

Subcommittee Backs Housing Code Issue Passage Would Benefit University

The Minimum Standards Housing Code is supported by the ASUN subcommittee because poor housing complicates learning, better housing attracts better staff members and it would assure that low cost housing be brought up to standards, according to subcommittee member Ron Warnet.

Lincoln voters will decide the fate of the proposed Minimum Standards Housing Code in a city election Tuesday. The City Council approved the measure by a vote of 6-0 last spring.

The ASUN Special Projects Committee, headed by Chairman Margo McMaster, has been working the past several weeks in support of the code.

The committee has attempted to gain support for the code by contacting over 1,500 parents of University students living in Lincoln, going door-to-door in some parts of the city and talking with parts of the voting University community, Miss McMaster said.

Warnet, acting as spokesman for the subcommittee, gave three reasons for its support of the code.

THREE REASONS

First, many students, for lack of available transportation, are forced to live near the campus where

hosing is generally in poor condition. Living in substandard housing may impair the student's ability to learn.

Foreign students, in particular, are in this situation. They come to this country to get a better education only to find inadequate housing to complicate the problems of studying in a foreign country. An improvement in living conditions available to students would benefit the University as a whole, he said.

Second, faculty members demand good living conditions for their families. Passage of a minimum housing code would be another step in improving the University to attract the competent faculty necessary for a good university, he said.

A third reason for subcommittee support was given by Jean Altemeyer, chairman of the housing code subcommittee.

The student with small income will be insured of a place to live that meets the housing code's requirements for safety and welfare, she said.

The code will help fill the need for low rent housing that is up to standards.

Warnet also gave a brief explanation of the function of the code.

FUNCTION OF CODE

Inspections would be made to determine if there are existing conditions which should be corrected. The homeowner is protected under the code by many safeguards from unlawful search and every effort would be made to make this inspection most convenient to him, he noted.

The code sets forth detailed specifications for judging substandard conditions. This will prevent the inspector from being arbitrary in his judgment, Warnet said.

The code further stipulates that one or more substandard conditions make a dwelling unit substandard only if there is a danger to life, limb, health, property, safety or welfare of the public or occupants of the dwelling unit.

If the inspectors decide there is a real danger and corrective measures must be taken, they would submit their recommendations to the City Building Inspector.

If the inspector agrees with the decision the owner would receive a letter stating the findings and the corrective steps recommended.

The owner would have thirty days to appeal to the mayor if he does not wish to accept the recommendations. The decision of the mayor could be appealed to regular courts, he pointed out.

There is no penalty section. Violation of any city ordinance is considered a misdemeanor as voted by Lincoln voters in 1966.

RELOCATION ASSISTANCE

If it becomes necessary to move a person or family out of their dwelling because of extensive repair or condemnation, they could not be moved until they had been offered "assistance in relocating in a dwelling unit which meets the provisions of the Code." The mayor is required by the Code to designate an agency to carry out this responsibility.

The occupant as well as the owner are held responsible for the condition of the dwelling unit by the code. Specifically, the occupant is responsible for keeping his unit clean, while the owner is responsible for keeping the unit in sound structural condition.

Four University law students will try to add another award to the College's list of moot court honors when they compete in the regional court competition Nov. 17-18.

They are Bill Fenton, senior and graduate of Emporia State College, Tom Thomsen, also a senior, and juniors, Bill Harding, and Leslie Bruce Wright, the

latter three University of Nebraska graduates.

Teams from 12 law colleges will participate in the court.

The Nebraska team drew a first round bye and will compete against winners of the first round in the quarter-finals set for Friday afternoon. The semi-final and final rounds will be held on Saturday.

The winner and runner-up will advance to the national finals to be held in New York City in December.

Nebraska's 1963 team, entering for the first time, won the national championship and award for outstanding individual speaker.

The 1956 and the 1961 teams were national runners-up. They also took honors for the top individual and best brief in the competition.

Nebraska won the regional championship in 1962 and was regional runner-up in 1964 and 1965.

