You are not looking at this week's Special... (which will be gone next week)

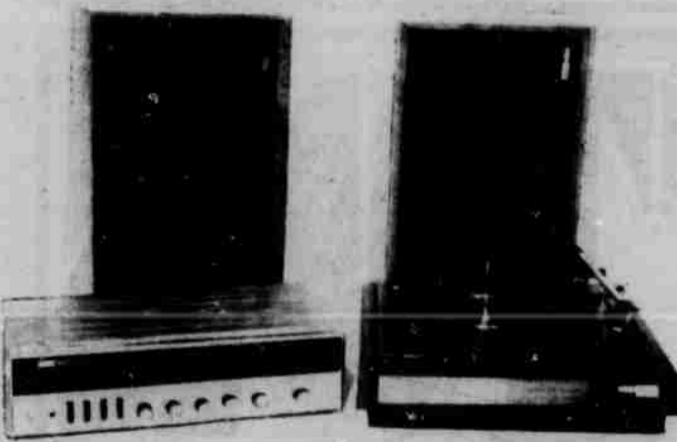

At Stereo Studio, we believe that when you buy a stereo system, you want the best value for your money. Shuffling components around in "special buys" week after week would not allow us--or you--to properly evaluate their true quality. That's why we keep careful watch on all our brands, and assemble from them what we consider the best value system in each price range. We judge them in our own bench tests. We stand behind our own service department, which does warranty repair work in Lincoln on every component we sell.

Our systems don't change unless the manufacturers raise prices or alter quality--or unless a proven better value comes along. That's why we can recommend our economy system with confidence.

The Harman-Kardon 230A receiver delivers 17 watts RMS across the entire audio range, both channels driven, at less than 1% total distortion (RMS is the most demanding and least flashy of the various power rating methods).

The BSR McDonald 310/X was last year's best-selling 300T; made better with the addition of a cueing lever, adjustable anti-skate control, fixed counterweight, and newly designed low-mass tone arm system. It includes the popular Shure M-75 magnetic cartridge.

Add two Utah AS-2A 8-inch acoustic suspension bookshelf speakers, and you have components that sell for \$314.80 in our store. We offer you the system for \$239.95, a \$74.85 saving on our "special" this week...and next week...and next.

Walnut enclosure not included.
