

WEEK IN REVIEW
 UNIVERSITY OF NEBRASKA
 MAR 22 1963

Daily Nebraskan

Vol. 76, No. 86 The Daily Nebraskan Friday, March 22, 1963

CAMPUS . . .

REGENT VAL PETERSON'S motion to investigate the policies of the Daily Nebraskan failed to receive a second in Tuesday's Board of Regent's meeting. Peterson moved that the Board request the president of the Nebraska Press Association to appoint a committee of three to weigh charges made against the Daily Nebraskan and its policies by Fremont attorney Ray Simmons.

NEW BASKETBALL COACH, Joe Cipriano from the University of Idaho, was announced Tuesday to succeed Jerry Bush. Cipriano's four-year stay at Idaho was climaxed last season when his team produced a 20 and six won-loss record.

'FRIENDS' of the University met at the Lincoln Hotel Wednesday to discuss the future of the University. They named their organization, "Friends of the University." Regent Val Peterson said the purpose of the organization is to get support for the University through proper information and understanding. It will be separate from the school with downtown Lincoln offices and the staff will be paid with organization funds.

LB109 was passed by the Unicameral Friday. The bill, if signed by Gov. Morrison, will go into effect July 1. It will raise the minimum fine for minors in possession to \$100 and the maximum to \$250. Adults who purchase liquor for minors would be fined \$500 and be jailed for 15 days. A minor attempting to purchase liquor with false ID would accrue both the fine and a mandatory jail sentence of three to five days under the new law.

CITY . . .

CANDIDATES FOR CITY PRIMARY April 9, filed their names by the Wednesday deadline. The election commissioner's office accepted petitions for mayor, City Council, School Board and Airport Authority.

EDDIE GOODTEACHER, 18, of 1344 D, was released from a hospital where he was confined for treatment after suffering bullet wounds in the stomach and head on March 5. His wife, Karen Kay, 21, was charged with assault and intent to kill, wound or maim in connection with the shooting and was being held at city jail awaiting an April 10, preliminary hearing in County Court.

THE CITY WATER DEPARTMENT was named as the only customer of the City Light Department not paying its cost of service and which contributes no profit to expanding the City's light system. The City Light Department is \$24,901 short of realizing a 15 per cent return on its costs of electric sales, which it has set as its policy.

STATE . . .

NEBRASKA'S 49-MEMBER legislative reapportionment bill left general file with only one dissenting vote. Twenty-seven Senators voted for it and 15 did not vote. The lone dissenting vote came from Omaha Sen. Sam Klaver. The six other members of the Douglas County delegation were among those not voting.

LEGISLATURE VOTED 31-5 to introduce a bill banning public power district advertising that influences elections. The bill makes it unlawful for a power district to advertise in any manner which will tend to influence legislation or elections, but exempts activities of any person legally registered as a lobbyist for the district.

NATION . . .

ALASKA GOV. WILLIAM EGAN said "We have been screaming for protection along the northwest coast, but we don't seem to get any place with the Pentagon." He was referring to the Washington announcement that Russian planes have overflown the area near Etolin Strait and Kuskokwin Bay. The flights of two Soviet planes occurred between nine and ten o'clock last Thursday night (Alaskan time). The incident occurred against a background of a worsening trend in United States-Soviet relations.

SUN BEAUTY ENJOYS SPRING AFTERNOON

SUN BEAUTY—Taking advantage of the first day of spring and the bright rays of tanning sunshine, Barb Shuman, Alpha Chi Omega, spends her afternoon sunning. It is predicted that there will be a steady drop in attendance at afternoon classes as the temperature continues to climb and coeds don bathing suits.

Innocents Continue Program To Place Belts On NU Cars

The Innocent's society will continue the safety program, which it initiated prior to Christmas vacation, by outfitting all the cars on campus with seat belts, according to John Nolon, Innocents president.

The safety program was originally initiated in memory of Steve Cass, a member of the Innocent's society, who was killed in a car accident. The Innocents, with the aid of the Junior Interfraternity Council, will install seat belts, at cost, on March 31, April 5, and April 11. The work will be done at the north entrance to the Student Union.

Beginning on Tuesday, the Innocents will be selling tickets for the belts at \$5. The tickets can be purchased at any time from any Innocent. The Junior Chamber of Commerce is helping the Innocents and the Junior IFC in their project by purchasing the equipment and providing the needed to install them.

Purchased tickets may be brought to the place of installation where any color of

belt chosen by the student will then be installed. There will be four stands where the cars will be outfitted.

