

Parking Tickets Cause Friction . . .

ASUN Group Hears Appeals

Committees such as Student Conduct and Legislative Liaison, which have been in the limelight a great deal this year are some of ASUN's committees working of individual projects.

One of these committees is the parking committee, with Mike Nerud serving as chairman. The main concern of the committee is to hear parking appeals by students concerning ticket or fines they have received.

Nerud said that students who wish to appeal their tickets come before a board composed of his committee and Capt. Eugene Masters of the University police.

"The student explains his case from his point of view and then we discuss it and decide whether or not to grant his appeal," Nerud explained.

Nerud noted that the number of appeals was somewhat reduced last semester, numbering under 35. He stated that he did not know whether this resulted from students believing an appeal to be futile or what.

Another project of the Parking committee is to compile a questionnaire for users of the "Big Red Rider" in regard to increased costs for more service.

Nerud said that his committee made a survey of the number of cars per class on the campus in order to determine whether or not the elimination of the freshman and-or sophomore class cars would be feasible.

"We found that the great number of Lincoln students of all classes who commute to the campus would prohibit the elimination of one class's cars," Nerud explained.

The Public Issues committee will be reporting to the Student Senate on their actions within the next few weeks, according to Liz Aitken, chairman.

"During the last semester we investigated the homecoming procedure on the University campus and also sent letters to other campuses to find out how they handle their homecomings," Miss Aitken said.

She said the results of the committee's investigations and its suggestions

concerning Homecoming would be made to the ASUN Electoral Commission.

"The committee has also conducted a follow-up study on the previous two year's Public Issue investigations which dealt with foreign student and Negro housing," Miss Aitken explained.

The third project of the committee has been a survey of faculty members concerning the new pass-fail system, the number of regular sections each instructor teaches and the number of graduate sections.

The majority of the actions taken by the Public Relations committee, according to its chairman Dave Piester, has been in the area of publicity.

"The committee has been contacting the new media when speakers such as the chancellor and Mayor Dean Peterson appear before the Senate," Piester said.

"Presently, the committee is exploring the possibilities of having area high school student councils attend Student Senate meetings and explaining to them the need for the proposed budget increase," he continued.

Other projects of the committee concern investigating the best manner in publicizing the spring ASUN elections and writing an article for the University alumni magazine explaining ASUN, its purpose and accomplishments.

The establishment of a new summer English course is one of the projects which has been conducted by the Student Welfare committee.

Ron Pfeifer, chairman of the committee, said that the complete explanation and requirements for the course will be announced at the Senate meeting in two weeks.

"Another project of the committee has been the investigation of Scrip magazine financial problems. We will assist Scrip in some manner, probably in finding funds," he explained.

Pfeifer said that his committee will begin investigating why only one stu-

dent organization, AUF, can solicit money from the student body.

"The committee will also continue investigating the problem of discrimination on campus," Pfeifer added.

The activities committee has been working with the Student Activities office in establishing an orientation meeting for new treasurers of student organizations, according to its chairman, Margo McMaster.

"We are also working on compiling a directory of student organizations which would include telephone numbers for the officers of the organizations," Miss McMaster explained.

The committee is also responsible for the Campus Handbook which is mailed to all new freshman at the University.

She explained that the committee's main interest, in regard to the handbook, has been to make certain that each organization has the statement they want to appear in the handbook and to update some of the photographs.

John Hall, chairman of the Academic Research committee stated that his committee has developed a proposed plan for the adoption of a quarter system at the University.

"We have been receiving answers to the letters we sent to various college administrations which have adopted the quarter system asking their impressions of it," Hall continued.

"Recently we sent out another series of letters, this time to the student councils of the same schools in order to obtain their opinions."

Hall stated that the committee will be compiling a questionnaire which will be sent to all chairmen of University departments, asking their opinions of a quarter system.

"Once we have obtained all this information and explained the quarter system to the student body, we will conduct a survey of the students, asking their opinions of a quarter system," Hall said.

AWS Applications Available On Monday

Applications and petitions for AWS Board positions will be available Monday.

According to Barb Beckmann, AWS judicial vice-president, the material may be picked up in the AWS office Monday and must be returned by 5 p.m. Feb. 20.

