

One of few getting marriage's new bonus... he's beating draft.

—No Rush To The Altar— Lincoln Marriages Not Higher After Kennedy's Draft Decree

By JERRY HOFFERBER
Junior Staff Writer

Men are still not willing to plunge into the institution of marriage en masse even though President Kennedy has recently issued an executive decree declaring that married men will be taken as last choice for the draft.

Men are still not willing to plunge into the institution of marriage en masse even though President Kennedy has recently issued an executive decree declaring that married men will be taken as last choice for the draft.

According to Lancaster County Court, marriages have not been skyrocketing after the order was announced. There have been, however, more marriages this year than last. Men are still more willing to risk the chance of being drafted than their freedom.

Mrs. Fern Brown, who teaches a marriage course here at the University, expressed her faith in humanity in that she thought young men would not run out and get married just to beat the draft.

Colonel Drath, who is Deputy State Director of Selective Service in Nebraska, explained the new order.

Rath said that the first group to be drafted are the delinquents, second are the volunteers, third are the unmarried men under 26, next are the married men. The only group that is exempt is the fathers.

He said there is little chance of married men being drafted unless the draft board runs out of unmarried men or in case of an all-out war.

The draft quotas will still be the same; the order will not affect any change in size of calls. He said quotas are up this fall because every third year there is a deficit in the Armed Forces.

This deficit occurs because every year about one third of the Armed Forces are replaced by enlistments and draftees.

However in three years there are more vacancies than are filled by re-enlistments and draftees, thus the quotas have to be raised.

The Corncocks announced today that the Jimmy Dorsey Orchestra, under the direction of Lee Castle, will play at the Homecoming Dance at Pershing Auditorium on Oct. 26 from 9 p.m. to 1 a.m.

Tickets for the dance go on sale today at the booth in the Student Union, at Gold's, at Miller & Paine, and from any

LEE CASTLE

AUF Reveals \$6,700 Goal

The All University Fund (AUF) has announced a goal of \$6,700 for the AUF Student Drive to be held Nov. 4-25, AUF Publicity Chairman Steve Dort said.

The non-profit organizations which will benefit from the AUF collections will be chosen by a Student Poll taken in the Union starting tomorrow. Tonight fraternities and sororities will initiate the poll by casting their votes for their five favorite charities.

The ten charities the students will choose from are: Holt Adoption Program, National Association of Mental Health, Thomas A. Dooley Foundation, American Foundation for the Blind, Cedars Home for Children, NU Speech & Hearing Clinic, LARC (Lancaster Association for Retarded Children) School, Nebraska Orthopedic Hospital, American Cancer Society (Epilepsy Foundation), and the Nebraska Heart Association.

Past Ambassador To U.S. To Address Meeting Here

Dr. Tran Van Chuong, father of South Viet Nam's Mrs. Ngo Dinh Nhu and the man who resigned his ambassadorship to the United States in protest last August, is one of a contingent of notable speakers who will appear on the program of the Midwest Conference on Asian Affairs this week at the Nebraska Center

for Continuing Education. Dr. Chuong, a public critic of his daughter's behavior and of certain South Viet Nam governmental policies, will speak at 3:30 p.m. Saturday, Oct. 19, but his audience will be limited to those willing to pay the \$3.50 enrollment fee which the conference charges its delegates.

The Midwest Conference on Asian Affairs was organized a dozen years ago by a group of mid-America scholars and laymen interested in keeping up on developments in the Far East. Its sessions are open to anyone who pays the annual registration fee.

Dr. Robert Sakai, University of Nebraska history professor and editor of "Studies on Asia" which publishes selected papers from the conference sessions, said the meeting will open Friday morning, Oct. 18, with a discussion of U.S. high school and college Asian language programs and conclude Saturday with Dr. Chuong's talk.

Ag Union Offers Dancing Lessons

The Ag Union dance committee will sponsor dance lessons again this year, according to Ag Union manager Jim Hester.

The lessons, open to students and faculty, will be given in the Ag Union auditorium on Oct. 9, 16, 23 and 30 from 7 to 8.

AWS Approves Hours Extension

Extended visiting hours for women's living units to allow extra time to work on Homecoming displays have been approved by the Associated Women Students (AWS), according to Sally Larson, president.

Closing hours will remain the same, but the visiting hours in both men's and women's living units from Monday, October 21, through Thursday, October 24, will be from 12 o'clock noon until 11 p.m.

Tryouts Scheduled For KK Emcee

Kosmet Klub will hold tryouts for their Fall Revue master of ceremonies on Thursday, Oct. 17, at 7 p.m. in 345 Student Union.

Anybody from the student body is eligible. Candidates should prepare a five minute monologue appropriate for the fall show, "Komic Kapers." The date of the show, held annually in Pershing Auditorium, is Nov. 23.

Interested students should contact Doug Gaeth, telephone 477-1911, before 6 p.m. October 16.

Tryouts for Travelers Acts will be held on November 7.

