

IDCC Votes To Approve 2 Ratification Methods

By Mark Gordon
Junior Staff Writer

An amendment to the Inter-dorm Association (IDA) constitution allowing residence halls to choose between two methods of ratification in the scheduled Feb. 21 vote, was passed Monday night by the Inter-dorm Coordinating Committee.

The measure, proposed by IDCC chairman Jim Ludwig, states two ways a dormitory can ratify the revised constitution that was defeated six to four by the dorms in an earlier election last semester.

The first method of approval is the dorm voting individually and counting its vote by itself. In this case the constitution must be approved by a majority providing that over 30 per cent of the eligible voters vote, or 15 per cent of the

eligible voters will be required when less than 30 per cent vote.

The second approval method states that any number of dormitories may hold a joint vote on the constitution, provided they have the consent of their residents. The constitution must be approved by a majority vote provided that 30 per cent of the eligible voters vote, or 15 per cent will be required for passage if less than 30 per cent vote on the measure.

The amendment also stated that the constitution shall be ratified if seven dormitories approve it before March 1, and the IDCC passed an addition to the original amendment stating that all the dorms shall hold the constitutional election on the same day. Center Hall had originally planned to have their election on March 7 because of a conflict with the Hall

elections, scheduled for the same time.

Ludwig said that at the next IDCC meeting, scheduled Feb. 8, final constitutional discussion would be held, a review of the election procedure would be held and he would try to have copies of the revised constitution printed in large quantities for distribution to the various dormitory residents.

'Irma La Douce' Tryouts Schedule

Kosmet Klub tryouts for the spring show "Irma La Douce" will be held in the Union on Feb. 4 and 5 from 1 to 4 p.m. and on Feb. 6 from 7 to 10 p.m. according to Joe Carraway, publicity chairman.

All persons interested can pick up scripts in the Union placement office all this week.

Girls Learn How To Give Orders

By Jim Evinger
Junior Staff Writer

All campus males should take heed—there's a small group of coeds who might surprise some unwary guys on a date. With the course these girls are taking, it might be the guy who takes the orders! And the girls will know how to give them!

Six coeds are currently enrolled in the Air Force ROTC program and take the same aerospace courses as the men working for their commissions. The only difference is that they labs, and are not eligible to receive commissions.

Sue Shimonkevitz is starting her second semester in the program. She says that she takes ROTC because she's interested in knowing what her father does. He's been a career officer in the Air Force for 23 years.

"I don't think any of the guys in the class believed it when I walked in. Some thought I was just there because of the boy-girl ratio. But I really am interested. I'll take as many years as they let me," Miss Shimonkevitz said.

Rosemary Bowers said that her instructor treats her just like another cadet. The only exception made for the girls is that they are required to write a term paper instead of taking the lab test.

"There were 57 guys in class last semester and two girls," Miss Bowers said. Miss Shimonkevitz said she once walked into an orientation for freshman cadets and found herself alone with 200 men.

Janice Cejka enrolled this semester but dropped because of a schedule conflict.

"I thought it'd be a good experience. I also had a girl friend who took it last semester. Besides, my advisor told me I could meet my physical education requirement that way," Miss Cejka explained.

Captain David Roberts, assistant prof. of aerospace studies, said that girls in his classroom didn't have much effect on his teaching method. Three girls were enrolled last year. Coeds have just started taking the Air Force ROTC program in the last two years, according to Roberts.

A&S Advisory Board... Student Interest Needed

Making the campus population take the Arts and Sciences advisory board seriously is the biggest problem facing the board according to its chairman, Gene Pokorny.

"Students should be serious in becoming involved in the education they are receiving," Pokorny stated.

"A manner in which they can do this is through the Arts and Sciences advisory board and the establishment of similar boards throughout the University."

Pokorny said that the development of advisory boards under the direction of the student government could be one of the most far-reaching ideas initiated in the history of ASUN.

