—Sheldon Art Gallery—

## Two Major Strikes Fail To Hinder Construction

By LARRY FRUHLING  
A \$3 million showcase for the University of Nebraska art galleries, the Sheldon Art Gallery, will be opened in May, 1963, according to Norman Geske, director of the University galleries.

Despite construction problems, the Sheldon Gallery will be completed close to schedule, Geske said.

Among the problems encountered have been two major strikes—an iron workers strike last summer, and a general construction workers strike early last spring.

The donors of the Gallery are Miss Frances Sheldon and A. B. Sheldon. Miss Sheldon lived in Lincoln, and Sheldon was a resident of Lexington.

Two pieces of memorial sculpture will be placed in the grand hall of the building—but they will not be revealed until the Gallery is officially open, Geske said.

The Sheldons specified that the Gallery was to be of a contemporary style, and a University board chose Philip Johnson and Associates of New York City to do the architectural work.

All of the exterior walls of the Gallery will be sheathed with Italian travertine marble, a honey-colored stone chosen for its beauty and endurance.

All of the marble is being quarried and cut to dimension in northern Italy. The slabs are numbered at the quarry, and have only to be fitted together when they arrive in Lincoln.

The gallery will be two stories high, with a full basement, and will be 90 ft. x 180 ft.

The grand hall will occupy the entire center third of the building on the first and second floors. It will have a ceiling more than 30 feet high, with glass walls on either end. It will have an open stairway to the second floor, and will house the two memorial sculptures.

The south third of the first floor will contain a 300 seat auditorium for lectures, concerts, and films. The north third of the first floor will house offices and the board room for the Nebraska Art

## Haecker, Hanson Receive Awards From Architects

George W. Haecker, Jr. and Gary Lee Hanson are among the recipients of a series of first annual awards made by the American Institute of Architects.

Gary Lee Hanson received a \$1000 award for graduate

study. He is a former winner of Lincoln Home Builders Association award for home design and last year received an award from the Tile Foundation which enabled him to study during the summer at the Fountainebleau Fine Arts School in France.

## Psychology Grad Gets Fellowship

Sachio Ashida, graduate student in psychology, will be awarded a \$5,000 post-doctoral fellowship from the National Science Foundation.

The Japanese student will receive the fellowship upon completion of his Ph. D. w. o. k. Ashida hopes to use the NSF fellowship for further advanced study at the University of Michigan.

Ashida received his Masters degree from the University in 1958. He is associated with Professor William J. Arnold in an investigation of the effects of carinal irradiation on the psychological processes in rats.

room for the Nebraska Art Association.

Three temporary galleries for traveling exhibitions will be in the south third of the second floor, and the north third will have six permanent collection galleries.

## Art Federation to Hold Convention in '63 at NU

The American Federation of Arts (AFA), in cooperation with the Nebraska Art Association, will hold its biennial convention May 23-25, 1963, at the University as part of the week-long dedicatory program of the \$3 million Sheldon Art Gallery.

The Federation held a regional meeting at the University in conjunction with the construction of the State Capitol in 1927.

## Graduates To Receive \$17,500 Aid

Fifteen University graduate students have qualified for a total of \$17,500 in educational aid under the National Science Foundation's cooperative and summer fellowship programs.

According to Associate Dean Harold Wise of the Graduate College, one of the students, Ronald Mathsen, who is studying advanced mathematics, has been offered \$600 for summer study and an additional \$2,200 for use during the following school year.

The NSF, a federal agency, offers its fellowships as "investments in the future of individuals of high potential and ... in the future of society."

The fellowship offers are: Cooperative fellowships, 12 months, \$2,200—James Church, mathematics; Daniel Howell, chemistry; Ronald Mathsen, mathematics; Donald Schuele, engineering.

Cooperative fellowships, nine months, \$1,650—Jan Blazek, engineering; Frederick Riekers, mathematics; George Sullivan, physics. Summer fellowships, \$600—Jerrold Berners, mathematics; Marilyn Caldwell, zoology; Warren Diven, chemistry; James Edman, chemistry; John Herzog, mathematics; Charles Heuer, mathematics; Ronald Mathsen, mathematics; Charles Slatery, chemistry; Larrie Stone, genetics.

## Professor Finishes Half Of Interlingua Dictionary

Dr. Merrill Hendrickson, a research associate at the University College of Medicine in Omaha, announced that he is about halfway through the writing of a dictionary for Interlingua—an international language for science.

Dr. Hendrickson expects to spend several more years on the task. He said he has completed the list of some 40 thousand English words, matched to their corresponding Interlingua words.

He is now compiling an index of the value of each word based on the number of languages and populations from which it is derived.

Dr. Hendrickson said the biggest advance in the use of Interlingua came a year ago when the Journal of the American Medical Association began publishing regular reprints of its articles in the new language.

Interlingua is now being used similarly in about 20 medical journals. Summaries of international scientific meetings also have been written in Interlingua.

Interlingua's advantage over other international languages is that an extensive background in languages is not required to read it, Dr. Hendrickson said.