Education Aid OK; 80-4 Senate Vote

Washington (CPS) — The Senate this week streamlined several crippling amendments to give impressive bipartisan approval by a margin of 80-4 of a three-part aid to education package.

The four Senators voting against the bill were Republicans Bourke Hickenlooper, Iowa, Roman Hruska, Neb., and John J. Williams, Del., and Democrat Strom Thurmond, S.C. Senator Hruska could not be reached for comment.

The roll call vote cleared legislation providing:

—Extension for three years of the National Defense Education Act (NDEA), which expires next June 30. It will increase college student loan funds by \$35 million over the present quota of \$95 million during the first year.

—Three more years for the impacted areas aid program. It provides about \$300 million a year in grants to local school districts with enrollments swollen by children of government workers.

—A vast expansion of federal outlays for vocational schools.

Chairman Wayne Morse, D-Ore., of the Senate education subcommittee said the \$1.4 billion vocational aid

measure was merely a "first installment" of the administration plans. It would provide funds for a five-part program of grants to states for vocational training over the next five years.

It is aimed at combating the school dropout problem and youth unemployment.

The three part bill hurdled the Senate after two days of debate. It goes now to a House-Senate conference committee where a compromise version will be worked out.

The Senate passed the bill after rejecting, 54 to 35, a civil rights amendment by Sen. Jacob K. Javits, R-N.Y. It would have authorized construction of non-segregated schools for children of federal employees who live away from government installations.

On Tuesday, an attempt to slash \$805 million from the bill by Sen. Barry Goldwater, R-Ariz., was soundly thrashed, 52-23.

Goldwater said he was only trying to hold the administration to what he termed promises of curtailing federal spendings to offset the proposed cut in income taxes.

In an interview with CPS, Sen. Morse said the vote was a good indication of bipartisan

support expected for other education legislation.

Waiting on the Senate calendar is another big bill for higher education. It provides \$1.5 billion in loans and grants

for college classroom construction.

Morse said the "bricks and mortar" bill will probably be taken up by the Senate later this week.

IFC Rush Committee Plans Year's Activities

As a result of interviews held Sun., Oct. 13, 11 men were selected to serve on the IFC rush committee for the coming year.

Those chosen: Bill Ahlstrand and Mike Barton, Phi Kappa Psi; Bob Carstens, Sigma Phi Epsilon; Chuck Clement, Delta Tau Delta; Lee Marshall and Van Vahler, Beta Theta Pi; Bruce Wright, Phi Delta Theta; Chuck Brummund, Beta Sigma Psi; Dick Levine, Sigma Alpha Mu; Tom Brandzel, Phi Gamma Delta and Bob Crum, Sigma Chi.

According to Tom Schwenke, IFC rush chairman, the rush committee will be concerned with the following primary objectives during the 1963-64 school year:

—expanding the open rush program to reach all interested and eligible rushees and to assist the individual fraternity rush chairmen in contacting these men.

—setting up a Spring Rush Week to permit those scholastically ineligible to participate in the fall rush to have the opportunity to pledge if they meet the 5.0 grade requirement after the first semester. This will also include those men who did not pledge during rush week and have the desire to do so second semester and those who will have indicated an interest in fraternities by signing up for open rush.

—preparing a rush film de-

—picting typical fraternity activities. The committee will then use the film with panel discussions and lectures at an informal IFC coffee hour for Parents Day, Nov. 9.

—establishing a permanent lecture-tour program whereby the rush committee will sponsor trips to different Nebraska high schools to speak at assemblies, PTA meetings, etc.

—selling more advertising for the rush book to enable the committee to present a more attractive rush book and to increase funds for expansion and improvement of the parent's rush pamphlet.

Said Schwenke, "All of these objectives are of such a nature that expansion and improvement will always be necessary. The rush committee can be of significant help to the fraternity system at Nebraska and a great asset to the IFC if we achieve these goals. Our immediate purpose is the attraction of a larger number of high quality men to the fraternity system at Nebraska. Our ultimate purpose will always be the betterment of the fraternity system both here and at other universities."

FMA Elects Future Head

Doyle Hauk has been elected chairman under instruction for the Fraternity Management Association (FMA) for this year.

Other members of the committee are Jerry Delzel, Sigma Alpha Epsilon; Rich Decker, Phi Kappa Psi; Mike Jeffries, Beta Theta Pi; Sam Baird, Beta Theta Pi; Bob Kerrey, Phi Gamma Delta; Dave Baker, Sigma Nu; Nick Vondrak, Phi Delta Theta; and Jeff Pokorny, Sigma Phi Epsilon.

Chairman of the committee is Grant Gregory.

The FMA goal for this year is to include all of the organized houses on the University campuses and Wesleyan campus in the program. To help carry out this goal, the FMA has a meat-buying project planned. They will take ten houses and put five of them on the FMA program for buying meat and five of them will be off the program. The results of this test will then be compared.

Jimmy Dorsey Group To Play For Homecoming Night Dance

The Corncocks announced today that the Jimmy Dorsey Orchestra, under the direction of Lee Castle, will play at the Homecoming Dance at Pershing Auditorium on Oct. 26 from 9 p.m. to 1 a.m.

