

Nebraska Wrestlers To Journey To Laramie, Wyoming For NCAA Wrestling Meet Competition

Nebraska will send five wrestlers to the 35th annual NCAA Wrestling Championships this weekend at the University of Wyoming in Laramie, Wyo.

LaVerne Allers, who finished second at the Big Eight championships and 3-0 in duals, will wrestle at 191 pounds and Carel Stith, a

third place finisher at the conference meet and holder of a 14-2 record, will enter as a heavyweight.

In the lighter classes Rick Allgood will take on the 130 competitors after a 9-6-2 season and Richie Kerr, a 7-7 finisher, will try at 147.

The fifth, Ben Barends, will take an 8-7-1 dual record into

the 177-pound class.

All are sophomores except for Allgood, a junior.

Nebraska finished sixth behind Oklahoma State, Iowa State, Oklahoma, Colorado and Kansas State at the conference championships last weekend.

Eliminations at the NCAA begin Thursday on Wyoming's six-mat set-up with quarter-finals, semifinals and first and second round consolations set for Friday. The meet concludes Saturday with the consolation semifinals and finals and the championship finals.

Bob Zenner Named Sportscaster Of Year

Bob Zenner of KOLN-KGIN radio and TV stations was awarded the Nebraska Sports-caster of the Year Award for the fourth consecutive time Wednesday.

The scotter's work with Cornhusker football and basketball combined with his activities on the regional and local high school scene to win him the honor.

Voting for the title is done by fellow broadcasters, which adds to the prestige for the winner.

Zenner will represent the state at the national convention of sportscasters on April 5-6. At this gathering a national Sportscaster of the Year is elected by his associates.

From the Daily Nebraskan goes congratulations to a sportscaster of highest quality. We extend our thanks for the major role Mr. Zenner has played in bringing Cornhusker athletics to the peak they now enjoy.

Residence Hall Contracts 1965-66 Academic Year

1965-66 Residence Hall contracts will be available Monday, March 22nd.

Off campus students may obtain a contract in Room 103 Administration Building.

Residence Hall Students may obtain their contracts in the Residence Halls.

Sam's Salvos

Next week we will announce the results of the voting for the All-Intramural basketball teams.

We have had good results on the balloting thus far, and teams are reminded that they have until 5 p.m. Monday to submit their ballots. Any team not submitting a ballot must forfeit all the votes received by any players of that team.

The "C" league team and the "B" league teams will be announced early in the week, and the "A" team selections, which shall in effect constitute the All-Intramural selections will be announced later in the week.

The ballots cast so far indicate an "A" team with size, speed, and ability which could very likely hold its own with most of the small college teams around.

I have a new sports assistant in the person of James Pearce. Jim has been doing writing for the sports page all semester, so his name should by now be a familiar one to sports page regulars.

For those who as yet haven't heard, Amos Alonzo Stagg, a legend in his lifetime, now can be a legend in death. Stagg died Wednesday at the age of 102.

Stagg was head coach for fifty-seven years at various schools, including forty-one years at the University of Chicago. His teams compiled 309 victories in those fifty-seven years.

IM Ballots

The deadline for submitting All-Intramural Ballots has been moved up one week to Monday, March 22.

"An Equal Opportunity Employer"

If your roommate says the Bell System helped invent hi-fi, stereo and talking movies,

don't bet. You'll lose.

In the course of their studies of the nature of sound, Bell System scientists have been able to make significant contributions to all three forms of entertainment.

You might say that it was because the discoveries were there to be discovered by the first explorers to come down the trail.

When the century was still young, we realized that if the telephone were to come up to its potential, the nature of sound had to be much better understood than it was then.

This led to the largest, most comprehensive

study of sound ever undertaken by anyone.

To capture sound for study, Bell Telephone Laboratories developed the first electronic recorder for phonograph discs. For the first time, performers recorded into microphones.

Then, in 1925, Bell Labs perfected an electronic system that synchronized sound and action on movie film. The talkies were born.

To get better sound reproduction, they started experimenting in 1933 with ways to separate high and low frequencies to prevent distortion. The result was a single-groove,

multi-channel disc—the basis of today's stereophonic industry.

Nevertheless, these contributions were by-products of the real effort, which was to make telephone service better. We are proud, of course, that they helped build and improve whole industries.

But we're prouder of the sound qualities in the telephone of today.

If you'd like to do business or engineering work you're really proud of, we'd like to talk to you.
