

Farmer: Civil Rights Movement Altering

By Mick Lowell
Junior Staff Writer

The problem areas of the civil rights movement are changing, according to James Farmer, founder of the Congress of Racial Equality.

A graduate of Howard University, Farmer studied theology in the Southern Methodist Church, but refused ordination because of discrimination within the church.

Farmer has long been prominent in the civil rights movement, particularly in New York City during the World's Fair demonstration controversy. He has been jailed numerous times throughout the South for his participation in civil rights activities.

Farmer was in Lincoln Friday and Saturday to tour the Lincoln Job Corps Center at the old Lincoln Air Force Base. He has resigned his position as leader of CORE to work for the Office of Economic Opportunity.

In an interview Friday night, Farmer summarized the progress of the civil rights movement and the areas where changes are still needed.

In delineating the phases of the civil rights movement, Farmer stated that political equality, (i.e., the right to vote), has to a great extent been achieved.

"There are still areas in the South where it is an act of great courage for a Negro to register to vote," said Farmer. But Farmer predicted that these areas will soon be reformed.

"Examples of the power of the Negro vote, and the failure of white backlash to materialize can be seen in Georgia, where Lester

Maddox may have been defeated, and in Maryland where George Mahoney was defeated," Farmer observed.

"The white backlash failed to snap," stressed Farmer. "California would have elected Reagan without Watts or the San Francisco riots. You must remember that California is the state that elected a song-and-dance man to the United States Senate in 1964."

The lack of economic equality is "one of the most difficult problems the civil rights movement must face," according to Farmer.

The question now is one of "employment and employability," Farmer stated. The way to eliminate poverty, according to Farmer, is to train the unemployed as the Job Corps is doing, not relief.

The next problem the civil rights movement must face is the right of the Negro to spend money, once he has it. The best example of the question in this area is closed housing.

Farmer said that he cannot foresee an open-housing bill coming out of the 90th Congress.

The black power movement is one solution to the Negro dilemma, according to many racial leaders. Farmer said that the black power movement has been "widely misinterpreted. Many people take black power to mean hatred of whites. That's not what it means to me. The Negro now needs to develop group pride," said Farmer.

Concerning Negro militancy Farmer said, "I consider myself militant. I think we'd all agree that the Underground Railway and the Boston Tea Party were militant. History has proved that the best way for a minority group to gain recognition is some sort of militant action."

Campus Calendar

Monday

PLACEMENT Office, 12:30 p.m., Nebraska Union.
PANHELLENIC, 3:30 p.m., Nebraska Union.

UNION Film 3:45 p.m., Nebraska Union.

TASSELS, 4:30 p.m., Nebraska Union.

PI LAMBDA THETA, 4:30 p.m., Nebraska Union.

BUILDERS First Glance, 4:30 p.m., Nebraska Union.

DELTA ZETA, 5:30 p.m., Nebraska Union.

PHI MU, 5:45 p.m., Nebraska Union.

DELTA KAPPA GAMMA, 6 p.m., Nebraska Union.

PHI MU, 7 p.m., Nebraska Union.

PHI MU, 7:30 p.m., Nebraska Union.

ENGINEERING Wives, 7:30 p.m., Nebraska Union.

MATH Counselors, 7:30 p.m., Nebraska Union.

Tuesday

HOME ECONOMICS Education Association, 4 p.m., Food and Nutrition.

ACE, 4:30 p.m., Teachers College.

Home Test Of Diabetes Distributed

Alpha Phi Omega, national service fraternity, in connection with the Public Health and Safety Department of Student Health, has distributed Diabetes Test Dreypak envelopes on campus.

The Dreypak test is a simple home test for diabetes. An hour or so after eating a heavy meal the subject dips the test paper into a urine specimen.

After letting the paper dry over night the subject mails it in the envelope provided. The results will be mailed to him free of charge.

Those people most likely to develop diabetes are relatives of diabetics, those over 40 or overweight.