"The spring elections will decide another possible threat that faces the board," he stressed, "which is whether or not the board becomes another part of the collegiate 'game.'"

"The board's establishment will be answered favorably in the spring elections if we get good people, whose concern is education and not personal aggrandizement in collegiate honors, to run for elections," he declared.

The present board, established temporarily, is considering which of many projects it will work on for

the remainder of the semester.

"One of the ideas that the board has been discussing is getting interested students, who are participating in the honors program, together to determine how the program could be improved," Pokorny stated.

Pokorny believes that at the present time, the Arts and Sciences college does not have an honors program. "I would hope that such a group of interested students could decide how to establish a true four year honors program at the University," Pokorny explained.

The board is also considering investigating the possibility of developing an interdisciplinary approach to education in the Arts and Sciences college.

Pokorny explained that the effect of an interdisciplinary approach is to pull various departments into developing one course. An example would be the establishment of a course on urbanization in which the sociology, psychology, history and anthropology departments could work together.

Somewhat related to the interdisciplinary approach is the possibility of "team-teaching." This would involve more than one person teaching a course.

Another consideration of the board is investigating the role of survey courses offered to freshmen.

Pokorny stressed that taking a survey course does not always provide the student with an insight into the discipline; the student knows about the subject but doesn't understand the discipline involved.

Pokorny said that a re-designing of the survey courses in various subjects would eliminate students taking a topic for a major and later finding out it is not what they wanted.

The board is also considering whether or not to support those who are in favor of establishing a department of religion at the University.

"Presently, 90 per cent of the institutions throughout the country have such a department or offer courses in religion," Pokorny stated.

One project that the board is definitely going to take on is to try to establish "Senior Seminars in Higher Education."

Pokorny said that under this plan, each department within the college would establish non-credit seminars between seniors who have a major in the department and the department staff.

Hyde Park Date Not Set

The date for the first session of Hyde Park has not been selected because the Nebraska Union Talks and Topics Committee which sponsors the program is in the process of reorganization, according to Rich Scott, Nebraska Union Program Director.

Scott said that the schedule announcement will be made next week.

On Campus with Max Shulman
(By the author of "Rally Round the Flag, Boys!" "Dobie Gillis," etc.)

IT'S A NORTH WIND THAT BLOWS NO GOOD

Crushed between the twin millstones of January weather and final exams, you are saved from total despair, poor devils, only by the knowledge that winter vacation will soon be here.

Where will you go this year? Will it be Florida again, or are you tired of jails? Then how about Puerto Rico?