The 26 letters of the Roman

storage areas for collections workshops for the preparation of exhibits, and the heating and air conditioning equipment.

None of the Gallery will be used for University classrooms, Geske added.

## Dean Happy With Greek Women

By MIKE MACLEAN  
Alpha Gamma Rho fraternity has been fined \$400 and lost its initiation privileges for an indefinite period of not less than four years because of illegal pre-initiation or "hell week" activities.

In making the decision the executive council of the Interfraternity Council made the qualification that the chapter may hold initiation, provided that it complies with provisions made by the IFC executive council in its decision on the case.

AGR pledges were sent out after a dead rabbit during these activities, and stole and killed a six-year old boy's pet rabbit.

The parts of the IFC constitution and by-laws that were violated prohibit any "hell week" activities outside of the actual fraternity house and also prohibit any action which would bring disgrace on the University.

A resolution was introduced which read:

WHEREAS: Recent events concerning pre-initiation activities have determined a definite need for re-evaluation of pledge training and pre-initiation practices and, WHEREAS:

Dean Eldon Park, Dean of Men at the University of Illinois, has been instrumental in the devising and applications of an effective and constructive new pledge training code at that University.

THEREFORE: Be it resolved by the IFC, University of Nebraska,

Comparing the fraternity average with the average of the pledge class, Hallgren noted "that if the fraternity average is poor, the pledge average is usually even lower."

In three house records examined the pledges earned a higher average than the house as a whole, the house average was also high (above a 5.1)

"Thus where pledges have done poorly, they have only followed the pattern of the house, which has also done poorly," the Dean concluded.

## Swihart Will Talk to State Newswomen

Florence Swihart, a former Nebraskan, now school editor of the Des Moines Register, will address the state's newspaperwomen, their bosses and student and faculty journalists at Theta Sigma Phi's annual Matrix banquet.

The banquet will be 8:30 p.m., March 30, in the Inn-Suite of the Student Union. Tickets are \$2.50 and may be purchased at the Journalism office.

Miss Swihart, who in the past 20 years has been feature writer, assistant state editor, and picture editor of the Register, was a member of Theta Sigma Phi and news editor of the Daily Nebraskan while attending the University.

After graduation she worked as city editor, society editor, and columnist for the Fremont Evening Tribune.

Two newspaperwomen whose accomplishments are judged most outstanding in the weekly and daily divisions will receive "Woman of the Year" plaques.

Theta Sigma Phi, honorary journalism fraternity for women, will also recognize individual winners.

Winners will be chosen in new four categories: general news and features, women's page news and features; columns; and woman's page general excellence.

**Correction**  
The University's Collegiate Band's annual Spring Concert will be held Sunday at 4 p.m. in the Student Union ballroom instead of Wednesday as previously reported.

## AUF Sets Goal In Faculty Drive

The All University Fund (AUF) members will work toward a goal of \$1,000 this year in the Spring Faculty Drive.

Dean Helen Snyder spoke meeting last night. The spring faculty drive is set for April 2-14. All University faculty members will be included in the solicitations.

Faculty members will be contacted by AUF board members and notified of the charities to which funds will be donated.

## Love Library Is Center For Microfilm Volumes

By KAREN GUNLICKS  
If a student needed a 1792 copy of the Country Spectator, an old English book published in 1684 or a copy of the New York Times, where would he get them? No, not the British Museum, the Library of Congress or the newspaper stands! He would go to the microfilm files in Love Library.

A microfilm is a 35mm film on which an entire book or issue or other volume has been reproduced.

In addition to the microfilm are microprints and microcards. Microprint consists of a page on which up to 107 pages have been reproduced. A microcard is a 3"x5" card with various reproductions on it. When inserted in a reader, the reproductions are magnified so the student may read the copy.

The reels of film, when placed on a reader, are projected on the base of the reader. The film is manually rotated at any speed.

Another machine, a microcopier, will reprint the material from the film onto paper if the student desires.

There are approximately 10,000 volumes in the microfilm files. Using these films provides more space in the library and also increases the selection and number of books available to the library.

The micro projects include three centuries of English and American drama, early American imprints from 1640, which is the beginning of printing, to 1800.

English books before 1640 which when completed will include every book printed in English in the world and every book printed in England regardless of language from the beginning of printing to 1640, the Russian Archives; the United States Government papers of the early days of the country.

Other subjects include English literary periodicals from the 17, 18, 19 centuries, resource materials on the theatre, the New York Times and London Times completed to date and various other papers and the Adams Papers.

Books which cannot be obtained by the Library are on microfilm and are listed on the regular card catalog. Others, such as the Early American Imprints, are listed in an index according to the reel number and item number. Some have catalogs in book form.

# IFC EXEC COUNCIL FINES HOUSE \$400; INITIATION LOST

By MIKE MACLEAN  
Alpha Gamma Rho fraternity has been fined \$400 and lost its initiation privileges for an indefinite period of not less than four years because of illegal pre-initiation or "hell week" activities.