Students desiring further information about the test should contact the Alpha Phi Omega office on the third floor of the Nebraska Union or Dr. Fred Sills at the Public Health and Safety Department at Student Health.

YOUR FIRST STEP AS AN ENGINEER IS VITAL! BE SURE... CONSIDER CESSNA

Cessna is the world's leading manufacturer of business, pleasure, and utility aircraft. Cessna helps you grow professionally with these worthwhile advantages:

Responsibility to work on total projects with a minimum of red tape/opportunity to follow a design through development, tooling, and production to the customer/diversity of assignments and the avoidance of specialization/the excitement of designing for people, with the added pleasure of flying what you design/mid-west location, with a progressive, cultural-minded community/home of two universities and one college/opportunity to pursue advance degrees.

Learn the complete Cessna story from the Cessna personnel representative who will be on campus for interviews on November 16, 1966.

Contact your placement office for interview schedule.

EMPLOYMENT

Excellent part time Job. Car necessary. Call 432-4646 anytime!

FOR SALE

Kuppenheimer tuxedo and white dinner jacket. Like new! Size 42-short. \$28 Hollywood Cleaners. 432-5365.

10' x 51' Detroit Deluxa Mobile Home. Ideal for married college students. Located at Skiview Trailer Ranch. 1030 No. 48th.

1966 Duesell 250 Monza. \$125 and take over payments. After 6 call 466-9498

1963 Fairlane 500. 2-door hard top, V8. Black. Call 466-3359, after 4.

1961 Chevy Impala. 4-door, hardtop, V-8, automatic. Good condition. \$790. 434-6628.

Fender Jazzmaster Guitar (Black), Fender Bassman Amplifier (used three months). \$450. No. 15th.

FOR RENT

Spaces available: Rainbow Trailer Court, half-way between East and City campus. 1801 Adams. 432-3417.

Large furnished apartment. East Campus. Second floor, parking. Couple or two men. \$60 per month. 477-6809 days.

Four lovely furnished rooms. Air conditioned. Couple. 211' Frost-free refrigerator. 432-3403.

800 So. 17th. Sunny 3 rooms, nicely furnished. Couple preferred. 432-3166.

Rent free, utilities included, furnished apartment in exchange for help for disabled man. Mornings 1 1/2 hours. Evenings 15 minutes. Available now. Call 466-2527.

LOST AND FOUND

To the person who removed Milton: Complete Poems and Major Prose from Carrol 721 on Monday morning. I need the book immediately because of the marginal notes. I will pay you more than you can get for reselling it. Contact me in care of the Rag.

FOUND: Girls light brown glasses in brown case with gold trim. In front of Andrews. Call 432-5088.

MISCELLANEOUS

*Guarantee handsome price for Gary Collins/Dick Bakula jackets: 8"-10" and Football Jerseys: 48-50-54.

DONUTS - 48 varieties. Raised-cake-rolls-bismarks. Open Tuesday-Sunday 8 a.m. to 10 p.m. G & S DONUT SHOP, 632 No. 27th.

Riders to Chicago area. Thanksgiving. Leaving Tuesday, Nov. 22. 466-6300. Ask for Don.

Upper class engineer wants apartment by November 1. Call Carrol Nast. 477-2462.

WE NEVER CLOSE

After graduation, what? Will you begin your career as an engineer or scientist or return to school for an advanced degree?

You can do both at NOL

If you are an engineer in the top third of your class or a scientist in the top quarter of your class, NOL offers you the opportunity to begin your career in one of the world's great laboratories and, at the same time, go ahead with your plans for graduate study.

