Students are urged to state their preferences on forms at the main Student Union desk. The poll will be conducted

Regents Tests Given Today

More than 5,200 seniors from 429 Nebraska high schools will be competing in the individual high schools for the annual University Regents Scholarships today.

For the first time in University history, the students will be competing for 100 full-tuition, four year scholarships in addition to the 250 freshman one-year scholarships.

The four-year scholarships will automatically be renewed the sophomore, junior, and senior years if the student maintains a 7.0 grade aver-

Dean Robert Ross of the Division of Student Affairs said the four-year scholarships will not be reassigned if any of the top 100 scorers fail to accept the award.

The 250 one-year scholarships will also be awarded to the top scorer of the Regent's exam unless the top scorer is also eligible for the four-year scholarship. The Board of Regents raised the value of the one-year scholarship from \$100 to \$204 a year.

An Insurance Company Career?

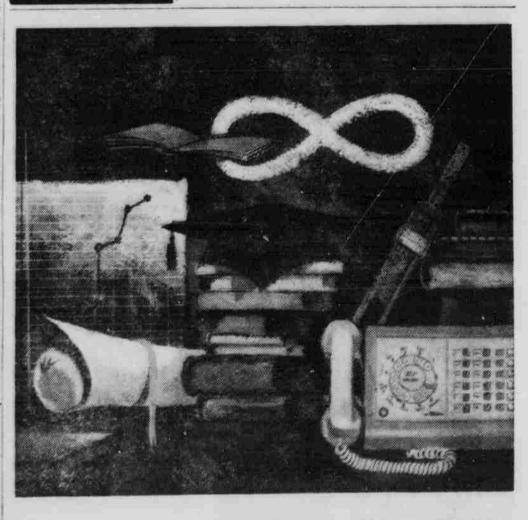

Talk it over with an E.M. interviewer

One of the major industrial insurance companies in the United States, Employers Mutuals of Wausau offers interesting, rewarding careers to hundreds of college men

Some who joined us majored in insurance, but most were unaware until they talked with our interviewers that their education could be applied and their aims realized in an insurance company,

Talk with our representative about the opportunities we can offer at our home office and in more than 100 cities large and small throughout the country. Our representative will be on the campus Thursday, Nov. 8, to interview senior men for positions as claim adjusters, underwriters, group representatives, sales correspondents, and accountants, and senior women for audit reviewer positions. Further information can be obtained from the place-

Employers Mutuals of Wausau

Learning never stops for engineers at Western Electric

There's no place at Western Electric for engineers who feel that college diplomas signify the end of their education. However, if a man can meet our quality standards and feels that he is really just beginning to learn . . . and if he is ready to launch his career where learning is an important part of the job and where graduate-level training on and off the job is encouraged - we want and need him.

At Western Electric, in addition to the normal learning-while-doing, engineers are encouraged to move ahead in their fields by several types of educational programs. Western maintains its own full-time graduate engineering training program, seven formal management courses, and a tuition refund plan for out-of-hours college study.

This learning atmosphere is just one reason why a career at Western Electric is so stimulating. Of equal importance, however, is the nature of the work we do. Our new engineers are taking part in projects that implement the whole art of modern telephony, from highspeed sound transmission and solar cells to electronic telephone offices and computer-controlled production techniques.

Should you join us now, you will be coming

to Western Electric at one of the best times in the company's history. In the management area slone, several thousand supervisory jobs are expected to open up to W.E. people within the next 10 years. And our work of building communications equipment and systems becomes increasingly challenging and important as the communications needs of our nation and the world continue to increase.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more Information about Western Electric, write College Rela-Harts, Western Electric Company, Room 6206, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric Interview when our college representatives visit your campus.

Principal manufacturing locations at Chicago, fil.; Rearny, N. J.; Baltimore, Md.; Indianapolis. Ind.; Affentown and Lauraidale, Ps., Winston-Selem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kameas City, Mo.; Columbus, Onio, Oxiahoma City, Oxia. Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokle, III., and Little Rock, Ark.
