

A University of Nebraska journalism student broadcasts from the KRNU main control room.

KRNU Experiment Includes Five Hours of Classical Music

KRNU, the University of Nebraska FM radio station, is trying something new during the first summer school session.

The student-operated station is experimenting with a lengthy classical music program and an extended broadcasting schedule. It will be on the air June 7 through July 14 from 1 p.m. to 12 p.m. Monday through Friday and will carry a five-hour classical music program.

According to Dr. Larry Walklin, associate professor of broadcasting, this experiment represents a real departure from the regular KRNU schedule. During the regular school year, he explained, the station was on the air only from 4:00 to 12:00 p.m. and

classical music was broadcast only once a week for one hour.

"The classical music program is something that we've been attempting to do for quite a while," he said. "Up until now, however, we haven't had the necessary funds or resources to put the project into operation."

One thing the station was lacking, Dr. Walklin explained, was the large volume of classical music necessary for such a lengthy broadcast. He added that the station is planning to borrow classical selections from the libraries and from the Student Union to supplement its own collection.

Dr. Walklin said that if this summer's experiment is successful and if the necessary

funding is available, KRNU may implement both aspects of the experiment into its fall program.

"We would be interested in audience response to our programming," he said, "and especially to the classical music. Comments can be directed to Program Director, KRNU Radio, 319 Nebraska Hall."

In addition to the classical music, which will be on the air from 1 to 6 p.m., KRNU will broadcast medium tempo music from 6 to 7 p.m., jazz from 7 to 8 p.m., the top 30 hits from 8 to 10 p.m. and electronic or hard rock from 10 to 12 p.m. News will be presented five minutes before the hour with headlines at the half hour.

New Students To Visit NU During Summer Orientation

The 1971 University of Nebraska Summer Orientation Program for incoming students and their parents will begin Thursday, June 10, with a welcoming address by Dr. Russell H. Brown, dean for student development.

The one-day sessions will run through July 14, according to Dr. Peter Wirtz, program

coordinator. He added that 4,000 new students have been invited to attend the orientation.

"The purpose of the program," Dr. Wirtz said, "is to acquaint the student with the University and give him a chance to meet other students. It is also designed to clarify and make changes in individual schedules and to help answer all questions about student life."

The program also gives parents a chance to understand University aims, Dr. Wirtz added, and to meet and talk with faculty, administrators and upperclassmen.

The orientation consists of two separate programs, one for students and one for their parents. The schedule for students includes a discussion of scholarships and financial aids, health examinations and individual meetings with college advisors. The students will also hear a panel discuss student life and development.

In addition to viewing a Centennial College film and program, parents will meet with college deans, counseling center personnel and student hosts.

Both parents and prospective students will also participate in a rap session with Dr. Russell Brown.

already assume."

Mrs. Delores Broz, a teacher, asked: "How do you evaluate a student? By the way the classroom looks, how they score on tests, or their performance later in life? It's such an intangible thing."

If the teachers aren't sure about an evaluation standard, the pupils are. The classrooms are alive with noises of learning out loud, and the students seem to be having fun in school.

But lest anyone think that school has become a five-day picnic, a fifth grader offered this back-to-earth appraisal when asked if he liked school: "It's funner this year," the boy answered, "but it still ain't completely fun."

WHO SAYS YOU CAN LEARN TO READ 1000 WORDS PER MINUTE?

OUR GRADUATES!

Gene Schroeder
Doane College