This year's case to be argued concerns a class action for people who allegedly bought stocks and bonds from the facts in an erroneous financial statement supplied by an accounting firm.

Applications will be accepted until Nov. 24 for the first term, which begins Nov. 27. The second term's applications will be accepted until Feb. 2.

Further information can be obtained by writing to Hall of Youth, Nebraska Center, 33rd and Holdrege, Lincoln, Nebraska 68503.

Nebraskan Want Ads Bring Results

The Farm and Ranch Operators Short Course, conducted by the University College of Agriculture, presently has 25 young men enrolled for the fall term.

Among the participants is Charles Heward, a resident of Mills, England. The rest are from the local area.

The eight week, vocational course provides an opportunity for young men who want more agricultural training than high schools offer, but who do not want to pursue a college education, according to Clinton A. Hoover, head of the Hall of Youth at the Nebraska Center for Continuing Education. Students presently enrolled in the University are not eligible for the course.

The courses are designed to provide practical information which can be applied on ranches or farms.

Instructors are College of Agriculture staff members who are specialists in their respective fields and who also have had practical experience.

NCD Goes Outstate As Support Grows

Support behind the Nebraska Concerned Democrats (NCD) seems to be growing, according to figures from Gene Pokorny, treasurer of the organization.

Pokorny estimated that between 500 and 600 signatures had been collected by Saturday's organizational meeting.

The NCD is supporting National Convention delegates hopefuls who are unpledged or pledged to presidential aspirants other than President Johnson and who are opposed to the Vietnam war.

As a branch of the National Conference of Concerned Democrats, the NCD also includes the University Concerned Democrats (UCD), although the division between the groups is not formal.

"We are too busy trying to do the work," Pokorny said, "to worry about setting up officers and so forth in the University group."

As a result of Saturday's meeting 98 letters are being sent to out-state Democrats believed "sympathetic" with the movement.

"These are people we are able to identify as being opposed to the war," he said. "In this way we are broadening our base from the Lincoln-Omaha area."

The out-staters will be asked to circulate petitions in their areas in support of the NCD aims.

The group is also canvassing areas of Lincoln to secure more signatures for the movement.

"Our ultimate goal is not a certain number of names," he said, "but to get just as many signatures as possible for an advertisement in the Omaha World Herald Nov. 26."

Plans for the NCD following the signature drive are uncertain, Pokorny said, but interested Democrats will probably be supporting the delegates pledged to candidates opposing involvement in Vietnam and to delegates not pledged to Johnson.

IDA Seeks Tickets For Orphan Use On Thanksgiving

Members of the Inter-Dormitory Association Council are sponsoring a campus drive for football tickets for orphans on Thanksgiving Day, according to Jerry McCrery, activities chairman.

"Many students will not be using their tickets because of the holiday," said McCrery. He explained that since this was the last game there would be no need for tickets to be returned to those who donate them.

"Student identification cards need not accompany these tickets," explained McCrery.

He said that the University of Oklahoma-Nebraska game would be nationally televised and that a "full stadium would be impressive on TV."

Quiz Bowl

First round Quiz Bowl matches involving a total of 30 freshman teams and 74 upperclass teams — were completed last week.

This year Quiz Bowl offers participating teams the opportunity for special challenge matches. Any team may challenge another team to a match providing both teams consent to the challenge.

Teams interested in challenge matches may contact Bill Ptacek at 1645 R St. The twelve challenge matches will be held on Dec. 14, and will be accepted on a first come, first serve basis.

The results of challenge matches do not apply to regular Quiz Bowl elimination.