NOL is a laboratory in the true meaning of the word, and one of the largest and best-equipped laboratories in the world. It is the nation's leading R&D establishment for Anti-Submarine Warfare (ASW), the Navy's principal high speed aeroballistics activity, and a leader in the development of new air and surface weapons. The spectrum of research at NOL ranges from nuclear effects to acoustics to explosives and materials. At NOL, weapons development is carried through from inception to design to prototype test and development. Since 1950, NOL has completed 209 new weapons and devices such as SUBROC, nuclear depth bombs, mines, projectile fuzes, underwater detection systems, and components and design data for POLARIS, TARTAR, TALOS, TERRIER, ATLAS and TITAN missiles. A civilian staff of over 3,000 people includes more than 1,000 professional engineers and scientists—experts with national and international reputations. Extensive and unique facilities embrace wind tunnels operating to Mach 17, hypervelocity ballistic ranges, the world's most exceptional hydroballistic facility, shock tunnels, 300g centrifuge... multi-million-dollar experimental facilities.

Here is your opportunity. Each year, NOL interviews outstanding engineering and science graduating students. Selects the handful that seems to be really creative. Takes them to its beautiful 875-acre "campus" (the front yard is a golf course) in the rolling hills of Maryland near the Nation's Capital. Puts them through an optional one-year professional development course with rotational assignments to various areas within the Laboratory to prepare them for permanent assignments.

From the very beginning, new staff members have an opportunity to contribute directly to significant projects... to be part of an organization where groups are small and emphasis is on the individual.

NOL offers you a graduate study program that is one of the largest and most productive programs in the country. Each year members of our professional staff receive M.S.'s or Ph.D.'s through this program. NOL has a significant advantage in its proximity to the University of Maryland. Many NOL staff members hold permanent part-time positions on the Maryland faculty, and graduate level courses are taught at NOL every semester. Maryland also offers many courses on its own campus—only minutes away—at times which are convenient to and keyed to the special requirements of NOL.

air systems, instrumentation for weapons evaluation and aeroballistics research, and performance of new concept feasibility experiments.

Chemical Engineers and Chemists—for research and development pertaining to high-energy propellants and explosives; high polymers; molecular and crystal structures; electrochemistry; high-temperature, high-pressure chemical equilibrium studies; and the thermodynamics of high-energy reactions.

Engineering Physicists and Physicists—theoretical and experimental research in a wide range of areas including signal processing, infrared radiation, acoustics, magnetic and semi-conductive materials, and detonation physics; plus weapon systems development and studies.

PROGRAM	COMPETITION	ADMITTANCE	SUPPORT
Part-time Graduate Study	Open to all qualified employees.	Approval by line management.	Refund of tuition and fees if course grade is "B" or better... approx. 1/2 time plus travel time for attendance.
Graduate Work-Study	Recent college graduates in certain engineering & scientific fields.	Selected by Personnel Officer... admission to local graduate school for M.S.	Full salary, tuition, books & fees... 2 days each week devoted to study and classes for 2 years maximum.
Intermediate Graduate Study	Recent college graduates in certain engineering & scientific fields.	Selected by Personnel Officer... admission graduate school... an honors program.	Full tuition, books, fees, travel per diem & 1/2 GS-7 salary... (over \$3800)... 2 semesters full-time.
Advanced Graduate Study	Scientists & Engineers, grade GS-11 and above.	Selected by NOL Training Committee.	Full tuition, books, fees, travel, per diem, & full salary for 2 semesters.

NOL NEEDS:

Aerospace Engineers or Hydrodynamicists—design studies of high-speed, high-performance re-entry systems, basic problems in theoretical and experimental aerothermodynamics, aeroballistics and hydroballistics; and aerodynamic design and development of hypervelocity wind tunnels and ballistic ranges.

Mechanical Engineers—conceptual design and development of warhead safing, arming and target-detecting devices for tactical and strategic missiles, underwater weapons, vehicle structures, and mechanical or electromechanical time and motion-sensing mechanisms.

Electronic Engineers—design, development and evaluation of underwater communications and detection systems, weapons guidance systems, influence fuzing, air-borne mis-

An NOL representative will be on campus...
