

Informal Talks Scheduled In Master's Week Plans

(EDITOR'S NOTE: In preparation for Master's Week, the Daily Nebraskan will be printing a series of articles on Master's Week plans and the Master's themselves. Master's Week is May 1 through 4 this year.)

Eleven distinguished alumni of the University will return to visit with students on an informal basis during Masters Week, which begins April 30, according to Joan Mc-Clymont, chairman of the ASUN Masters Week Committee.

The Masters Program is an annual event, sponsored by ASUN, in which University graduates who have been successful in their field are invited to speak. The Masters will appear in living units and in informal conferences with students.

Gerald Phillippe

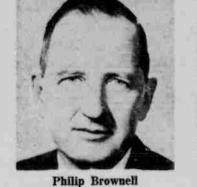

This year's Masters are: the President of General Electric Company, Gerald Phillippe; the Executive Vice President of Olin Mathieson Chemical Corp., Philip C. Brownell: the first woman to graduate from the University with a B.S. in civil engineering, Miss Meredith Thomas; the Chairman of the Board of Supervisors of Los Angeles County.

An attorney with Wood, King, Dawson, and Logan of New York, John B. Dawson; ity while at the University and he was Beta Gamma Sigma, an honorary business fraternity and Phi Beta Kap-

In 1961 he became president of General Electric and he is presently the Chairman of the Board of General Electric Company. Phillippe was former Vice President of the Comptrollers Institute of America.

Phillip Curtis Brownell was a member of Delta Upsilon social fraternity while at the University. His activi-ties included being President of the Junior Class, President of the Student Council, Assistant Managing Editor of the Cornhusker and Editor of the Daily Nebraskan. He was a member of Innocents Society and a Phi Beta Kappa.

He graduated from the University in 1933 with an A.B. and did Post-Graduate work at Yale Law School. He is Board.

presently Corporate Vice President and Manager of the Packaging Division of Olin Mathieson Chemical Corporation. He served the Federal Government in several capaicities between 1941 and 1946 as a member of the Lend Lease Administration, of the Board of Economic Welfare, the War Production Board, and the Counsel to Na-Wage Stabilization tional

Ad Hoc Committee Draws Up **Recommendations on Housing** first recognized the three

A report with ten recommendations regarding University housing policy has been completed by the Ad Hoc Housing Committee, formed Lis semester.

The recommendations were made with respect to housing policies regarding single undergraduate full-time students who do not live with their parents. **Approved Housing**

The committee's report

Are the counseling on campus as freshmen, but services in University housit should not be demanded. ing units adequate to meet **Class Standing**

University approved hous-ing as defined by the Board of Regents in 1958, must meet basic physical health needs, basic mental health needs, protections against contag-ious disease and accidents.

The committee agreed that these are needed "to insure the type of environment which makes it possible for the student to best benefit from a university education.

Freshman Housing

The report says that the committee agreed that freshmen should live in an on-campus h o u s i n g situation. The needs of a freshman could "best be met in an on-campus enviroment and are necessary to the maturation of the student which complements the formal University education."

The recommendations allow for more individual choice once the student completes a year of study at the University.

"This housing policy is one that will give a student the experience and benefits of group living and also the opportunity to live in housing of his choice where he makes his own living decisions. This will not be an inflexible housing policy," the report states.

Committee Recommends

The committee recommended using class standing for the purpose of housing.

'As there may be some question as to how this policy will affect AWS, it should be pointed out that a system of hours is a social regulation and not a question of housing policy. It will be for the women who remain on campus to decide the future role of AWS." the report continues.

The committee suggested that a permanent housing committee could try to answer the questions concerning current housing situations on campus, as: Are the pro-

Interviews Scheduled For Nebraskan Posts

Interviews for next semester's Daily Nebraskan Editor, managing editor, news editor, business manager and sports editor will be held April 28.

At that time the Publications Board will also interview applicants for the two positions of senior writer and senior editor.

