## Boycott On Bookstores Finishes Successfully

By Dave Buntain  
Junior Staff Writer

The University's first bookstore "boycott" has been termed a "great success" by ASUN Bookstore Chairman Rich Thompson.

Thompson's committee teamed with Alpha Phi Omega, a service fraternity, to promote and staff a student book exchange in the South Party Room of the Nebraska Union, Jan. 23 to Feb. 4.

"The exchange is not new to the University," Jim Benton, Alpha Phi Omega president, explained. "Our group has offered this service for five years, but with the manpower and the publicity of the ASUN we

were able to reach the students easier."

Thompson termed the buying of books an "oldstanding student problem." Students have been upset that the books they sell to commercial bookstores for 50 per cent of list price are immediately resold for 70 per cent of list price, he said.

"We felt there has been too much investigation and not enough action on the problem. Other campuses have been able to set up stu-

dent-run book exchanges successfully. We were not out to get the bookstores; we were out to give the students a much-needed service."

At the exchange, students who were selling books set their own prices, Benton said. Alpha Phi Omega added ten cents to a new book priced over a dollar.

Sellers received a receipt and, if the book was sold, people could cash in their receipt, but if it wasn't, the book was returned

## Work Starts On Building Coeds In Abel? . . . Visiting Habits Questioned

A public ground breaking ceremony for the University's new \$1.6 million Animal Science building was held Friday on East Campus.

Construction of the 54,000 square-foot structure is slated to begin this spring. Building contracts totaling \$977,117 were approved by the University Board of Regents Jan. 27.

A two-story portion of the building will provide for office space, classrooms and laboratory facilities, while a one-story section will contain facilities for animal research. Dr. Frank Baker, chairman of the animal science department, said.

Gov. Norbert Tiemann, Chancellor Clifford M. Hardin, leaders of the state's livestock industry and state and university officials participated in the ceremony.

Tiemann broke the ground by running an earth mover over the site.

Lauren Boekenhauer, president of the University's Block and Bridle Club, spoke for the animal science students at the event.

A brief speaking program at the meat laboratory preceded the symbolic moving of the first shovel of dirt at the building site just north of the laboratory.

Coed visiting hours will be the topic of discussion at a meeting at 8 p.m. Tuesday in the Abel Hall dining room, according to Dave Shonka, chairman of the committee to establish such hours.

Shonka said Russell Brown, administrative assistant to the vice-chancellor for student affairs, has arranged for the committee composed of Abel residence directors Richard Arndt and Bob Muschewski and Abel residents, Norm Mattson, Wayne Morton and Ron Schneider, to meet with a faculty committee to discuss the proposal. No definite date has been set.

Shonka said the committee, which received unanimous support from the inter-

terdorm coordinating committee (IDCC) Wednesday night, was encouraged by Brown to revise and re-view the original proposals.

The original measure called for establishing coed visiting hours for the residence halls from 1-5 p.m. each Saturday and Sunday. These hours would not have to be registered with the Office of Student Affairs as they would be on a permanent basis.

"Coed visiting hours are not like open houses," Shonka said. "Open house is usually associated with a party atmosphere while these coed visiting hours have no formal party atmosphere."

At an earlier meeting with Brown, G. Robert Ross, dean of student affairs and Helen Snyder, associate dean of student affairs, the proposal was turned down, but two points were clarified.

If a student assistant can not attend an open house on the individual floor, then a 'responsible' individual on the floor can substitute, provided that the dormitory staff is notified.

The second point said that if a resident desires to bring someone of the opposite sex to an individual room during open house, they can do so with the approval of the residence hall personnel.

Shonka viewed these measures as steps in the right direction by saying "the concept of coed visiting hours will enhance student pride in his individual living unit."

Committee member Morton, also Abel president, said, "There is a need for a revised policy on open houses and the coed visiting hours would be beneficial to students."

## Her Majesty Sold Ham

Rulers have historically procured their crowns after a victorious battle or through succession, but Linda Salisbury, named Block and Bridle Queen Saturday, won hers by selling 4,600 pounds of hams.

The queen is chosen on the hams she sells and by the vote of Block and Bridle members. Miss Salisbury sold 510 hams.

Louise Wallace was named first runner-up and

received a trophy and bouquet of white roses.

Georgia Stevens gave plaques to the other finalists — Jo McDowell, Nancy Coufal, and Vicki Nodlinski.

Tim Talbott, chairman of the ham sales, said that 2,313 hams were sold. The Block and Bridle Club bought \$20,869 of hams and sold \$22,733. The profit provides the money for the Spring Tour held during spring vacation.

## Campus Calendar

- PLACEMENT LUNCHEON, 12:30 p.m., Nebraska Union.

He's a college baseball player

Tom Hall is just another guy that likes to play baseball more than most. Since he's working his way through college, he doesn't have much time left to study. Maybe even less than you. That's why Tom enrolled in our Reading Class.

Tom admits that for eight weeks his schedule was worse than usual, his baseball was at stake. Women just had to wait!

Now that the course is over, Tom is still no egg-head—or professor. Baseball's still his first love. But there is one difference—Tom now reads 10 times faster. He finishes his work before it finishes him! And he's still eligible for the team.

Tom Hall is not a mental freak, nor is he a naturally fast reader. He learned this revolutionary technique of rapid reading at the Evelyn Wood Reading Dynamics Institute. He is one of more than 250,000 graduates in the United States.

You may not learn to read quite as fast as Tom Hall (and then again you might). But the nationally known Reading Dynamics Institute guarantees that you'll at least triple your reading speed with good comprehension . . . or receive a full tuition refund. Just to show that Tom Hall is not unique, here are the beginning and ending speeds of recent graduates in this region:

**Improvement by typical graduates in words per minute**

Utah school teacher discovers technique of dynamic reading.

Evelyn Wood first observed dynamic reading 18 years ago when a professor at the University of Utah read her term paper at an amazing 6,000 words per minute. Mrs. Wood's curiosity caused her to look for other exceptional readers, and over the next few years she found 50 people who could read faster than 1,500 words per minute, with fine comprehension, outstanding recall and great reading satisfaction. She was now sure it was possible to read faster than anyone had thought, but the question of how was not yet answered. It took 8 years of toil and research, working with naturally fast readers before she began to find the answers. Eventually she developed a technique whereby the average student was able to learn to read 3 to 10 times faster. She taught her method at the University of Utah for three years, refining it even more. Further studies were conducted at the University of Delaware, and the first Reading Dynamics Institute was opened in Washington, D. C. in September, 1959. Since that time institutes have been opened in 67 cities throughout the country, and national enrollment for the course has topped 250,000.

**Comprehension is stressed**

At a recent teacher training conference, Mrs. Wood emphasized that dynamic reading is nothing like the skimming techniques commonly used in speed reading courses. She said, "Skipping words is dangerous, as you don't know whether or not you have skipped a word which could change the whole meaning of the sentence."

"You read five times faster," she pointed out, not by reading every fifth word, but by reading five times as many words in the same amount of time. Mrs. Wood emphasized that using her technique of rapid reading, every word on the page is noted,

He can read 2,500 words a minute