In making the decision the executive council of the Interfraternity Council made the qualification that the chapter may hold initiation, provided that it complies with provisions made by the IFC executive council in its decision on the case.

AGR pledges were sent out after a dead rabbit during these activities, and stole and killed a six-year old boy's pet rabbit.

The parts of the IFC constitution and by-laws that were violated prohibit any "hell week" activities outside of the actual fraternity house and also prohibit any action which would bring disgrace on the University.

A resolution was introduced which read:

WHEREAS: Recent events concerning pre-initiation activities have determined a definite need for re-evaluation of pledge training and pre-initiation practices and, WHEREAS:

Dean Eldon Park, Dean of Men at the University of Illinois, has been instrumental in the devising and applications of an effective and constructive new pledge training code at that University.

THEREFORE: Be it resolved by the IFC, University of Nebraska,

ka, that an amount of money be taken from the IFC treasury to be utilized in the following ways:

A. A part of the money shall be used to bring Dean Eldon Park to our campus to talk with fraternity members,

to criticize and evaluate the status of pledge training and pre-initiation activities on this campus, and to offer suggestions for improvement.

B. A part of this money will be used to secure further information on constructive pledge training and pre-initiation activities.

Roger Myers, vice president, said "It looks good in writing, but we're not following it, we need an attitude change. Let's not say one thing and do another, which is what we are doing now."

"Let's either amend it or follow it, we've got to be consistent," he continued.

"We have to assume responsibility and maturity if we are to stay on this campus," said John Nolan, president. "This is the reason behind the resolution. The purpose in bringing Dean Park here is to make each Greek realize what he can do. We are asking Dean Park to help us help ourselves.

In other business it was announced that the community service project during Greek Week would be a house to house drive for Multiple Sclerosis.

The expansion committee reported that an inspector from Student Health will inspect each house to determine whether the house complies with the new housing code.

The rush film was shown, and it was urged that the film be made available to all the houses for use in their rushing programs.

## Engineer Dean To Go to Africa

Dr. Merk Hobson, dean of the College of Engineering and Architecture, will leave on a Ford Foundation sponsored trip to Africa Sunday.

The trip is being made in an attempt to find ways in which the Mid-American Association of State Universities might come to the aid of African countries through educational programs.

Dean Hobson said the vast potential of the African nations is such that efforts must be made toward the further understanding of the people as well as their educational systems. The free world has a vital stake in their futures, he added.

## Yell Competition To Begin Soon

Tryouts will be held April 10 for five new members of the 1962-63 Nebraska Yell Squad.

One regular girl, two regular boys and one alternate girl and boy will be chosen. To qualify for tryouts, one must be a full-time freshman student with a 4.5 cumulative average. Three of the five practice sessions must be attended to qualify for competition. These will be held next Thursday and Friday and April 3, 5, and 9.

Students interested may sign up in the Coliseum on March 28 and 29.

## Four Nebraskans On TV Board

Four Nebraskans will serve on the policy board for the Great Plains Regional Instructional Television Library.

Nebraskans on the newly named board are Dr. Walter K. Beggs, dean of Teachers College; Dr. Wesley C. Meierhenry, professor in Teachers College; Dr. A. C. Breckenridge, dean of faculties; and Jack McBride, director of University television.

The Library, which is located at the University is the first regional TV center in the country and will service a 12-state area.

## Summer Enrollment Increase Expected

An increase of approximately 200 students in the 1962 summer sessions is expected by University officials, bringing the total enrollment to 4,000.

One of the most extensive institute programs yet held at the University during summer months will be offered for teachers of mathematics, science, foreign language, English and counseling and guidance.

Several workshop seminars will be offered. They are entitled "Creative Teaching in the Elementary School," "Teacher Identification with the Aerospace Environment," "New Dimensions to Quality Education and Programming

## 'March Madness' Will Prevail At Spring Dance

By ANDA ANDERSON  
It'll be sheer madness tonight at the annual Spring Dance to be held at the Ag Activities Building.

The Mark IV Combo will try to provide music for the dance to go along with the theme: "March Madness."

And it's not madness, but a fact, that there will be a twisting contest with a trophy awarded to the best couple.

Endurance time is 8:30-11:30 p.m. According to Karen Leach it would be a wise thing to get tickets in advance for 75 cents per person because admissions will be \$2.00 a person at the door.

## 'Small Gap' Film Tells Orbit Story

The "small gap" which bridges between man and space will be illustrated in a special documentary film on campus station KUON-TV Wednesday at 7 p.m.

The film, "Mastery in Space," is about Project Mercury and the United States' first attempt to put a man in orbit.

The National Aeronautics and Space Administration has prepared the documentary which includes: films of astronaut John Glenn's landing, films of the actual flight, and the rigorous tests and preparations which must be made before a flight.

There will be interviews with John Glenn and Walter Schirra, another astronaut.

Filmed animation sequences are used to show the development of various space projects including Project Apollo, which involves a lunar landing.

## Torrens Receives Rockefeller Grant

Gary D. Torrens, senior in Arts and Sciences, has been awarded a Rockefeller Brothers Theological Fellowship.
