

AWS congress . . .

Candidates favor sophomore keys

EDITOR'S NOTE: This is the third in a four part series of AWS Congressional candidate's opinions. Wednesday's article will include the opinions of candidates for East Campus, Selleck Quadrangle and Lincoln women.

Most of the AWS Congressional candidates from Sandoz and Smith Halls and all nine Pound Hall candidate favor sophomore key legislation. Besides the key issue, these candidates base their platforms on whether the jurisdiction of AWS should be expanded.

On March 27, each of the three dormitories will elect three AWS congressmen.

Sheryl Bresley said that definite legislation toward passing sophomore keys should begin this spring. "Many sophomores are 20 and responsible enough to know when to come in," she stated. Speaking of the possibility of expanding AWS jurisdiction, Miss Bresley said, "I think that AWS should not step into areas that could better be handled by I.D.A."

Monica Pokorny expressed her approval of sophomore

keys as she said, "If you are at the University your parents trust you. I don't think the University has any right to try to legislate morals."

Miss Pokorny feels that AWS should not expand into areas that could be handled by ASUN, but "if a coed really wants to work through aws for expanded goals she should be able to."

Dee Rauer remarked, "I am definitely for sophomore keys, because sophomores could use them for activities such as foreign films."

She qualified her opinion, however, by saying that sophomore keys "need a lot of thinking about."

"AWS should be working in the realm it is now — rules should be explicitly laid out."

Virginia Alles also feels that "sophomores should be extended key privileges. She mentioned that "perhaps a criteria of grade average" should be required for a sophomore to use a key.

"Keys for sophomores probably won't be legislated until second semester next year — more consideration is needed," she said.

"Lose governing power"

Miss Alles felt that expanding AWS jurisdiction might "lose the governing power that AWS does have." Corliiss Coulthard said that

because "most college girls are old enough to decide how to run their lives, they are old enough to handle a key."

"Probably we will have to wait until next fall for legislation," she said, "but keys should be checked into this summer."

Betty Loers also favors sophomore keys. "If the key system should prove too cumbersome, a pilot program adopting a new system should be devised," she noted.

Do more for women

DeAnn Erks believes that AWS has "been a very effective organization and should be expanded to do more for the women of this University."

Miss Erks also said that coeds want sophomore keys, and if elected she would work toward sophomore key legislation.

Sandy Wegener said, "Sophomore keys — definitely. It won't be possible to legislate sophomore keys before next year, however, because setting up the new AWS structure will take time."

Revise hours schedule

Kathy Meyede said, "An investigation into key and card systems on other campuses should be conducted before any legislation is passed."

"Rather than extending keys to sophomores, I believe a revised hours schedule, especially on week days, would be more feasible," she said.

Should wait for privilege

The four Sandoz candidates took differing views on sophomore keys. Jana Miller said she was not in favor of sophomore keys. She feared a lack of co-operation with parents and administration.

"Keys are a privilege that everybody should have to wait for," Miss Miller contended.

Kathy Armstrong feels that sophomores "are responsible enough for a system of extended hours — other systems besides keys should be reviewed," she said.

Marcia Hoffman expressed her approval of sophomore keys "with parental permission, under the provisions presently used for junior and senior keys."

You don't have time to take the Reading Dynamics course?

Until you do, you won't have time for much else!

During 1967, 6,195 people in this area who didn't have time took the Evelyn Wood Reading Dynamics course.

These were the really busy people. Men and women whose professions were so demanding—whose responsibilities were so overwhelming—that they simply had to do something to create more hours in the day.

Many were college students who had found that their academic pursuits left no time for anything else. They were chained to the study table, with no relief in sight.

Fortunately, there is an answer for students, engineers, attorneys, medical doctors, teachers, and people from all walks of life who have to read more with improved comprehension and recall.

How is Reading Dynamics different from other courses?

Conventional rapid reading courses aspire to 450 to 600 words per minute. Most

Reading Dynamics graduates can read between 1,500 and 3,000 words per minute, and many go even higher.

Equal or better comprehension

With the Reading Dynamics method, you read every word. You do not skim. You learn a skill that permits you to read faster with equal or better understanding than the average reader. Our average graduate reads 4.7 times faster without sacrificing comprehension.

TIME magazine says

TIME MAGAZINE, in referring to Reading Dynamics' impact on our nation's legislators, said, "Washington has seen nothing like it since the days when Teddy Roosevelt read three books a day and ran the country at the same time."

Senate Leaders praise method

SENATOR TALMADGE, Georgia "...the greatest single step which we could take in educational progress."

SENATOR PROXMIRE, Wisconsin "...one of the most useful educational experiences I ever had."

Rapid Reading in White House

The late President Kennedy invited Mrs. Evelyn Wood to the White House to teach Reading Dynamics to key members of his staff. To date, over 300,000 people have enrolled in the course. They include Senators, businessmen, engineers, housewives, high school and college students, and busy people from every walk of life... people who like to read but until they learned to read right didn't have the time.

PERFORMANCE WARRANTY

The Evelyn Wood Reading Dynamics Institute pledges to increase a student's reading efficiency by at least three times. The Institute will refund a pupil's entire tuition if, after completing minimum class and study requirements, he fails to triple his reading efficiency as measured by our beginning and ending tests. Reading efficiency combines rate and comprehension—not speed alone.