Other Positions

The new editors will interview applicants for the other positions on the Nebraskan

staff after the Publications Board finishes their selections. These positions include copy editors, staff writers, night news editor and business assistants.

Applications for all posiare available in the were held last week, but will tions be continued. Applications for Daily Nebraskan office in the basement of the Nebraska paid positions will be accept-Union and at the School of Journalism in Nebraska Hall.

the demands of this policy? G. Robert Ross, vice-chancellor and dean of student affairs, said the report will first go to ASUN, then the Faculty Senate Committee on Student Affairs, the chancellor, and finally to the Board of Regents this spring.

Committee member Marv Almy said that the members "looked at it from an educational point of view." He called it a workable plan, and easy to install.

Advising Students

He indicated that the University Housing Office is advising students about next year's housing with the assumption that the recommendation will go into effect as policies next fall.

Almy said they were at least making preparations to operate next year under the recommendations as policy.

Sandpipers To Appear On April 28

A Sandpiper is a shore bird with a long bill, but it is also the name of a talented singing group who will appear at the C. Y. Thompson Library on East Campus April 28.

This group recorded two million sellers - Guantanamera and Louis, Louie. The trio, formed in 1961, is made up of Mike Peano, Jim Brady, and Richard Shoff-

These three 22-year-old artists have been singing together since the age of ten, when they were sopranos in the Mitchell Boys Choir.

The Sandpipers have flex-ible voices and a remarkable vocal range. They prove this in one number which each voice interchanges from tenor to beritone to bass. This unusual ability coupled with their polished blend, gives the Sandpipers their unique and instantly recognizable sound.

A study of the health and safety conditions of University fraternities, sororities and cooperatives has indicated no glaring deficiencies, E. W. Simpson, Chief of the Environmental Health and Safety Division of the University Health Services, said Wednesday.

With only five houses remaining to be inspected, Simpson said the survey, evaluating the houses' safety, fire safety, food service, housing and sanitation facilities, is taken as "it is our responsibility to see that the house is safe to live in."

He said that for the first time, a house, the Kappa Delta sorority, had no safety or health deficiencies and that several other sororities also had less than three deficien-

cies to remove. Simpson added that several areas could use additional improvement in a majority of the living establishments.

Additional Improvement

He said a manual fire alarm and pull system should be installed on each floor of the residence as it "would aid in the evacuation of persons in case of a fire." Another problem that con-

mantly occurs is that of over-

crowded sleeping spaces along with inadequate dishwashers.

Health, Safety Conditions Good

House Inspections Find Most

He said that if house additions are needed, the plans are reviewed before construction begins to eliminate additional confusion when the addition is completed.

"The drinking glasses aren't adequately being washed as many boys are in a hurry to go somewhere," he said, "and the temperatures on the rents of dishwashers should be 180 degrees

He added that throughout the 11 years he has been inspecting facilities, the houses have been improving e a c h year because "they the m-selves want to do it," he said. He added that houses have improved in areas such as adequate fire escapes, clean-er rooms, better dishwashing

and storage areas and replacing plastic wastebaskets with metal containers. "I have talked with the students and they are pleased

with the program and they are quite cooperative when I visit them," he added. Visits

During the visits, lasting about 45 minutes, Simpson first makes an appointment

and then is escorted through the house by a resident so "they see what I see," he explained.

> After the inspection is completed, a report regarding the findings is mailed to the house and the alumni chapter so that the deficiences can be corrected.

> The inspection which takes two weeks to complete is conducted in the fall and spring of each year. Food Sanitation

Each fall, a food handlers institute is held to acquaint persons involved in food handling with various food sanitation measures.

It is mandatory for persons to attend the hour-long sessions to renew their food handlers permit, he said, and the sessions "provide a good training for all University busboys, cooks and others.

Besides inspecting the living units, he also inspects the university's food services on both the city and agriculture campuses and the College of Medicine in Omaha, along with the University's six experimental farms across the state

"All across the campus, the food service is excellent," he concluded.