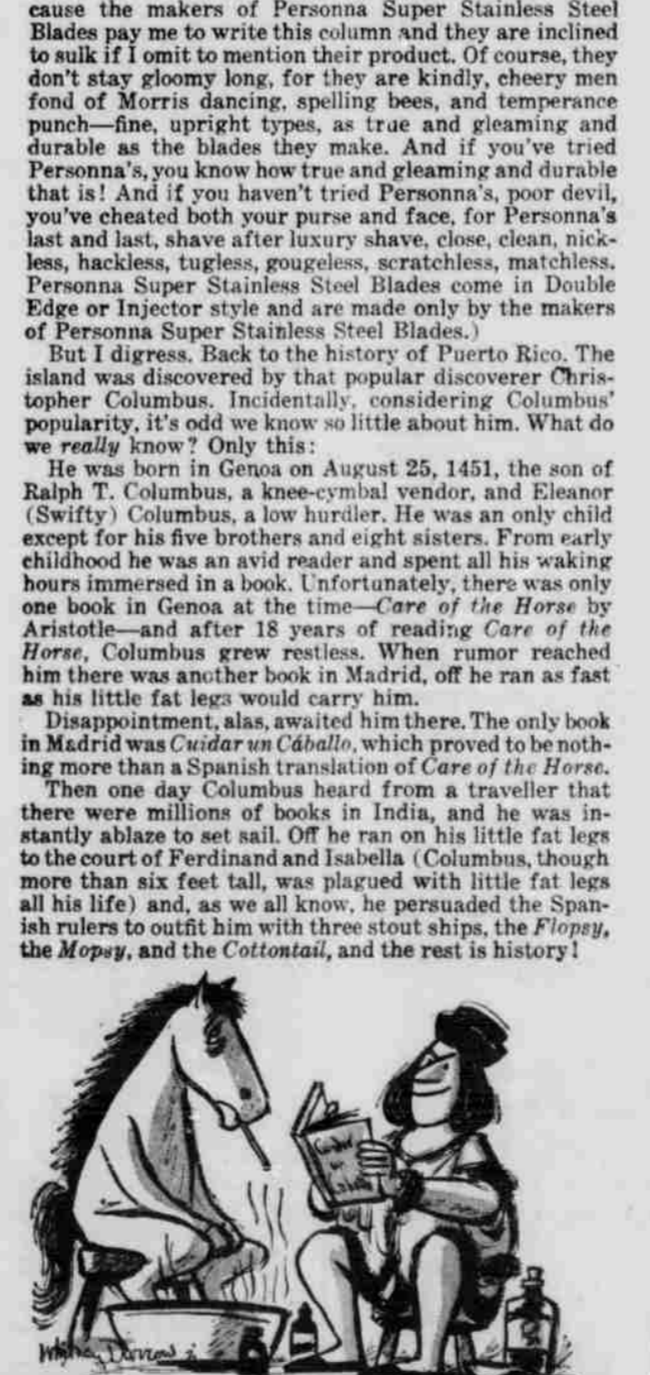

A most excellent notion, say I. A balmy and bounteous island with long white beaches and blue, blue skies and green, healing seas. And, most pleasant of all, the warm and gracious people of Puerto Rico! You don't even have to know Spanish to communicate with this friendly folk. Just learn three simple phrases and you'll get along splendidly: "Buenos dias" which means "Good morning," "Gracias" which means "Thank you," and "Que sera sera" which means "Your llama is on my foot."

In order to help you enjoy the fabled land of Puerto Rico it would be well for me to supply a bit of historical background. (It would also be well for me to say a few words about Personna Super Stainless Steel Blades because the makers of Personna Super Stainless Steel Blades pay me to write this column and they are inclined to sulk if I omit to mention their product. Of course, they don't stay gloomy long, for they are kindly, cheery men fond of Morris dancing, spelling bees, and temperance punch—fine, upright types, as true and gleaming and durable as the blades they make. And if you've tried Personna's, you know how true and gleaming and durable that is! And if you haven't tried Personna's, poor devil, you've cheated both your purse and face, for Personna's last and last, shave after luxury shave, close, clean, nickless, hackless, tugless, gougeless, scratchless, matchless. Personna Super Stainless Steel Blades come in Double Edge or Injector style and are made only by the makers of Personna Super Stainless Steel Blades.)

But I digress. Back to the history of Puerto Rico. The island was discovered by that popular discoverer Christopher Columbus. Incidentally, considering Columbus' popularity, it's odd we know so little about him. What do we really know? Only this:

He was born in Genoa on August 25, 1451, the son of Ralph T. Columbus, a knee-cymbal vendor, and Eleanor (Swiftly) Columbus, a low hurdler. He was an only child except for his five brothers and eight sisters. From early childhood he was an avid reader and spent all his waking hours immersed in a book. Unfortunately, there was only one book in Genoa at the time—*Care of the Horse* by Aristotle—and after 18 years of reading *Care of the Horse*, Columbus grew restless. When rumor reached him there was another book in Madrid, off he ran as fast as his little fat legs would carry him.

Disappointment, alas, awaited him there. The only book in Madrid was *Cuidar un Caballo*, which proved to be nothing more than a Spanish translation of *Care of the Horse*. Then one day Columbus heard from a traveller that there were millions of books in India, and he was instantly ablaze to set sail. Off he ran on his little fat legs to the court of Ferdinand and Isabella (Columbus, though more than six feet tall, was plagued with little fat legs all his life) and, as we all know, he persuaded the Spanish rulers to outfit him with three stout ships, the *Flopsy*, the *Mopsy*, and the *Cottontail*, and the rest is history!

