

PINNINGS and ENGAGEMENTS

Football enthusiasm seems to have reigned during the weekend as only nine co-eds got their man.

PINNINGS
Karen Yager, Alpha Chi Omega sophomore from Ralston, majoring in music, to Jim Wickless, Lincoln pre-dental student.

Jan Howard, Alpha Xi Delta junior in music from Kearney to Rod Gibb, junior in music from Lincoln.

Lynette Loescher, Chi Omega sophomore from Kearney in Arts and Sciences, to Bob Ayers, Delta Upsilon junior in Arts and Sciences from Cloquet, Minn.

Karen Pfisterer, Gamma Phi Beta junior in Arts and Sciences from Omaha to Steve Swihart, Phi Kappa Psi in Business Administration from Grand Island.

Linda Reno, Kappa Kappa Gamma junior in Arts and Sciences from Alliance, to Tom Wright, Sigma Chi junior in Arts and Sciences from Lincoln.

LaDonna Crosier, Zeta Tau Alpha junior in Teachers College from Lincoln, to Tom Pospisil, Kappa Sigma junior in Arts and Sciences.

Jodell Nye, Pi Beta Phi

junior in teachers from Omaha, to Doug Gath, Phi Kappa Psi junior in Business Administration from Omaha.

Ann Aitken, Kappa Alpha Theta sophomore in teachers from Lincoln, to Dave Myers, Phi Kappa Psi grad student in Teachers College from Lincoln.

Dianne Giesselmann from Lincoln to Ken Cook, Farm-House sophomore from Arlington majoring in agriculture.

ENGAGEMENTS
Pat Birney, Kappa Alpha Theta junior in Arts and Sciences from Omaha, to Steve Joynt, Delta Tau Delta senior in pre-law from Lincoln.

Judie Waser, Alpha Omicron Pi senior from Lincoln in Home Economics and Journalism to Roger Mattson, junior from Grand Island in Engineering.

Wheat Varieties May Bring Profit

The state's wheat crop might have been worth \$20 million more this year if three of the University's new wheat varieties had been available for planting this year, according to Dr. H. H. Kramer, director of the University's Ag Experiment station.

Kramer estimates that stem rust disease took a \$40 million toll of this year's harvest. He added that with the new hybrids, such losses might never occur again.

Kramer mentioned that accurate long-range weather forecasts may soon be published for central Nebraska. "Our research on climatology promises to provide many applications in solving crop production problems in the future," he said.

Dr. Kramer announced that Eppley Cancer Institute in Omaha might use University land and University hogs to study the viral nature of cancer. He said that this possibility could not be realized without the University's development of disease-free pigs and availability of land at Mead, where no pigs have been raised for 15 years.

Fulbright Grant Applications Now Available

Application forms and information about Fulbright Scholarships for the 1963-64 academic year are now available in the office of Harold E. Wise, associate dean of the Graduate College, Administration 306.

Fulbright grants provide transportation, tuition and maintenance for one year of graduate study or research in any one of 46 countries. In addition, travel-only grants, to supplement other scholarship aid, are available to any one of seven countries.

General requirements include: U.S. citizenship, bachelor's degree or equivalent, language ability, and good health. Deadline for applications to be filed at Dean Wise's office is Oct. 31.

Stahl Speaks On Germany

Speaking on "Education for Democracy in West Germany," Dr. Walter Stahl of Hamburg, West Germany, speaking before a secondary education class Monday, said that Hitler came to power only because the German people were not sufficiently educated politically.

The West German editor and publisher said all the trouble the Germans have had was brought on when Hitler was made their leader.

In reviewing the events leading up to the war, Dr. Stahl said during the years of the Weimar Republic, Hitler never received more than 37% of the vote in free elections. Six weeks after seizing power he received only 44 per cent.

The first concentration camps in Germany were filled with political prisoners and not Jews, according to Dr. Stahl. A Gestapo report in April of 1939, before the start of the war, showed more than 27,000 Germans had been charged with political crimes, and more than 122,000 were already in prison.

Later on, an overwhelming majority of the people knew nothing of the annihilation of the Jews because that was one of the most closely guarded secrets in wartime Nazi Germany, he said.

The German army officer corps, churches and trade groups contained members of the organization for the promotion of Hitler's life was unsuccessful in July of 1944, 5,000 Germans were murdered in reprisal, Stahl reported.

Regarding Communist strength in West Germany he said their number has been declining steadily. In the elections of 1949 they received 4.7 per cent of the vote, and in 1953 only 2.2 per cent.

