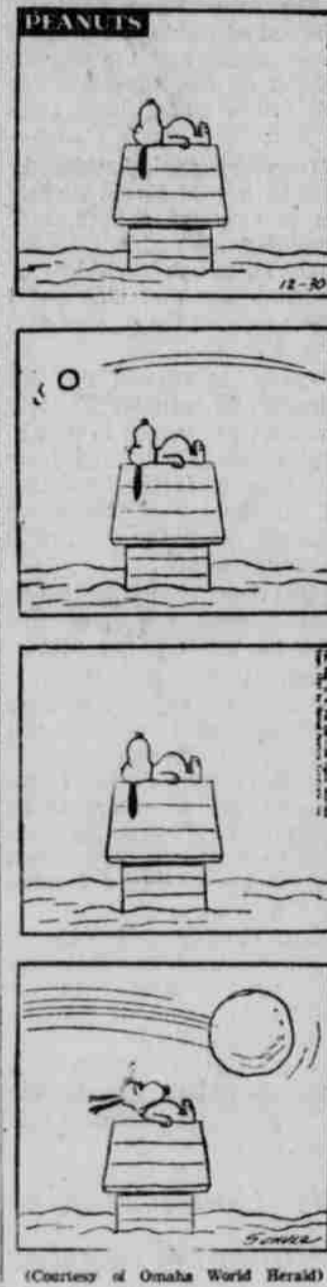

"Militarism and Democracy in Latin America" will be the topic of discussion for the second of a series of conferences on Latin America sponsored by the Spanish Club.

The discussion to be headed by Dr. Alex Edelmann of the political science department will begin at 7 p.m. Thursday in 232 Student Union.

Dr. Edelmann will give a brief background on the modern panorama of political form and change in Central and South America. Special emphasis will be placed on contemporary problems in Latin America and their significance for the government of the United States.

Young Democrats will meet at 7:30 Thursday night in the Student Union.

The regular meeting of Phi Eta Sigma, men's scholastic honorary, featuring Dr. Franklin Houn speaking on the Sino-Soviet Dispute, will be held Thursday Jan. 11 in 345 Student Union. All freshman regents winners are invited to attend.

## BELL TELEPHONE SYSTEM

Somewhere out there, beyond the realm of man's present understanding, lies an idea. A concept. A truth.

Gradually, as it comes under the concentration of disciplined minds, it will become clear, refined, mastered. This is the lonely art of pioneering.

In the Bell System, pioneering often results in major breakthroughs. Planning the use of satellites as vehicles for world-wide communications is one. Another is the Optical Gas Maser, an invention which may allow a controlled beam of light to carry vast numbers of telephone calls, TV shows, and data messages.

Breakthroughs like these will one day bring exciting new telephone and communications service to you. The responsibility of providing these services will be in the hands of the people who work for your local telephone company. Among them are the engineering, administrative and operations personnel who make your telephone service the finest in the world.