Each of the stands can handle one car every ten minutes, so there should be little waiting, according to Nolon. Some of the hazards involved in traffic accidents are capable of being remedied. Ditches, posts, trees and traffic signs are among these. But the most important factor in traffic accidents, the driver himself, can not change; he can only be further safeguarded.

The most effective way to do this seems to be with the inclusion, in automobiles, of safety belts, Nolon said.

Major car manufacturers in this country are beginning to realize this fact, and at least one includes them as standard equipment in all its new cars.

The Nebraska Accident and Records Bureau reports that proper use of seat belts would probably reduce the fatality rate by 50 per cent. The Legislature is currently considering a bill which would make it mandatory

that seat belts be present in all new cars.

The Innocents hope that their program will instill in all of the students, especially those who will travel home over vacation, an attitude toward safety and also will give them every possible chance for returning to school uninjured after Easter vacation.

Shugrue To Head Special Program For Sophomores

Dr. Michael Shugrue, assistant to the chancellor, will direct the inauguration of a new University scholastic program designed to interest outstanding undergraduates primarily sophomores in college teaching as a career.

Financed in the Graduate College by the Ford Foundation, the program will start with the fall term of this year with an enrollment of 60-70 students.

These selected students will have a special study program geared to permit accomplishment of the master's and PhD. degrees in a minimum amount of time.

The Ford Foundation has awarded the University a grant of \$297,500 to finance the program on an experimental basis through 1967 with provision to accommodate about 60 new students each year.

Dr. Park Given NSF Fellowship

Dr. John Park, a post-doctoral research associate in physics, has been announced as one of 185 recipients of a National Science Foundation Fellowship for post-doctoral work in science.

Dr. Park will do research in atomic and molecular physics at the University College, London. The fellowship includes an annual stipend of \$5,000 plus allowances for travel and dependents.

A 1952 graduate of Central City High School, Dr. Park, 28, received his Bachelor of Arts degree from Nebraska Wesleyan in 1956 and his PhD from the University in 1963. The Fellows were selected nationally on the basis of recommendations and evidence of scientific competence.

'Jingles' Are Not Substitute For Program

Dr. Perry Sandell, director of the Bureau of Dental Health, American Dental Association, says that jingles, songs, rhymes and slogans are poor substitutes for a good school dental health program, yet they still persist in some institutions.

Sandell spoke to the Nebraska dentists and educators at the University today.

At the annual workshop on dental health, he said, "the real question that must be asked is how well our dental societies are fitting into school dental health programs."

If the hometown dentist can assist the teacher by providing the correct information and teaching aids, then the teacher can develop in the pupil attitudes, habits and understanding that will aid the child in assuming responsibility for personal dental health.

The two-day dental health workshop, with the theme, "Nebraska Schools and Dental Health," ends Saturday at the Nebraska Center.

Largest Gathering Of Historians Set

One of the largest assemblies of historians and history teachers ever to meet at the University will meet here Saturday morning.

An estimated 350 persons will hear history authorities speak at the Conference for Teachers of History and Social Studies at the Student Union beginning at 8:30 a.m.

Dr. A. T. Anderson, University professor of history, will talk on "The Gospel According to Mark: Should It Be Taught?"

Dr. Anderson is an authority on Soviet thought and political history and will speak in the afternoon session beginning at 1 p.m.

The all-day conference is being sponsored by the Nebraska State Education Association and the University.

Other subjects and speakers are: "The United States and the 20th Century War," by Dr. David Trask, University assistant professor of history; "The Nazi Personality," by Dr. Robert Koehl, Univer-

sity professor history; "A Perspective of Democracy," by David Mickey, chairman, department of history, Nebraska Wesleyan University.

"Religion and Public Education," by Joe Fischer, graduate student; "The United States and Asia," by Dr. Robert Sakai, University professor of history; "U.S.-Russian Relations Following the World Wars," by Floyd Fithian, instructor of history, Nebraska Wesleyan University.

"Resources in Nebraska History," by Dr. Robert Manley, instructor in history; "Toward an Understanding of Latin America," by James Vivian, University graduate student.

Dr. James Olson, chairman of the University department of history, will address the assembly at the noon luncheon on "Some Reflections on Teaching History."

A concluding afternoon panel discussion will be held at 3 p.m. on "Teaching History in the Schools."

Moot Court Finals Scheduled Tonight

Final rounds to determine the winner of the Allen Moot Court championship at the Law College will begin tonight at 7:30 p.m. in the law building.

Having survived the sudden death tournament which began in their freshman year, the seniors are now down to the final brief and the semi-final rounds of argument.