The results of last week's matches are:

- Freshmen
 - Sammy Freshmen 115 Ag Men 46
 - Theta Xi 190 Cornhusker Coop 18
 - Cather 125 Love Hall 50
 - Disney House 376 Alpha Omicron Pi 0
 - Phi Kappa Psi 185 Zeta Tau Alpha 90
 - Sigma Phi Epsilon 60
- Upperclassmen
 - Arthur (Beta Sigma Psi) 60 Alpha Xi Delta Classics 0
 - Kappa Alpha Theta 25
 - Alpha Xi Delta Turtles 100 Penn House 65
 - God's Divine Independents 150 Ag Men 30
 - Cornhusker Co-op 186 Love Hall 16
 - Pi Beta Phi 295 Pioneer House 80
 - Delta Tau Delta 115 The Troopers 48
 - Kappa Alpha Theta No. 2 50 The Uncolored Four 80
 - The Uteschables 120 Harpers Knights 60
 - Beta Theta Pi A 225 Cather Hall 618

FOOTBALL FOR SHUT-INS

At next Saturday's football game while you are sitting in your choice student's seat behind the end zone, won't you pause and give a thought to football's greatest and, alas, most neglected name? I refer, of course, to Champert Sigafos.

Champert Sigafos (1714-1928) started life humbly on a farm near Thud, Kansas. His mother and father, both named Walter, were bean-gleaners, and Champert became a bean-gleaner too. But he tired of the work and went to Montana where he got a job with a logging firm. Here the erstwhile bean-gleaner worked as a stump-thumper. After a month he went to North Dakota where he tended the furnace in a granary (wheat-heater). Then he drifted to Texas where he tidied up oil fields (pipe-wiper). Then to Arizona where he strung dried fruit (fig-rigger). Then to Kentucky where he fed horses at a breeding farm (oat-toter). Then to Long Island where he dressed poultry (duck-plucker). Then to Alaska where he drove a delivery van for a bakery (bread-sledder). Then to Minnesota where he cut up frozen lakes (ice-slicer). Then to Nevada where he determined the odds in a gambling house (dice-pricer). Then to Milwaukee where he pasted camera lenses together (Zeiss-splicer).

Finally he went to Omaha where he got a job in a tannery, beating pig hides until they were soft and supple (hog-flogger). Here occurred the event that changed not only Champert's life, but all of ours.

Next door to Champert's hog-floggery was a mooring mast for dirigibles. In flew a dirigible one day, piloted by a girl named Graffa von Zeppelin. Champert watched Graffa descend from the dirigible, and his heart turned over, and he knew love. Though Graffa's beauty was not quite perfect—one of her legs was shorter than the other (blimp-gimper)—she was nonetheless ravishing, what with her tawny hair and her eyes of Lake Louise blue and her marvelously articulated haunches. Champert, smitten, ran quickly back to the hog-floggery to plan the wooing.

To begin with, naturally, he would give Graffa a present. This presented problems, for hog-flogging, as we all know, is a signally underpaid profession. Still, thought Champert, if he had no money, there were two things he did have: ingenuity and pigskin.

So he selected several high grade pelts and stitched them together and blew air into them and made for Graffa a perfectly darling little replica of a dirigible. "She will love this," said he confidently to himself and proceeded to make ready to call on Graffa.

First, of course, he shaved with Personna Super Stainless Steel Blades. And wouldn't you? If you were looking to impress a girl, if you wanted jowls as smooth as ivory, dewlaps like damask, a chin strokable, cheeks fondlesome, upper lip kissable, would you not use the blade that whisks away whiskers quickly and slickly, tuglessly and nicklessly, scratchlessly and matchlessly? Would you not, in short, choose Personna, available both in injector style and double-edge style? Of course you would.

So Champert, his face a study in epidermal elegance, rushed next door with his little pigskin dirigible. But Graffa, alas, had run off, alas, with a bush pilot who specialized in dropping limes to scurvy-ridden Eskimo villages (fruit-chuter).

Champert, enraged, started kicking his little pigskin blimp all over the place. And who should walk by just then but Jim Thorpe, Knute Rockne, Walter Camp, and Pete Rozelle!

They walked silently, heads down, four discouraged men. For weeks they had been trying to invent football, but they couldn't seem to find the right kind of ball. They tried everything—hockey pucks, badminton birds, bowling balls, quoits—but nothing worked. Now seeing Champert kicking his pigskin spheroid, their faces lit up and as one man they hollered "Eureka!" The rest is history.

Speaking of kicks, if you've got any about your present shoe cream, try *Brezmo-Shave*, regular or menthol.
