

High School Journalists To Get Press Awards

High school students from 67 schools across Nebraska will be attending the Nebraska High School Press Association Convention in Lincoln today.

Over 7,000 Participate In Regents'

Over 7,000 Nebraska high school students will participate in the 38th annual University Regents' Scholarship Examination Saturday.

Participating students compete for 100, four-year, full-tuition scholarships to attend the University and 200, one-year scholarships.

The examination now includes five areas—mathematics, science, social studies, English, and a composite section. This is the first year testing has been done on a Saturday.

Dr. Edward Landak, director of scholarships and financial aid at the University, explained that the examination can be beneficial to a student even though he may not receive a Regents' Scholarship.

vention which will be held at the Nebraska Center For Continuing Education.

The convention is being sponsored by the NHSPA, the journalism division of the Nebraska High School Activities Association, and the University School of Journalism.

Registration for the convention will be from 8-12 a.m. at the Center. A general session will be held at 9 a.m., featuring Mr. James Schwartz, Director of the School of Journalism at Iowa State University, as the speaker.

Sectional meetings will be conducted in the morning and afternoon by the faculty and students of the School of Journalism. Student assistants Susan Leonard, Jim Patten, Frank Parich and Steve Hungerford will head some of the sessions.

A convention banquet and awards presentation will be held at 6 p.m. in the Omaha Room. R. Neale Copple, Director of the School of Journalism, will preside.

Awards that will be presented include the Riddle Memorial Pin, The KMTV Yearbook Trophy, The Scottsbluff Star - Herald Yearbook Trophy, The Omaha Sun Newspapers Yearbook Trophy and The Omaha World-Herald Newspaper Plaques.

Paul Swenson, Director of The Newspaper Fund, Inc. of the Wall Street Journal, will give the address, "Why Should I Go To College?"

James Morrison, Assistant Professor of Journalism, is the convention director.

VOLUNTEERS JOIN DIGS . . . at excavation sites in England.

Summer Archaeologist Excavate English Sites

An archaeological summer study program in Europe is being offered to college students by the Association for Cultural Exchange, a British non-profit organization.

Fifty volunteers will first join a three-week seminar for training in British archaeology and excavation techniques at Westminster College, Oxford. The students then split up into small groups for three more weeks digging on an archaeological site.

In previous years, students have joined "digs" on the paleolithic in Suffolk, an Iron-Age hill fort on the Welsh Marches, a Roman Palace near the South Coast of England and a Roman

town near Stratford-on-Avon.

Two courses are offered in this study program including a general survey course for students without previous knowledge of archaeology or a specialist course for anthropology majors and graduate students. Class work will be illustrated by visits to Cheddar Caves, Stonehenge, Winchester, Chedworth Roman Villa and Verulamium.

The program which has been conducted for three consecutive years begins with the three-week academic courses at Westminster College July 10 and continues until August 20.

Total cost of the program is \$685, including round-trip air transportation

Unidentified Flying Objects 'Possible But Not Provable'

Whether unidentified flying objects are really seen is possible but not provable, was the indication of an East Union lounge series discussion panel.

Members of the panel were Dr. Nora Brassard, a clinical psychologist specializing in hallucinations; Carroll Moore, professor of astronomy at Nebraska Wesleyan University and Allen Griesemer, geologist and curator of educational services at the University planetarium.

This week a research team from the University of Colorado was given a \$300,000 grant from the federal government to investi-

gate reports of unidentified flying objects (UFO) throughout the U.S.

More than 90 per cent of UFOs have been identified as objects which are ordinarily seen, Moore said.

Comets, meteors and fireballs, in general, can definitely be mistaken as UFOs, he said.

Scientists believe that the basic principles of aerodynamics and physics will apply throughout the universe as on earth, Moore stated.

The latest explanation for a UFO is a plasma, which has an equal number of negative and positive charges, he said, and could dart in

different directions by electro-static attractions.

Laws of aerodynamics and physics do not permit scientists to believe that UFOs are things in the terms of man-controlled flying saucers, Moore said. Griesemer said that informitarianism is an important ingredient in understanding the physical and biological world.

It seems possible that civilizations within the last few million years developed into highly efficient systems and departed from the earth and are now existing, Griesemer said.

Dr. Brassard said that perfectly rational and reasonable people have reported seeing UFOs under very normal conditions.

They had the perception of an object which may or may not have been there, but there is no evidence to say what it was, she said.

Psychologists call it a perceptual phenomenon, she added, and a hallucination is an extension of a normal phenomenon.

How perception is interpreted depends on learning, motivation and needs of the person, she said.

Hypnosis, a hyper-suggestible stage, neither validates nor invalidates original reports, Dr. Brassard said, and is not relevant to whether or not something was perceived.

GOP Nominees Parade With University YR's

More than 60 University Young Republicans and GOP candidates turned out Thursday night to parade through Lincoln in support of the Republican cause in Tuesday's elections.

Among the candidates in the parade was congressional nominee Robert V. Denney.

In 40 degree weather the students and candidates rode in the backs of convertibles and regular cars displaying signs for the GOP candidates.

The living unit having the greatest representation at the parade receives a trophy from the Young Republicans.

The parade began on the north steps of the Nebraska Union, went down 14th Street, and then moved over O St., attracting large crowds of Thursday night shoppers.

Drivers honked their horns

and riders waved their signs as the parade was guided by Lincoln police. One feature of the parade was a truck pulling a large billboard supporting Denney.

When it comes to politics, is big business a Mugwump?

Some sharp tongues define "mugwump" as a political animal with his "mug" on one side of the fence, his "wump" on the other. Clearer heads claim it a stamp of independence. The definition and corporate stance Western Electric takes is strictly nonpartisan. But nonpartisan as WE must be, we recognize that, to be an effective citizen, the individual must become a political partisan. And it means being more active than just showing up at the polls. So we do our best to encourage our 170,000 people to express their political leanings—in whatever direction. We do it by sponsoring a "Democracy in Action" program that takes no sides, but explores all angles. WE people—white collar, blue collar—lead it. Long before elections, courses are given at WE locations. Background subjects include such Soc. and Eco. considerations as—The Persistent Problem of

Unemployment... The Negro's Long Struggle... America's Balance of Payments. Booklets are handed out that answer questions like: "How can I get started in politics? How can I use my talents to serve my party?" Before elections, Back Your Party rallies are held. Bunting and posters hung. Politicians from both national parties are invited to speak. A dialogue develops. Thousands of WE people participate. It stirs up their political juices. Helps make them better informed, ergo: better citizens. As a national company, in the Bell System to make ever-better communications equipment, we believe such basic communications are vital. It's also fun! Western Electric MANUFACTURING & SUPPLY UNIT OF THE BELL SYSTEM AN EQUAL OPPORTUNITY EMPLOYER