Dr. Stahl holds a law degree from the University of Berlin. He is executive director of the "Atlantik-Bruecke," the German counterpart of the American Council on Germany. He is also Executive Director of "Atlantica," an organization to overthrow Hitler.

publisher of "The Bridge," an illustrated monthly for Americans stationed in Germany and he edits several other West German periodicals.

UNICORNS Plans Arbor Lodge Tour

UNICORNS, an independent service organization, is sponsoring a bus tour to Arbor Lodge at Nebraska City Sunday.

UNICORNS president Bruce Holberg said that buses will leave the Student Union at 1 p.m. and will return at 8 p.m. Included in the tour is a trip through John Brown's cabin.

Tickets will be on sale from 12 to 5 p.m. on today, tomorrow, and Friday in the Union and at the Nebraska Center tomorrow and Friday at meal times.

Officers which have been announced for Sigma Gamma Epsilon, honorary earth science fraternity.

Robert Schrott will lead the group as president; Bruce Tohill, vice-president; John Bolstorff, treasurer; and Ray Solee, secretary.

Program Co-chairmen will be Roger Casey and Dean Stoneham.

Rev. Wallace J. Wolff who recently assumed his duties as protestant chaplain of the University Hospital in Omaha.

He received his theological degree from the Chicago Lutheran Seminary in Maywood, Ill., and conducted graduate study at the Hartford Seminary Foundation in Hartford, Conn. where he studied at the School of Missions and the School of Social Work.

Rev. Wolff was a missionary to British Guiana from 1945-49 and 1952-59. Prior to being Chaplain for the University Hospital, he was pastor of the Trinity Lutheran Church, Kansas City, Kan.

The 30 Nebraska museums which will contribute to the Nebraska Museum Conference in Plattsmouth Friday at which several University and State Historical staff members will speak.

The assembly, open to the public, will include speakers, panel discussions and lectures on displays.

Mrs. Alice Perry of Plattsmouth is chairman of the conference.

Two Nebraska graduates, Jerome Herink and John Shamburg, who are participating in a 4-H project which is modeled after the Peace Corps. Herink will be a delegate to Italy, and John Shamburg will be working with families in Peru. Both will be working in farming communities and their work will be financed by bankers' donations given in the drive for 4-H funds.

Both have been graduated from Ag College, and have had experiences working in county agents offices.

Union Sponsors Duplicate Bridge

Duplicate Bridge sessions for students, faculty members and town people are being held every Monday at 7:30 p.m. in the Student Union party rooms.

Every other week, master points are awarded. Jim Hornby, games manager, explained that this is the first time in five years that players have been given master points.

The session charge is 50c for students and \$1 for others.

New Theater, TV Course Available

A new course in theater and television has been announced by Doctor William Morgan, assistant professor of speech and dramatic art. Six students are presently enrolled in the program.

The course is designed for the student interested in specializing in professional careers in theater and television arts.

Panhellenic Schedules Annual Workshop Week

"Keeping in Touch" will be the theme of next week's annual Panhellenic Workshop Week.

On Oct. 17 there will be training school meetings in which representatives from each of the houses will meet in discussion groups to talk over eight different topics.

"Sometime during the evening, each group should discuss how the chairmen can keep in better contact with the other houses during the year," commented President Mary Jo MacKenzie at Monday's Panhellenic meeting.

"Ideas brought out at the meetings will be recorded," said Miss Madeline Girard, Panhellenic advisor, "and will be used for reference throughout the year. That's why we have the Workshop so early."

The Panhellenic Workshop program will begin with every sorority woman attending the church of her choice on Sunday. A dinner for Panhel delegates and house presidents in the Student Union is slated for 5:30 p.m. Monday.

Dean Helen Snyder will present the Panhellenic Scholarship Award at Panhellenic Night in the Union Ballroom Monday. Robert Ross, Dean of Student Affairs, will be the guest speaker on the program which starts at 7 p.m.

Exchange dinners are billed for Tuesday night.

SPACE, MISSILE & JET PROJECTS AT DOUGLAS

have created outstanding career opportunities for **SCIENTISTS and ENGINEERS**

B.S. degrees or better

Assignments include the following areas:

- Servo-Mechanisms**—relating to all types of control problems
- Electronic Systems**—relating to all types of guidance, detection, control and communications
- Propulsion**—relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics
- Environmental**—relating to air conditioning, pressurization and oxygen systems
- Human Factors**—analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment
- Heat Transfer**—relating to missile and space vehicle structures
- Structures**—relating to cyclic loads, temperature effects, and the investigation of new materials, methods, products, etc.
- Aerodynamics**—relating to wind tunnel, research, stability and control
- Solid State Physics**—relating to metal surfaces and fatigue
- Space vehicle and weapon system studies**—of all types, involving a vast range of scientific and engineering skills
