

New Guard

Con't. from P. 2

carry these states and should the margin be sizeable, the fate of any of these four candidates would have to be termed uncertain if not pessimistic.

The formula for victory in either one of these contests is necessarily dictated by the conditions confronting the Republican candidates in each of these states. Wisely, Senator Goldwater has left the question of support of his candidacy up to each one of these Republican hopefuls.

The moderate dilemma is inherent in the concept of a two party system. The American political system with few exceptions has mechanically divided itself into two camps since the days of the Federalists and Anti-Federalists with the express purpose of gaining office.

Although this mechanism remains, each party has been dominate over a particular period in the country's history.

If the Republican Party is ever to regain the leadership of both the executive and legislative branches, party organizations and leadership must be ready to accept electoral advantages from whom ever and where ever they might come and regardless of specific political philosophy, whenever it is to the advantage of a total party victory.

Christy Minstrels Fill Up Weekend; Parties Tonight

Chancellor's Week

Chancellor Hardin addressed the Omaha Rotary Club at noon on Wednesday.

He then went to Kansas City for a meeting of the Kansas Federal Reserve Board. Hardin is the chairman of the Omaha Board of Directors of the Federal Reserve Bank of Kansas City.

Today the Chancellor will attend the Regents meeting at 10 a.m. in Omaha.

Scrip Magazine Needs Workers

Undergraduate students interested in working on Scrip magazine should leave their name and address in the English department. Scrip magazine is compiled by the undergraduates every semester. It includes stories and poetry submitted by students.

Workers are needed to sell advertising, select articles and make up the book. Interested students may also call Shari Colton, editor, or Dr. Robert Narveson. Awards are given to the individuals who submit the best short story and the best poetry.

NEBRASKAN APPLAUDS

The University's Red Cross Chapter has announced this year's new committee heads and assistants. They are: International Committee chairman, Sue Thompson; Veteran's Hospital assistants, Jane Irvin and Marsh Bull; Orphanage assistant, Barb Copland; Special Projects and Entertainment, Dede Darland; Publicity, Ladd Lonquist; Adult Activities assis-

tant, Barb Beckmann; and Water Safety assistant Claudia Parks.

New officers of Alpha Gamma Rho's pledge class are Rich Williams, president; Mike Nerud, vice-president; Glen Roe, secretary; Bruce Madson, treasurer; Gary Geiser, social chairman; Ron Weise, sergeant-at-arms; and Loren Lindahl, Junior I.F.C. representative.

Women's Club Sets Foreign Students Tea

A tea for foreign married students will be held Sunday from 2 p.m. to 4 p.m. in the Lutheran Student House at 535 No. 16th.

The purpose of the tea, sponsored by the Faculty Women's Club, is to find out if there is interest in continuing conversation groups for the wives of foreign students.

Last year, the Faculty Women's Friendship group met once a week for "girl talk" with the foreign student wives.

All married foreign students are invited.

What every graduating engineer (and his professors) should know about AC-MILWAUKEE

Sure, everybody's got a career program. But we think you'll find ours a little more stimulating, more rewarding, and at least intriguing enough to spend the next minute or so reading about it. We call it our "Career Acceleration Program." In it, you'll work on such advanced projects as an avionics system for supersonic aircraft, a guidance/navigation system for the Apollo Command Module and LEM, and a new guidance system for the Titan III space launch vehicle. Seven hours a day you'll work on a specific project. You'll spend one hour each day in formal class work. These classes include courses in Inertial Instruments, Inertial Guidance, Digital Computers, Advanced Transistors, Advanced Servomechanisms, Integrated Circuits, Space Mechanics, plus other mathematics and undergraduate disciplines as required.

We also have a Tuition Refund Plan that pays all of your tuition costs upon satisfactorily completing college-level courses of study undertaken voluntarily. Our "in-plant" evening educational program offers additional opportunities for technical improvement.

If you are completing your BS or MS degree in EE, ME, Math or

Physics, we invite you to inquire about the opportunities at any of our three locations. AC in MILWAUKEE—our main research, development and manufacturing facility. AC in BOSTON—our Research and Development Laboratory specializing in advanced inertial components; spacecraft and avionics guidance/navigation systems. AC in LOS ANGELES—our Research and Development Laboratory specializing in advanced airborne computers; ballistic missile and space booster guidance/navigation systems. For further information, see your college placement office regarding a General Motors/AC on-campus interview, or write directly to Mr. G. F. Raasch, Director of Scientific and Professional Employment, Dept. #5753, General Motors Corporation, Milwaukee, Wisconsin 53201. PhDs, please note: Positions are available in all three AC locations for PhDs, depending on concentration of study and area of interest. You are invited to contact Mr. Raasch for additional information.

AC SPARK PLUG The Electronics Division of General Motors An Equal Opportunity Employer

INTERVIEW DATES—October 21 and 22