Contestants in Round One, today at 7:30 p.m. are Clayton Yeutter and Gil Grady vs. Fred Kaufmann and Guy Bush.

Round Two contestants, 7:30 p.m. Monday, will be Tom Wagoner and Herbert M. Brugh vs. William Hemmer and Dean Dalke.

At 7:30 p.m. Tuesday, winners of Round One vs. Jack Barker and Ralph O. Canada, Jr.

The moot court trials, open to the public, will concern reapportionment in Nebraska. Such issues as area and history of the state are possible subjects to be argued by the competitors.

The judges, members of the Nebraska Bar, include John

Baylor, Robert Barlow, C. M. (Barney) Pierson, Charles Oldfather, Patrick Healy, Judge Patrick Boyles, Paul Douglas, Hal Booth, all of Lincoln; and R. D. Moody, West Point.

The championship round will be held in the Nebraska Supreme Court chambers at 7:30 p.m. next Thursday. Supreme Court Justices James Boslaugh, Herbert Spencer and Robert Brower will hear the championship round.

Scientists Predict Storm Conditions

Dust storm conditions on the Great Plains can now be predicted with about 85 per cent accuracy, seven months in advance of the calendar year in which the storms will occur, reports the U.S. Department of Agriculture.

Using a wind-erosion climatic index, developed by USDA's Agricultural Research Service (ARS) in cooperation with the Kansas Agricultural Experiment Station, scientists can forecast in May the number of dust storms that are likely to occur in a 12-month period beginning the following January.

Accurate estimates of the number of dust storms in the season ahead would help Great Plains farmers to decide whether special protective measures are needed. These measures, such as maintaining vegetative ground cover and establishing crop barrier strips or ridges to reduce wind velocity at the soil surface, would be in addition to practices recommended every year in semiarid areas, according to University agronomists.

The new index is based on weather conditions that cause erosion and dust storms on the Great Plains and is expressed as a mathematical formula.

Geologist Is Head Of Science Group

Dr. C. Bertrand Schultz, director of the University museum and professor of geology, has been elected president of the Nebraska chapter of Sigma Xi, national honorary in the field of science.

Other new officers, faculty members at the University, and their areas of science are: Dr. Henry Holtzclaw, chemistry, vice-president; Dr. Josephine Brooks, home economics, executive secretary; Dr. James Drew, agronomy, associate secretary; David Cook, engineering mechanics, treasurer; and Dr. Leslie Hewes, geography, counsel.

Retiring president is Dr. Dwight Miller of the department of zoology and physiology.

Kansas City Tour Set For Vacation

By SUSIE PIERCE

Professional baseball, Cinerama, art galleries and supper clubs are some of the attractions available to students who take the Kansas City weekend trip being planned by the Union Trips and Tours Committee. The Kansas City trip is planned during Easter Vacation, April 19, 20 and 21. Students will fly to Kansas City on Frontier Airlines, stay at the Continental Hotel and have the entire time free to themselves.

The cost of the trip is \$32.50 which includes lodging, round-trip transportation, taxi fees, insurance and a guided tour of Kansas City. Meals and entertainment cost have been excluded because of varying interests and tastes.

The group will leave Lincoln at 10:15 a.m. on Friday, April 19 and return at 5 p.m. on Sunday, April 21. Students may board any Frontier plane in the state and fly from that area to Lincoln at a reduced rate in order to be in Lincoln on April 19. The trip is planned in con-

junction with Frontier's state college tours. Omaha University and Creighton University students will also be flying to Kansas City at this time.

Several attractions offered include: Kansas City-Los Angeles professional baseball game; Cinerama, "How the West Was Won;" Ice Capades; Science Fair; University Theatre, "The Devil and Daniel Webster."

Other areas of interest are the Nelson Art Gallery, People-To-People Headquarters, the Art Institute, KU Medical Center and the Truman Library. Tentative plans have been made for a meeting with former President Truman, depending upon his recovery from a recent illness.

"Students will be completely on their own for sight-seeing and entertainment," explained Lee Marshall, Chairman of the trips committee. "There is an unlimited number of events and places to visit."

All interested students should sign up in the Union Program Office. A \$16.00 down payment must be paid to insure the reservation.

GLEE CLUB TO SING

SING SUNDAY—This girl's trio will be featured with the Universityarsity Glee Club in its annual mid-year concert scheduled Sunday at 4 p.m., in the Student Union Ballroom. The trio is composed of Julie Berner, Shirley Nunn and Rosella Lange. Director of the Glee Club is Prof. Richard Grace.