The petitions must contain the names of 25 women students regularly enrolled at the University.

Miss Beckmann said the candidates are to include two pictures with their ap-

plications for publicity purposes.

The general election will be held March 8 and a primary will be conducted a week prior to the general election.

Women receiving the highest number of votes in the primary will be eligible to run in the general election. There must be twice as many final candidates as there are positions available in the different representative areas.

AWS election procedures have been changed this year, Miss Beckmann said, "to make the board more receptive to the woman students."

Candidates will not be slated as in previous years. Instead women who meet University requirements, for participation in extra-curricular activities and have 2.3 averages may run for board positions in the primary election.

Women filing for AWS president must have served on the 'aws board at one time during their college career.

The three presidential candidates receiving the most votes in the primary will run in the general election. The candidate receiving the most votes in the general election will serve as AWS president and the other two candidates will be vice-presidents.

CAREER NEWS FROM HUGHES

Aerospace Divisions in Southern California

NEW AND CONTINUING PROGRAMS AND PROJECTS

- PHOENIX Missile & Fire Control System
- SURVEYOR Lunar Landing Spacecraft
- Synchronous Communications Satellites
- TOW Anti-Tank Missile System
- ATS (Applications Technology Satellites)
- AIM-47A/AIM-4E Missiles
- VATE Automatic Checkout Equipment
- CORDS

These examples of Hughes Aerospace activities are representative of more than 230 major product and service capabilities ranging from aerospace vehicles to ASW systems. Diversification such as this promises long-range stability both for the company and its employees.

NEW MISSILE SYSTEMS DIVISION

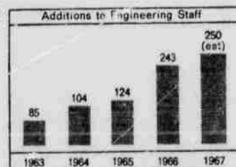

More than 1,600 engineers, scientists and technicians are now at work on expanding R&D programs at Hughes new 85-acre Canoga Park complex in the San Fernando Valley. Unexcelled facilities and the professional atmosphere at Hughes encourage creativity and achievement.

IMPORTANT OPPORTUNITIES, steady growth, diversification, long-range stability, professional atmosphere, advanced facilities, fine living conditions—these are the advantages which Hughes Aerospace Divisions can offer you at Culver City and Canoga Park.

For additional information and to arrange an appointment with our Technical Staff Representatives, please contact your College Placement Office or write: Mr. Robert A. Martin, Head of Employment, 11940 Wilshire Blvd., Culver City, California 90230.

HIRES OF ENGINEERING GRADUATES

Of the over 12,000 employees of the Aerospace Divisions, over 5,000 are Members of the Technical Staff. Average experience is 11.7 years. Average age is 37.9 years.

HUGHES-CULVER CITY/CANOGA PARK

Hughes Aerospace Divisions at Culver City, and Canoga Park offers Engineers and Scientists a unique combination of urban and suburban advantages. Located adjacent to major freeways, Los Angeles Civic Center is about a half-hour distant—beaches, just a short drive. Attractive residential neighborhoods are nearby. U.C.L.A., U.S.C. and Cal Tech offer outstanding educational facilities.

An equal opportunity employer / U.S. citizenship required

You don't have to be an ag engineer to make a splash with International Harvester

We need talented graduates with many varied backgrounds. We not only make the go-anywhere International Scout, illustrated; but we're in a broad range of industries from agriculture to aerospace. We're big in earthmoving equipment, even bigger in motor trucks. We're an important steel producer. We fabricate metals for rockets, missiles and jet aircraft. All this in addition to being a leading farm equipment producer.

You bet we need people with agricultural backgrounds and interests. But we also need talented and imaginative graduates in accounting, business administration, liberal arts and the basic sciences. At IH the product is POWER. Providing mechanical power for an endless variety of jobs is what International Harvester is all about. POWER is a two-billion-dollar-a-year business with us. We offer you a chance to be a vital part. We provide you with an ideal combination of opportunity, responsibility and individual treatment. Think about POWER. Think about IH.

International Harvester puts power in your hands

Interested? Contact your Placement Officer now for a date to see an IH representative when he visits your campus. Or write directly to the Supervisor of College Relations, International Harvester Company, 401 N. Michigan Avenue, Chicago, Illinois 60611.
