Soph, Jr. Carpenter: Sales, Income Tax May Join Needed To Raise More Funds NROTC

Any NU sophomore or junior college transfer who failed to join the Navy's ROTC program as a fresh-

man may now do so. Captain A. C. Mullen, professor of naval science, reports the application for the new two-year contract NROTC program is March 15. A 2.0 grade average is required.

Those applicants accepted into the program will participate in a course of instruction in Naval Science and drill during a six-week training period com-mencing in July, 1967. In the fall semester the

applicants are required to enroll in the Naval Science course continuing during their junior and senior

Each student will receive \$40 a month allowance during the two years he is taking Naval Science courses and completing his baccalaureate degree.

For more information, contact a member of the NROTC staff in Room 103, M & N Building.

on real estate, which pro-vided the state with 10.5

Nebraska must pass the sales and income tax bills to raise the money that Nebraska needs, state Sen. Terry Carpenter said Monday night.

Speaking at Cather Hall's Custer House, the Scotts-bluff legislator told an overflow crowd of the importance of the upcoming year upon Nebraska's future.

"This is the one year that the state of Nebraska could be remade," he said. "This can be the year we catch up by assessing broad taxes to acquire funds that we should have had years ago."

He said that determining Nebraska's revenue is a backward process as the "extent we can raise will depend upon how much we spend.

Carpenter said that the state will need to replace some \$70 million since several taxes have been repealed.

Almost \$50-55 million was lost when Nebraskans passed an amendment last November repealing the tax

cording to Mrs. Michalecki,

a new one for Lincoln.

"There were no prefixes

left in Lincoln that had the

1400 unused extensions we

said Mrs. Michal-

require," she said.

mills on farms and other real estate, he said.

"We are no longer able to levy tax on real estate because the state is precluded from doing that for state purposes," he added.

The remaining \$20-25 million was provided by the head tax and the tax on intangibles such as stocks and bonds, as well as the tax on household goods.

Carpenter estimated it would require \$110-120 million in general funds to operate Nebraska in a practical way, although he said "we never know how much we will spend until the leg-islature adjourns."

In regard to specific taxes, Carpenter explained the difference between his proposed tax and the proposed tax of Gov. Norbert Tiemann.

He said the Governor wants to have an income tax according to gross in-come, while I want a tax based on a percentage of the dollars you pay to the Federal Government."

"For example, if your federal tax is \$100 and the state has assessed a 10% tax, you would pay \$10 to the state government," he

Besides the state budget, he also discussed the proposed merger between the University and the University of Omaha and LB45, the bill he introduced which would legalize abortion in

specific cases. Carpenter said he favors the merger of the state's two largest universities for two reasons.

He noted the the city of Omaha couldn't support the

University of Omaha by itself and the merger would "solidify 19 votes in the legislature."

If the merger would be approved, the 12 Omaha senators and the seven Lincoln senators would represent the combined University of Nebraska complex, and, he said, "If you can get seven more senators that would be 26 votes, and with 26 votes in the legislature you can do anything you want."

Carpenter described LB45 by saying he "is trying to mode abortion laws to the point where they will fit in with what the general public will accept."

The bill states that women could have an abortion if ". . . there is substantial risk that continuance of the pregnancy would gravely impair the physical or mental health of the mother, or there is a substantial risk that the child would be born with grave physical or mental defect . . .

The abortion would have to be approved by four physicians — the physician performing the abortion and three others.

"I attended a meeting recently, where it was pointed out that there are 65,000 -mentally retarded children today. I don't know how many if any of them could have been saved by abortion," he said.

Carpenter went on to say that if abortion and other related problems would "be discussed openly there would be less problems lat-

"I am simply trying to broaden the abortion law as it now exists," he con-

Next Faculty Evaluation Booklet To Have Twice As Many Teachers

The second Faculty Evaluation Booklet (FEB) will contain more than twice as many instructors as the first edition did, according to Tom Morgan, chairman of the FEB committee of ASUN.

'It now appears that the original goal of 300 instructors will be reached," Morgan explained. "The first book contained 119 instruc-

Evaluations will be conducted during the second semester dead week, and the evaluations for the two semesters will be published together in the second edi-

"The second edition, which will be published next fall,

will be more useful to the students in other ways," Morgan continued. "The evaluations will contain more statistics. The facts will be presented so that the student can draw his

own conclusions He said that this was possible because of the changes in the questionnaire used and the fact that the questionnaires will be professionally tabulated.

A disadvantage of professional tabulation, Morgan said, is its cost.

Another factor, that will benefit of the student, will be the larger participation of instructors in the second edition, he said. Last semester 606 in-

structors received letters inquiring if they wanted to evaluated and 271 replied, with 218 expressing interest, he said

"Several of these faculty members were unable to be evaluated, however," was because or several reasons: 1) the instructor was not teaching a course that semester; 2) the number of students enrolled was extremely small; 3) the instructor taught only graduate level courses."

Those faculty members who were not evaluated last semester will be contacted at the end of this semester concerning the opportunity for their evaluation, Mor-

What you do on February 23, 24. may affect the rest of your life!

You can judge a company by the men it keeps

Like lots of companies, we want college graduates. We offer them careers, not just jobs. In fact, a majority of the college-trained people who have come to Armstrong are still with us. One reason for our low dropout rate is our high growth rate. We need college graduates who are looking for a place where they can grow. At Armstrong, an individual has plenty of room to move ahead. We make more than 400 products, from multifunctional building components to innovations in packaging, so career opportunities are practically limitless. Young people will find a ready-made market for their thinking and an opportunity to prove themselves-to get their ideas off the ground and into use. We stick by our college graduates. Maybe that's why they stick with us. See your Armstrong representative when he is on campus soon. For more information about Armstrong now, see your placement officer or write the College Felations Department, Armstrong, Lancaster, Pa. 17604.

Manufacturer of resilient floors, cellings and ether building products. packaging materials, industrial products, and home maintenance specialties.

An Equal Opportunity Employer

A progressive, diversified organization offering rewarding careers in accounting . advertising • employee relations • engineering • industrial engineering • marketing • production planning • public relations • research and development.

That's when the IBM interviewer will be on campus. When he'd like to talk with youwhatever your area of study, whatever your plans after graduation.

You'll find job opportunities at IBM in six major areas: Computer Applications, Programming, Finance and Administration, Research and Development, Manufacturing and Mar-

Some of these areas may not mean much to you-now. But just let the IBM interviewer explain a few of them. One may be just the career you're looking for. It could be the start of something big-your future with IBM.

Whatever your immediate commitments, whatever your area of study. sign up for your on-campus interview with IBM, now,

If, for some reason, you aren't able to arrange an interview, drop us a line. Write to: Manager of College Recruiting. IBM Corporation, 100 South Wacker Drive, Chicago, Illinois. IBM is an Equal Opportunity Employer.
