

The Kimball Recital Hall which had been slated for completion by the opening of the first session of summer school remains unfinished. About 30 working days with a full crew would finish up the hall.

The Sheldon Sculpture Garden has been growing nothing but weeds and lumber since the labor strike began during the latter part of April.

Campus construction gets back to normal after city labor strike

Campus construction projects which have been delayed since the latter part of April because of a city-wide labor strike may be getting back to normal.

Work resumed Monday. Though the laborers and teamsters are the only unions that have not signed contracts yet, the two are not expected to picket. Richard Snook, president of the Lincoln Building and Construction Trades, said that work "should be getting back to normal and it will continue that way unless the laborers or teamsters decide to picket."

About 2,000 men were affected by the strike because the picket lines thrown up by the operating engineers were observed by other unions.

Those affected included: plumbers, sheet metal workers, roofers, teamsters, bricklayers, operating engineers, laborers, painters, lathers, cement finishers, carpenters and iron workers.

SEVEN MAJOR campus construction projects were halted because of the strike.

According to Harry S. Allen, director of institutional research, completion dates for the projects have been "seriously altered" by the strike.

The Kimball Recital Hall, located adjacent to the Westbrook Music Building, had been slated for completion by the opening of the first summer session, he said, adding that the building now stands about 30 working days from this goal.

Allen doubts that the first four floors of the \$8.25 million Hamilton Chemistry Building and the remodeling of the old Social Sciences building, which will house the College of Business Administration, will be completed for the opening of the fall semester as scheduled.

OTHER PROJECTS affected by the strike include the remodeling of Nebraska Hall. When the \$2.6 million remodeling job is completed, the western half of the building will contain one floor of office and classroom space, a two-floor undergraduate library and two floors devoted to research work done by the University's museum.

The Sheldon sculpture garden has been growing nothing but weeds among scattered mounds of dirt and piles of lumber since the April strike. The \$375,000 garden, including the cost of the sculpture, is being financed by the Sheldon gift to the University.

On East Campus, the child development laboratory and the remodeling of the dairy industries building have been delayed because of the strike.

Another major construction project began Monday — Phase I of the \$5.1 million Engineering Complex. The three-story building is to be completed in March, 1971, and will house the engineering included in the College of Engineering and Architecture.

THE BUILDING is being constructed in what was formerly a parking lot south of Nebraska Hall. The complex will encompass the area from Nebraska Hall south to Vine Street.

As soon as construction has progressed far enough, the parking area between 16th and 17th Streets and bordered by Vine Street on the south will be closed.

To relieve this shortage of parking space on the downtown campus, the University is trying to work out an agreement with State Fair Board representatives which would lead to the creation of a 12-acre parking lot on the State Fairgrounds adjacent to 14th Street.

Under the proposal, a shuttle-bus service would be provided for students holding parking permits and using the lot.

The stop sign in the foreground above did not stop workers from returning to the job Monday after a seven week labor strike halted construction. Pictured is the Hamilton Chemistry Building project.

Management course is offered

A correspondence course designed to provide businessmen and students with a background in general management has been developed at the University of Nebraska by Professor Henry Albers, chairman of the management department in the College of Business Administration.

The correspondence program, developed through the University of Nebraska Extension Division, has also been adapted to meet the needs of military and civilian personnel of the U.S. Government.

The course, "Principles of Management," covers such areas as organization and systems theory, planning in a dynamic environment, communication and control, computerized informational systems, leadership and motivation in complex organizations and executive development. It may be taken separately or as part of a three-course Management Development Program, in which students may follow the "Principles" course by selecting from "Electronic Data Processing for Business," "Administrative Policy," "Human Behavior in Organization," or "Production Planning and Control."

Professor Albers has written a number of books in the management field, including the text for the course. He has served as a consultant to business, governmental and military organizations in the U.S. and abroad and his books have been translated into several languages.

The "Principles of Management" course is designed for practicing executives and administrators, dietitians, chemists, nurses and other professionals who perform managerial functions and for students of business administration, engineering and liberal arts who want a background in general management.

The course provides three semester hours of University credit. Upon completion, the student receives a certificate and, if he wishes, a letter describing the nature of his achievement.

The tuition fee is \$45, plus the cost

of textbooks. Enrollment may be on an individual basis or on an organization-sponsored career development basis.

The University of Nebraska Extension Division has extensive experience in conducting correspondence courses, operating one of the largest University-related correspondence schools in the world.

Additional information on the course and on enrollment can be obtained by writing the University Extension Division, The University of Nebraska, 511 Nebraska Hall, Lincoln, Nebraska 68508.