Tickets for the dance go on sale today at the booth in the Student Union, at Gold's, at Miller & Paine, and from any

Then, for nearly ten years, they performed as top instrumental soloists for the leading orchestras of the period.

In 1934 they organized their own orchestra. Bob Crosby was their vocalist, Ray McKinley played the drums and the late Glenn Miller played

second trombone in this musical aggregation, which in two years established musical trading for an entire generation.

Finally, Tommy and Jimmy decided to go their individual ways, and two new orchestras emerged. Tommy's orchestra was the large dance band to play theatres as the featured attraction, and during the late 1930's he established box-office records which stand to this day in many houses. Tommy was responsible for the first success of many top vocalists, including Frank Sinatra, Dick Haynes, Jo Stafford and Connie Haines. Jimmy, on the other hand, emphasized a sweeter style which brought such tunes as Annapola, Green Eyes, and Besame Mucho into the class of standards, and was responsible for such stars as Helen O'Connell, and Bob Eberle.

For nearly 17 years, the Dorsey brothers carried on a friendly feud, which ended at the Hollywood Palladium when Tommy and Jimmy joined forces again.

After Tommy's death the orchestra adopted Jimmy's name and Lee Castle, "Mr. Trumpet", became musical conductor and featured trumpeter for the group.

Steve Carter, Sandra Chapman, Bill Coufal, Don Ray Criuse, Jim Ensz, Diana Focht, Ian Forsyth, Sharon Giddings.

Kathy Glynn, Sue Graham, Bill Gottfredson, Becky Haas, Wendy Hall, Pam Hedgecock, Mark Hogg, Connie Holmstedt, Pam Homer, Harriet Hunker, Kay Johnson, Janet Joynt, Nelda Keller, John Kenagy, Jim O'Kief, Mike Kirkman, Dick Korre, Sue Leonard, John Luckasen, Wayne Lunsford, Rebecca Marshall, Joan McClymont, James McShane, Rick Nau.

Velta Niemanis, Bob Peterson, Gary Pettit, Don Pont, Jay Pokorny, Jacki Piley, Charyl Rudat, Ruth Snyder, Dennis Stalzer, Joanne Stohman, Sandra Stork, Andy Taube, Dennis Trippel, Rodney Tuenge, Karen Westerberg.

The lively lecturer has made important contributions to the measurement of distance in space by the use of variable stars as reference points which pin pointed the location of our solar system within the milky way, adding weight to the "theory of the expanding universe."

Frosh Mart Held Today

Twenty-three organizations will be represented at the Freshman Activities Mart which will be held today in the Student Union from 2-5 p.m.

Ag freshman may sign up between 12 p.m. and 3 p.m. at the Ag Union. Fourteen organizations will be represented.

These organizations will have representatives in their booths at all times to answer questions concerning their activities.

The booths will be arranged alphabetically in the ballroom at the Student Union and in the lobby of the Ag Union, and participating groups will decorate their booths to draw the attention of the students.

Shapley's Universe Story Fascinates Students, Faculty At NU Convocation

Telling the life story of the universe, ranging from the first hydrogen atom to the future glory of the human race, Dr. Harlow Shapley held the rapt and often-amused attention of faculty and students alike in the standing room only Nebraska Union Auditorium Monday morning.

Dr. Shapley, a noted astronomer, lecturer and philosopher and former director of the Harvard College observatory, developed his lecture along the theme "Galaxies and Mankind".

The author of 450 technical articles on various subjects, Shapley's has touched on topics such as the physiology and energy level of ants. Dr. Shapley has also been

awarded 16 honorary degrees and written six books.

He said that as an astronomer and scientist, he has devoted his life to the assessment of recent scientific discoveries and their relation to the human race.

The chief concern of Dr. Shapley has been to determine the position humans occupy in the universe and the direction of the "cosmic evolution" that is, the expansion of the systems of galaxies as they move rapidly away from the earth. He said there is a great difference between where we think we are, and where we actually are.

With the aid of slides, Dr. Shapley pointed out that the center of our galaxy is 25,000 light years away and our own solar system is positioned on the arms of one of the spiral spokes which makes up our circular galaxy.

"It takes lots of 'girl hours' to make the calculations required for the determination of where we are going and where we've been," said Dr. Shapley, explaining that girl

hours are shop talk for units of time spent solving a problem.

"You're made of the same stuff as the stars," Dr. Shapley told the audience, "and by knowing the background of our origin, we can learn where we are going." He related how a professor and graduate student at the University of Chicago had duplicated the conditions which existed on the surface of the earth shortly after its formation.

Using the four compounds known to be present at that early date, the researchers stimulated this mixture with electric discharges similar to lightning and found that the basic components of biological life as we know it, the 20 common amino acids, had developed in the solution. Thus, he said, it has been proved life formed in a natural way, without supernatural influences.

"We're only a little ripple of the cosmic ocean," said Dr. Shapley, "but what an ocean, what a wonderful ocean."
