Sign Thieves Warned

The recent arrest of two University students brought to light a commonly accepted breach of law practiced by many members of the University community.

The art of sign stealing, no matter how petty it may seem, is a crime deemed a misdemeanor or in some cases

a felony

In legal statutes, the term "prank" does not exist; this fact must be impressed on the potential "sign stealers". Not only does the sign thief, unfortunate enough to ne arrested, receive a heavy fine or jail term, but a criminal record which must be borne the rest of the person's life. A man or woman, regardless of the amount of their education, may find it extremely difficult in obtaining the high level job which an unconvicted person might easily

May we suggest that sign thieves think twice and consider the possible consequences involved. It's your fu-STUDENT TRIBUNAL

Monday, when our reporter attended her first meeting, she was informed that PanHel would meet in "executive session." This apparently means that no one save PanHel members are allowed to hear what goes on in parts of the meeting.

Other campus organizations have been known to call "executive sessions" on occasion, too, usually when they feel that they are discussing a problem that would "be better unprinted," such as discrimination, drinking, etc.

Realizing that anything we say personally about this problem-and we consider it a very grave problem-will immediately be construed by many narrow minds as an attack against the Greek system, we revisit an editorial by Gary Lacey (Delta Tau Delta) in the Daily Nebraskan of Dec. 6, 1963

"At the Interfraternity Council meeting last night the Daily Nebraskan reporter and all unofficial observers were asked to leave. J. Winston Martin, associate dean of Student Affairs, spoke on the incident. When a reporter is asked to leave a meeting of people who represent us. every fraternity member is, in essence, being denied his

But I'm concerned. Unless I misread the notice. the people providing this service are described as "counselors . . . selected on the basis of excellence . . . in mathematics." Their functions are ". to answer specific questions from students relating to mathematics." They sound like tu-

Who, then, is a counselor? Evidently anyone who is a bit diffident about defining his real functions feels he gains status (or hides his motives) by calling himself a counselor. If we just wait long enough, and the trend continues, the world will be made up of specialized sorts of counselors who make their social contributions by counseling everybody else.

The Communists control

teresting turns. The general opinions (which I learned by asking for a show of hands) were well expressed by Michael Richter of the Gadfly. (Keep in mind here that HUAC was created in 1945 by the 79th Congress to investigate the activities of the Communist Party in the United States. It drew popularity immediately when former State Department official, Alger Hiss, was denounced as a communist spy by Whittaker Chambers. The famous case brought us to a realization that communism has its subversive fingers everywhere).

HUAC is no good - who are they to decide who is un-American?

Incidentally, the audience at the films was amused when I suggested our historical documents like the Declaration of Independence. Constituion, Bill of Rights, were perhaps general criteria for making such decisions. Everyone interprets these differently, they told me, so how can they be used as any sort of basis? Therefore, HUAC was dubbed un-constituional since no committee has the right to decide who is un-American.

Michael Richter defines Americans as "either people born in this country or naturalized citizens." Mr. Richter also sees "no reason why a Communist (or a Facist) should not be considered an American, nor any justification for a committee that investigates un-American activities, in this land of the brave and the free.

Remembering that HUAC is an organization born by our own Congress, something which we created and supposedly uphold, would you prefer to side with the opposition? Have we become so apathetic or blind that we will criticize and destroy the few attempts made to counteract our enemy's tactics? I hope not. We know that when the Communists say they will destroy us (and consider already controlled) they indeed intend to do just that.