Well sir, now you know all about the origins of Puerto Rico. So get packed and get going! You'll love it! Stroll the beaches, swim the coves, breathe the fragrance of hibiscus and bougainvillea. And remember always that the friendly Puerto Ricans are delighted to show you their customs, teach you their language. Why, I'll wager you'll soon know far more Spanish than the three basic phrases. You'll know "Hasta la vista" which means "See you later," "Por favor" which means "Please," and "El tren se paro en la estacion" which means "Your llama has eaten my passport."

Gracias from the makers of Personna for giving our blades such a cordial reception, and, for favor, how about trying another of our luxury shaving products — Burma Shave, regular or menthol?

George Bernard Shaw be darned!

Youth isn't wasted on the young. And the young don't waste their time at Celanese.

Our top people are never old-fashioned about any new idea, whether it comes from middle management or from our youngest college grad. We have a master plan and the vitality to make it work. Marketing is way-out and zeroed right in. Finance knows that we have better things to do with our money than let it grow barnacles... shelled out \$465 million in capital expenditures over the last 3 years. In the scientific department, we combine technical insight with an unusual grasp of marketing dynamics.

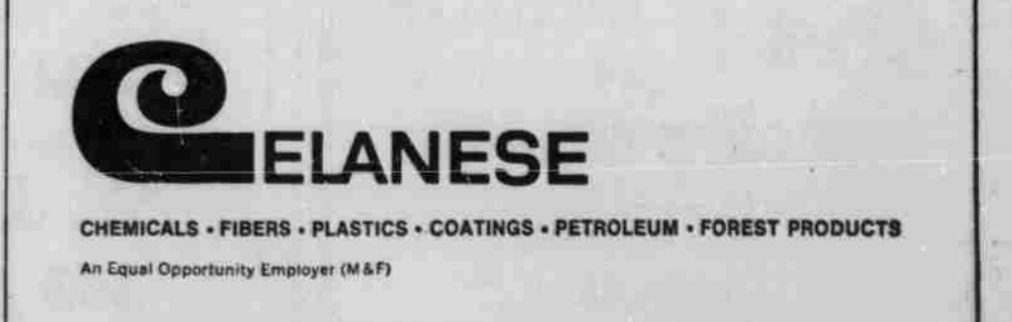

Thinking young explains how we chalked-up one of the most impressive corporate rebuilding jobs in recent history. How we turned what was basically a one-product business into a solid and diverse international corporation dealing in chemicals, miracle fibers, plastics, paints, petroleum and forest products. How we multiplied sales 5 fold in 10 years. How we now have 100 plants in the U.S., Canada, Latin America, Europe, Africa and Asia.

Possibly we could afford to relax a little. But success makes young blood run even faster.

Which means that the ambitious college grad couldn't find a more provocative opportunity anywhere else in American industry.

Accountants, Chemists, ChEs, MEs, Physicists, MBAs

An Equal Opportunity Employer (M & F)

Where does an engineer intern?

Before you decide on the job that's to start you on your professional career, it's good to ask a few point blank questions... like:

- Will this job let me rub shoulders with engineers doing things that haven't been done before, in all phases of engineering?
- Will I be working for an engineering oriented management whose only standard is excellence?
- Will I have access to experts in fields other than my own to help me solve problems and stimulate professional growth?
- Will I be working with the widest range of professional competence and technological facilities in the U. S.?
- Are engineering careers with this company stable... or do they depend upon proposals and market fluctuations?

Why not ask these questions about Bendix Kansas City when Mr. R. E. Cox visits the

University of Nebraska campus
February 8 & 9, 1967

Or you may write Mr. Cox at:
Box 303-MQ, Kansas City, Mo. 64131
